Prospect Of Liberal Democracy:

A Prospect of Liberal Democracy William S. Livingston, 1979 **A Prospect of Liberal Democracy** William S. Livingston, 1979 **The Prospects for Liberal Nationalism in Post-Leninist States** Cheng Chen, 2010-11-01

Prospects for Green Liberal Democracy Sverker C. Jagers, 2007 Both eco authoritarian and democratic scholars have claimed that a liberal democracy cannot pay due attention to the environment However such claims call for profound analysis Jagers argues that much in the debate on liberal democracy and environmental concern can be more stringently elaborated For instance there has been a tendency to compound philosophical and institutional objections against liberal democracy Often it is unclear what the critical voices actually mean when they speak of liberal democracy In addition the compatibility between specific forms of liberal democracy and sustainable development has not been thoroughly investigated Most studies have been limited to comparing liberal and ecological values or ecological values and liberal institutions To avoid many of these shortcomings this study analyzes the compatibility between sustainable development policies and liberal democracy by combining political theory and resource scenarios based on environmental science **The Prospects of Liberalism**

Timothy Fuller, 1984 **Totalitarianism and the Prospects for World Order** Alexander Shtromas, 2003-01-01 A remarkably prescient thinker Aleksandras Shtromas devoted his life to understanding totalitarianism and political change This posthumous collection of writings edited by Robert Faulkner and Daniel J Mahoney addresses some of the topics that preoccupied Shtromas throughout his life including totalitarian regimes postcommunist transitions the fates of the Baltic states and the nature of political revolutions Democratization in Africa: Challenges and Prospects Gordon

Crawford, Gabrielle Lynch, 2013-09-13 It is two decades since the third wave of democratization began to roll across sub Saharan Africa in the early 1990s This book provides a very timely investigation into the progress and setbacks over that period the challenges that remain and the prospects for future democratization in Africa It commences with an overall assessment of the lack of progress made from 1990 to 2010 exploring positive developments with reasons for caution Based on original research subsequent contributions examine various themes through country case studies inclusive of the routinisation of elections accompanied by democratic rollback and the rise of hybrid regimes the tenacity of presidential powers the dilemmas of power sharing ethnic voting and rise of a violent politics of belonging the role of donors and the ambiguities of democracy promotion Overall the book concludes that steps forward remain greater than reversals and that typically though not universally sub Saharan African countries are more democratic today than in the late 1980s Nonetheless the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights but also socio economic rights and the physical security of African citizens This book was originally published as a special issue of Democratization China's Reforms At 30: Challenges And Prospects Dali L Yang, Litao Zhao, 2009-01-05 This book consists of papers presented at the International Conference on China The Next Decade organized by the East Asian Institute

at the National University of Singapore in 2007 to commemorate the Institute's 10th anniversary. With eight papers covering China's economic, social, and political development, this volume offers a balanced yet in-depth assessment of the challenges facing China in the next decade. Featuring contributions from internationally renowned scholars, this timely volume analyzes key aspects of China's reforms and development, such as the financial reform, international trade, leadership succession, social protests, health care reform, and ethnic relationships. It is suitable for China scholars as well as advanced undergraduate and graduate students interested in China's polity, economy, and society. Confucianism's Prospects Shaun O'Dwyer, 2019-08-01

Challenges descriptions of East Asian societies as Confucian cultures and critically evaluates communitarian Confucian alternatives to liberal democracy. In *Confucianism's Prospects*, Shaun O'Dwyer offers a rare critical engagement with English language scholarship on Confucianism. Against the background of historical and sociological research into the rapid modernization of East Asian societies, O'Dwyer reviews several key Confucian ethical ideas and proposals for East Asian alternatives to liberal democracy that have emerged from this scholarship. He also puts the following question to Confucian scholars: what prospects do those ideas and proposals have in East Asian societies in which liberal democracy and pluralism are well established and individualization and declining fertility are impacting deeply upon family life? In making his case, O'Dwyer draws upon the neglected work of Japanese philosophers and intellectuals who were witnesses to Japan's pioneering East Asian modernization and protagonists in the rise and disastrous wartime fall of its own modernized Confucianism. He contests a sometimes Sinocentric and ahistorical conception of East Asian societies as Confucian societies while also recognizing that Confucian traditions can contribute importantly to global philosophical dialogue and to civic and religious life. This book makes a significant contribution to the field by analyzing a number of claims of modern Confucianism from a critical philosophical perspective. Kiri Paramore, author of *Japanese Confucianism: A Cultural History*. *The Political Prospects of a Sustainability Transformation* Daniel Hausknost, Marit Hammond, 2021-06-14

Half a century ago, many democratic states started to respond to environmental pressures that had arisen in the wake of rapid industrialization. They set up environmental ministries and agencies and issued legislation to control the pollution of air and water and to manage industrial processes, wastes, and toxic substances. This was the birth of the environmental state. With planetary ecological challenges like climate change spiraling out of control and dwarfing the environmental state's classical tasks of environmental management, new questions about the transformative capacities of the state are becoming acute today. How large is the state's capability to transform enhanced industrial societies into sustainable post-carbon societies? Do its new environmental functions empower the state to prioritise ecological goals over economic growth? Can the state's environmental management capabilities be radicalised to turn it into a sustainability state? Can democracies be enhanced to enlarge the state's transformative capacities? *The Political Prospects of a Sustainability Transformation: Moving Beyond the Environmental State* explores these and other questions from a variety of theoretical and empirical angles, covering the fields of democratic

theory theories of the state political economy political sociology rhetoric and political philosophy The chapters in this book were originally published as a special issue of the journal Environmental Politics

National Identity and Democratic Prospects in Socialist China Edward Friedman, 2016-09-16 This analysis of every facet of a national identity makes it less likely that the next great explosion in the Communist world and its consequences will come as a surprise It investigates tendencies in China that might lead it down the same path as Russia and Yugoslavia

Climate Crisis and the Democratic Prospect Frank Fischer, 2017-05-26 Can contemporary democratic governments tackle climate crisis Some argue that democracy has to be a central part of a strategy to deal with climate change Others argue that experience shows it not to be up to the challenge in the time frame available that it will require a stronger hand even a form of eco authoritarianism A question that does not lend itself to an easy assessment this volume seeks to out and assess the competing answers While the book supports the case for environmental democracy it argues that establishing and sustaining democratic practices will be difficult during the global climate turmoil ahead especially in the face of state of emergencies This inquiry undertakes a search for an appropriate political ecological strategy for preserving a measure of democratic governance during hard times Without ignoring the global dimensions of the crisis the analysis finds an alternative path in the theory and practices participatory environmental governance embodied in a growing relocalization movement and global eco localism generally Although such movements largely operate under the radar of the social sciences the media and the political realm generally these vibrant socio ecological movements not only speak to the crisis ahead but are already well established and thriving on the ground including ecovillages eco communes eco neighborhoods and local transition initiatives With the help of these ideas and projects the task is to influence the discourse of environmental political theory in ways that can be of assistance to those who will face climate crisis in its full magnitude

Prospects for a Common Morality Gene Outka, John P. Reeder, 1992-11-17 This volume centers on debates about how far moral judgments bind across traditions and epochs Nowadays such debates appear especially volatile both in popular culture and intellectual discourse although there is increasing agreement that the moral and political criteria invoked in human rights documents possess cross cultural force many modern and postmodern developments erode confidence in moral appeals that go beyond a local consensus or apply outside a particular community Often the point of departure for discussion is the Enlightenment paradigm of a common morality in which it is assumed that certain unchanging beliefs inhere in the structure of human reason Whereas some thinkers continue to defend this paradigm others modify it in diverse ways without abandoning entirely the attempt to address a universal audience and still others jettison virtually all of its distinguishing features Exhibiting a range of positions Western participants take in these debates this volume seeks to advance the substance of the debates themselves without prejudging the outcome Rival assessments of the Enlightenment paradigm are offered from various philosophical and theological points of view In addition to the editors the contributors include Robert Merrihew Adams Annette C Baier Alan

Donagan Margaret A Farley Alan Gewirth David Little Richard Rorty Jeffrey Stout and Lee H Yearley **Economic Integration Among D-8 Muslim Countries: Prospects And Challenges** Ahmed M Khalid,R James Ferguson,M Niaz Asadullah,2023-03-16 The D 8 Developing Eight organisation was officially formed in 1997 and has Bangladesh Egypt Indonesia Iran Malaysia Nigeria Pakistan and Turkey as full members The D 8 economies encompass nearly 62% of the Muslim population or about 1.17 billion people globally The economic cultural social political and geographical diversity that exists amongst the D 8 member countries differs radically from other Muslim or regional blocks Furthermore D 8 member countries are developing economies that do not solely rely on oil ancient civilizations or roles as historical powerhouses but their populations aspire to be better educated scientifically more advanced have higher incomes and improved human rights It is imperative to study the implications of these developments for cultural identity and life quality This book studies the contemporary socio economic developments and challenges faced by D 8 countries It explores questions on the socio economic and political formation sustainability economic participation and the vitality of the D 8 member countries It deepens our understanding of recent global economic systems and governance and suggests areas for future research and publications *Prospects for Democratic Consolidation in East-Central Europe* Geoffrey Pridham,Attila Ágh,2001 *Picturing home* examines the depiction of domestic life in British feature films made and released in the 1940s It explores how pictorial representations of home onscreen in this period re imagined modes of address that had been used during the interwar years to promote ideas about domestic modernity *Picturing home* provides a close analysis of domestic life as constructed in eight films contextualising them in relation to a broader offscreen culture surrounding the suburban home including magazines advertisements furniture catalogues and displays at the Daily Mail Ideal Home Exhibition In doing so it offers a new reading of British 1940s films which demonstrates how they trod a delicate path balancing prewar and postwar traditional and modern private and public concerns **In Defence of War** Nigel Biggar,2013-09-12 Against the domination of moral deliberation by rights talk *In Defence of War* asserts that belligerency can be morally justified even while it is tragic and morally flawed Recovering the early Christian tradition of just war thinking Nigel Biggar argues in favour of aggressive war in punishment of grave injustice **Prospects for Constitutionalism in Post-Communist Countries** Levent Gönenç,2002-06-18 The last decade of the 20th century saw radical changes in Eastern Europe and the former USSR Most of these countries made a transition from totalitarianism or authoritarianism to democracy and from central planning to a market economy Adding to the latter a number of national entities gained their independence after the disintegration of the federative states of the USSR Yugoslavia and Czechoslovakia Many recent studies have focused on these double in some cases triple transitions and scholars from different fields analyzed the so called 1989 Revolution from different perspectives Rather less scholarly attention has been paid to the future of post communist constitutions and prospects for constitutionalism in these countries The main questions dealt with throughout this study can be formulated as follows Will

liberal democratic constitutionalism take root in these countries Will new constitutions in Eastern Europe and the former USSR perish or survive This study also aims at contributing to the construction of a general constitutional theory by studying the causes and dynamics of constitutional change in general Such constitutional change is not only on the East European but also on the West European agenda The purpose of this study is not to introduce a general theory about constitutional in stability but studying post communist constitutions will help us to understand the causes and dynamics of constitutional change from a broader perspective **Edward Said on the Prospects of Peace in Palestine and Israel J.**

LeBlanc,2013-11-12 John Randolph LeBlanc examines the political oeuvre of critic and activist Edward Said and finds that Said preferred reconciliation to segregation in Palestine Israel LeBlanc argues that Said s criticism speaks to the importance of negotiating the troubling proximate and unsettling presence of our most perplexing others *Prospects for an Ethics of Architecture* William M. Taylor,Michael P. Levine,2012-12-06 Bringing together the reflections of an architectural theorist and a philosopher this book encourages philosophers and architects scholars and designers alike to reconsider what they do as well as what they can do in the face of challenging times It does so by exploring the notion that architecture and design can and possibly should in their own right make for a distinctive form of ethical investigation The book is less concerned with absolutist understandings of the two components of ethics a theory of the good and a theory of the right than with remaining open to multiple relations between ideas about the built environment design practices and the plurality of kinds of human subjects inhabitants individuals and communities accommodated by buildings and urban spaces The built environment contributes to the inculcation of all sorts of values good and bad Thus this book aims to change the way people commonly think about ethics not only in relation to the built environment but to themselves their ways of thinking and modes of behaviour **Challenges of Globalization and Prospects for an Inter-civilizational World Order** Ino Rossi,2020-11-24

This is a must read volume on globalization in which some of the foremost scholars in the field discuss the latest issues Truly providing a global perspective it includes authorship and discussions from the Global North and South and covers the major facets of globalization cultural economic ecological and political It discusses the historical developments in governance preceding globalization the diverse theoretical and methodological approaches to globalization and analyzes underdevelopment anti globalization movements global poverty global inequality and the debates on international trade versus protectionism Finally the volume looks to the future and provides prospects for inter civilizational understanding rapprochement and global cooperation This will be of great interest to academics and students of sociology social anthropology political science and international relations economics social policy social history as well as to policy makers
