

Propaganda: The Formation of Men's Attitudes

From Wikipedia, the free encyclopedia

Propaganda: The Formation of Men's Attitudes (1965/1973) (French: *Propagandes*; original French edition: 1962) is a book on the subject of propaganda by French philosopher, theologian, legal scholar, and sociologist Jacques Ellul. This book appears to be the first attempt to study propaganda from a sociological approach as well as a psychological one. It presents a sophisticated taxonomy for propaganda, including such paired opposites as political–sociological, vertical –horizontal, rational–irrational, and agitation –integration.

The book contains Ellul's theories about the nature of propaganda to adapt the individual to a society, to a living standard and to an activity aiming to make the individual serve and conform. The work concerns propaganda as an inner control over an individual by a social force.

Propaganda The Formation Of Mens Attitudes:

Propaganda Jacques Ellul, 1965 Jacques Ellul's view of propaganda and his approach to the study of propaganda are new. The principal difference between his thought edifice and most other literature on propaganda is that Ellul regards propaganda as a sociological phenomenon rather than as something made by certain people for certain purposes. Propaganda exists and thrives; it is the Siamese twin of our technological society. Only in the technological society can there be anything of the type and order of magnitude of modern propaganda which is with us forever and only with the all-pervading effects that flow from propaganda can the technological society hold itself together and further expand. Propaganda Jacques Ellul, 1973-01-12 This seminal study and critique of propaganda from one of the greatest French philosophers of the 20th century is as relevant today as when it was first published in 1962. Taking not only a psychological approach but a sociological approach as well, Ellul's book outlines the taxonomy for propaganda and ultimately its destructive nature towards democracy. Drawing from his own experiences fighting for the French resistance against the Vichy regime, Ellul offers a unique insight into the propaganda machine. *Propaganda: the formation of men's attitudes*, tr Jacques Ellul,

The Future Without a Past John Paul Russo, 2005 Argues that technological imperatives like rationalization, universalism, monism, and autonomy have transformed the humanities and altered the relation between humans and nature. Examines technology and its impact on education, historical memory, and technological and literary values in criticism and theory, concluding with an analysis of the fiction of Don DeLillo. Provided by publisher. **Lattice of Lies** Nicholas Rentas, 2021-06-17 Expanding on the works of Jacques Ellul, Noam Chomsky, Upton Sinclair, and many others, *Lattice of Lies* investigates a power structure that controls through a divided media system of propaganda. Due to an onslaught of disinformation, there is an urgent need for media literacy. By taking a closer look at the media model and history of propaganda, the reader will have a deeper understanding of the forces that desire to divide and indoctrinate the American people. By exploring narrative construction, the reader can better decode the deceptions and counter the political playbook. While Machiavelli aided the prince in his quest for power, *Lattice of Lies* serves the people in their defense against tyranny. Other highlights: The suppression of information has allowed an imperialistic and rogue military to operate unchecked. Divide and Rule: How political leaders strategize to divide the populace so that the people cannot challenge the power structure. Behind the illusion of pluralistic power lies a plutocracy that relies on propaganda to deter populist takeover. The divided media model ensures that different facts and narratives produce two warring factions. How the power structure co-opted the rise of populism by providing fake populists to take their place. Examining the powerless masses and their inability to cope with pollution, inflation, endless war, and inequality. Providing a vision for how the people can cross the bridge toward a sustainable and humane future. **The Oxford Handbook of Propaganda Studies** Jonathan Auerbach, Russ Castronovo, 2013 Derived from the word to propagate, the idea and practice of propaganda concerns nothing less than the

ways in which human beings communicate particularly with respect to the creation and widespread dissemination of attitudes images and beliefs Much larger than its pejorative connotations suggest propaganda can more neutrally be understood as a central means of organizing and shaping thought and perception a practice that has been a pervasive feature of the twentieth century and that touches on many fields It has been seen as both a positive and negative force although abuses under the Third Reich and during the Cold War have caused the term to stand in most recently as a synonym for untruth and brazen manipulation Propaganda analysis of the 1950s to 1989 too often took the form of empirical studies about the efficacy of specific methods with larger questions about the purposes and patterns of mass persuasion remaining unanswered In the present moment where globalization and transnationality are arguably as important as older nation forms when media enjoy near ubiquity throughout the globe when various fundamentalisms are ascendant and when debates rage about neoliberalism it is urgent that we have an up to date resource that considers propaganda as a force of culture writ large The handbook will include twenty two essays by leading scholars from a variety of disciplines divided into three sections In addition to dealing with the thorny question of definition the handbook will take up an expansive set of assumptions and a full range of approaches that move propaganda beyond political campaigns and warfare to examine a wide array of cultural contexts and practices
