Political Ecosystems Modernity Complexity Fluidity And The Ecoleft:

Political Ecosystems J. P. Harpignies, 2004 Cultural Writing Politics Environmentalism **POLITICAL ECOSYSTEMS** is a highly original text that argues those of us who are left progressives and environmentalists need to engage in rigorous self examination better assessing their political strengths and weaknesses if they ever hope to achieve our goals Harpignies argues left progressives must cultivate more sophisticated ways of looking at the culture by addressing little discussed but very real divides from the communitarian libertarian dichotomy to that of techno utopians and neo Luddites This thoroughly researched yet accessible book is a polemic but one that does not promote specific views and positions The book is ultimately a toolbox to help progressives expand their understanding of politics and help them develop better strategies for championing their cause

latest cutting edge research on psychedelics along with their use in indigenous cultures throughout history for rites of passage and shamanic rituals Neal Goldsmith reveals that the curative effect of entheogens comes not from a chemical effect on the body but rather by triggering a peak or spiritual experience He provides guidelines for working with entheogens groundbreaking analyses of the concept and the process of change in psychotherapy and ultimately his own story of psychedelic healing Examining the tribal roots of this knowledge Goldsmith shows that by combining ancient wisdom and modern research we can unlock the emotional mental and spiritual healing powers of these unique and powerful tools providing an integral medicine for postmodern society American Book Publishing Record ,2003 *Forthcoming Books* Rose Army,2004

Ecology Contested Peter Staudenmaier,2021-09 In an age of climate crisis and political confusion ecology seems to offer clear answers to urgent questions about the current global predicament Yet ecology has always been politically ambivalent Environmental ideals appeal to radicals and reactionaries alike ecological concerns can align with both the left and the right including the extreme right In *Ecology Contested* Peter Staudenmaier examines the complex and conflicting politics of environmentalism with a critical eye offering challenging perspectives on the historical philosophical and political dimensions of ecological engagement in a troubled world

Fugitive Politics Carl Boggs,2021-11-10 *Fugitive Politics* explores the intersection between politics and ecology between the requirements for radical change and the unprecedented challenges posed by the global crisis a dialectic has rarely been addressed in academia Across eight chapters Carl Boggs explores how systemic change may be achieved within the current system while detailing attempts at achieving change within nation states Boggs states that any notion of revolution seems fanciful in the current climate contending that controlling elites have concentrated their hold on corporate power along three self serving fronts technology Big Tech and the surveillance order militarism and the warfare state and intensification of globalized power Combined with this Boggs cites the fundamental absence of revolutionary counter forces arguing that after decades of subservice relevant allied to the rise of identity politics and social movements the Marxist theoretical legacy is now exhausted and will not provide an exit from the crisis Boggs concludes that the only possibility for fundamental change will come from an open style of politics in the Jacobin tradition operating within the overall structures of the current democratic state Written for both an academic and a general readership in the U S and beyond *Fugitive Politics* will be of vital importance to those studying political theory political philosophy political history Marxism and Marxist theory authoritarian politics ecology environmental politics and climate politics

The Politics of Unsustainability Ingolfur Bluhdorn,Ian Welsh,2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of

ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics **Ecological Politics in an Age of Risk** Ulrich Beck,1995-08-03 Ecological Politics in and Age of Risk by Ulrich Beck is an original analysis of ecological politics as one part of a renewed engagement with the domain of sub politics
