Morphology and its Interfaces Alexandra Galani, Glyn Hicks, George Tsoulas, 2011-08-17 One of the most striking trends across linguistic research in recent years has been the examination of the interfaces between the various subcomponents of the language faculty Yet approaches to these interfaces across different theoretical frameworks differ substantially This volume pulls together research into Morphology and its interfaces from researchers employing a variety of different theoretical and methodological perspectives Morphology is a diverse field and rather than aiming to collect works sharing a particular approach or framework of assumptions this collection instead captures the diversity and provides an overview of the state of the research field while also addressing particular empirical phenomena with up to date analyses The articles collected provide case studies from a diverse variety of languages revealing properties of the interfaces that morphology shares with syntax semantics phonology and the lexicon while the volume's inclusive cross theoretical approach will serve to introduce readers to the findings of alternative frameworks and methodologies

Manual of Grammatical Interfaces in Romance Susann Fischer, Christoph Gabriel, 2016-09-12 Different components of grammar interact in non trivial ways It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory The volume provides a general overview of various topics in the linguistics of Romance languages by examining them through the interaction of grammatical components and functions as a state of the art report but at the same time as a manual of Romance languages

Optimality Theory in Phonology John J. McCarthy, 2008-04-15 Optimality Theory in Phonology A Reader is a collection of readings on this important new theory by leading figures in the field including a lengthy excerpt from Prince and Smolensky's never before published Optimality Theory Constraint Interaction in Generative Grammar Compiles the most important readings about Optimality Theory in phonology from some of the most prominent researchers in the field Contains 33 excerpts spanning a range of topics in phonology and including many never before published papers Includes a lengthy excerpt from Prince and Smolensky's foundational 1993 manuscript Optimality Theory Constraint Interaction in Generative Grammar Includes introductory notes and study research questions for each chapter

Interfaces in Language John Partridge, 2010-08-11 This volume resulted from the first Interfaces in Language conference held at the University of Kent England as a result of the need perceived for the orthodox distinctions made between the various perceived divisions in language study e.g. syntax vs semantics vs pragmatics vs phonology vs morphology to be expanded into a wider concept of linguistic interfaces for example language and music language and politics languages in mutual contact languages in mutual conflict and language and literature Potential contributors at the conference were encouraged to define and explore the

particular interfaces which interested them to see where there was common ground where distinctions were to be made and where grey areas invite further investigation The results were startling contributors responded from America Belgium Brazil Canada France Germany Israel Poland Spain and Switzerland as well as the UK with themes ultimately grouped under three headings which have been roughly retained in this volume Many of the wide range of resultant perspectives are represented here as well as those treated by colleagues prevented at the last moment from attending the conference Categories and Orthodoxies addresses some of the most traditional interfaces whilst Contact and Conflict examines clashes and coalescences between languages languages and politics the mutual interaction of variants of a language and the imposition or choice of a non native language over its native counterparts and Language and Cognition sees language behaviour as partly at least influenced by factors other than those formally identified as strictly linguistic

Features and Interfaces in Romance

Julia Herschensohn, Enrique Mallén, Karen Zagana, 2001-12-31 This volume brings together new research on theoretical Romance Linguistics its intended audience is scholars in the field of formal grammar especially those specializing in Romance languages It represents the latest work on the structure of Romance languages with relevant comparisons to other languages such as English and Basque As the volume's title indicates two related themes recur in these studies the role of grammatical features in sub modules of the grammar and the interaction of sub modules with each other and with external systems at the interfaces The contributions to this volume all framed within current theoretical models explore these and related problems in the analysis of Romance The volume contains studies on morphology phonology syntax and semantics and includes language and subject indices

Phonological Theory John A. Goldsmith, 1999-11-08 This volume provides the

most comprehensive and authoritative collection of the key readings in phonological theory It is designed to complement the outstanding Handbook of Phonological Theory this volume is ideal as a primary text for course use It also represents an unparalleled work of reference for anyone interested in recent developments in linguistic theory

The Morphology and Phonology of Exponence Jochen Trommer, 2012-09-27 Exponence refers to the mapping of morphosyntactic structure to

phonological representations a research area which is not only highly controversial but also approached in fundamentally different ways in theoretical morphology and phonology This volume brings together leading specialists from morphosyntax and morphophonology The authors address common problems questions and solutions in both areas and formulate a coherent research program for exponence which integrates the central insights of the last decades and provides important new challenges for the future The book is aimed at phonologists morphologists and syntacticians of all theoretical

persuasions at graduate level and above

The Phonology of Chichewa Laura J. Downing, Al Mtenje, 2017-06-02 This book

provides thorough descriptive and theory neutral coverage of the full range of phonological phenomena of Chichewa a Malawian Bantu language Bantu languages have played and continue to play an important role as a source of data illustrating core phonological processes such as vowel harmony nasal place assimilation postnasal laryngeal alternations

tonal phenomena such as High tone spread and the OCP prosodic morphology and the phonology syntax interface Chichewa in particular has been a key language in the development of theoretical approaches to these phenomena In this volume Laura Downing and Al Mtenje examine not only these well known features of Chichewa but also less well studied phonological topics such as positional asymmetries in the distribution of segments the phonetics of tone and intonation They survey important recent theoretical approaches to phonological problems such as focus prosody reduplication and vowel harmony where Chichewa data is routinely referred to in the literature The book will serve as a resource for all phonologists interested in these processes regardless of their theoretical background as well as Bantu scholars and linguists working on interface issues

Constraints in Phonological Acquisition René Kager, Joe Pater, Wim Zonneveld, 2004-01-15 This outstanding 2004

volume presents an overview of linguistic research into the acquisition of phonology. Bringing together well known researchers in the field, it focuses on constraints in phonological acquisition as opposed to rules and offers concrete examples of the formalization of phonological development in terms of constraint ranking. The first two chapters situate the research in its broader context with an introduction by the editors providing a brief general tutorial on Optimality Theory. Chapter two serves to highlight the history of constraints in studies of phonological development which predates their current ascent to prominence in phonological theory. The remaining chapters address a number of partially overlapping themes: the study of child production data in terms of constraints; learnability issues; perceptual development and its relation to the development of production; and second language acquisition.

Contemporary Approaches to Romance Linguistics Julie Auger, J. Clancy Clements, Barbara Vance, 2004. This collection of twenty articles selected from the 33rd annual Linguistic Symposium on Romance Languages held at Indiana University in 2003 presents current theoretical approaches to a variety of issues in Romance linguistics. Invited speakers Luigi Burzio and Jose Ignacio Hualde contribute papers on the paradigmatics and syntagmatics of Italian verbal inflection and comparative diachronic Romance intonation respectively. The other papers, whose authors include both well known researchers and younger scholars, represent such areas as French syntax (both synchronic and diachronic), second language acquisition, Spanish, English, Spanish intonation, phonology, syntax, and semantics, Italian semantics, Romanian morphology and syntax, Catalan phonology and morphology, and Galician phonology. Two papers. The volume is rounded out by three explicitly comparative studies: one on proto-Romance phonology, one on microvariation in Romance syntax, and a third addressing syntactic microvariation among varieties of French and French based creoles.

Frameworks represented include Optimality Theory, Minimalism, and Construction Grammar.

Studies on Reduplication Bernhard Hurch, 2011-12-22. For several reasons, mostly inherent to the different developments of generative grammar, an increasing number of publications have dealt with reduplication in the past 20 years. Reduplication lends itself perfectly as a test field for theories that opt for a non-segmental organization of phonology and morphology. As it happens frequently, then, the discussion centers around a rather small set of data for which alternative analyses are offered and which themselves are intended to contribute to the foundation of new theoretical developments. The present volume, which goes back to a conference on reduplication at the University of Graz, Austria, offers a broader approach to reduplication not only from different theoretical viewpoints but especially for its phenomenology. Across theories, a number of highly qualified authors deal with formal and functional perspectives, with typological properties, with semantics, comparative issues, the role of reduplication in language acquisition, the acquisition of reduplicative systems, sign languages, creoles, and pidgins, general grammatical and cognitive principles. The picture is completed by a series of language or language family specific studies, as on Uto-Aztecan, Salish-Tupi, Guaraní, Moroccan and Cairene Arabic, various African languages, Chinese, Turkish, Indo-European languages from India, etc. The overall scope of the conference was to contribute to a new level of discussion of the

phenomenon across theories and across specializations and interests Update on Contributor s addresses PDF
