Prospects Fiona Wallace, 2003 Prospects Pre-Int Wb Slovene Macmillan Education, Limited, 1999-05 **Microbial Roles in Caves** Valme Jurado, Diana Eleanor Northup, Cesareo Saiz-Jimenez, 2024-07-17 Caves are dark underground hollow spaces with relatively constant temperature high humidity and limited nutrients Many caves are associated with karst topography which is formed by the dissolution of soluble bedrock such as limestone dolomite and gypsum in areas where groundwaters are undersaturated with respect to the minerals in the host rock Karst landforms spread widely accounting for approximately 20% of the earth's dry ice free surface Ford and Williams 2007 As a typical feature of subsurface landscape karst caves develop globally with over 50 000 distributed in the United States Barton and Jurado 2007 China also has a large contiguous karst terrain and the Yunnan Guizhou plateau in the southwest developed most karst caves among which the longest cave exceeds 138 km Zhang and Zhu 2012 Many caves are relatively shallow and form near the water table in karst terranes although some caves develop by deep seated hypogenic process at substantial depths and by process other than dissolution such as lava flows Caves are oligotrophic ecosystems with less than 2 mg of total organic carbon per liter yet host flourishing microbial groups Figure 1A with an average number of 106 microbial cells per gram of cave rock Barton and Jurado 2007 The study revealed a high diversity within Bacteria domain and Proteobacteria and Actinobacteria were abundant in oligotrophic cave samples of air rock sediment and water Chloroflexi Planctomycetes Bacteroidetes Firmicutes Acidobacteria Nitrospirae Gemmatimonadetes and Verrucomicrobia also accounted for large proportions of the total microbial community in caves Wu et al 2015 Zhu et al 2019 In some organic cave samples such as biofilms in sulfur cave bat guanos spiders webs and earthworm castings Mycobacterium was prevalently detected Modra et al 2017 Sarbu et al 2018 Hubelova et al 2021 Pavlik et al 2021 Over 500 genera of fungi such as Penicillium Aspergillus and Mortierella have been reported in caves Vanderwolf et al 2013 and new fungal species were identified from cave air rock sediment and water samples Zhang et al 2017 2021 These microbial communities contain novel diversity and promote important biogeochemical processes With no sunlight microorganisms in cave environment cannot perform photosynthesis and are intensively involved in the biogeochemical cycles of carbon nitrogen sulfur and metals such as Fe and Mn to offset the lack of exogenous nutrients and energy *Redefining EU Membership* ,2024-09-27 Redefining EU Membership examines the issue of Membership within the European Union EU today by focusing on differentiation in and outside the EU The Treaty on European Union unequivocally declares that the contracting parties are the Member States of the EU However a closer examination casts some doubt of the unitary status of Member States or at least suggests that the concept requires nuancing Whilst diversity and to some extent differentiation have been part and parcel of the European integration process since its inception Redefining EU Membership proposes that considering several developments a new reflection on membership within the EU and on differentiation in and outside the EU is required The volume's contributions are organized around four

aspects of the tensions faced by the concept of a unitary and formal EU membership first an examination of key policy areas which have already witnessed various forms of differentiated integration second an analysis of special statuses within the EU third important examples of non Member States in which EU law is applied with and without their participation in the EU s decision making process and fourth the situation of states under accession or secession procedures which obliges them to accept EU norms and policies even prior to after formal membership These analyses are complemented by a reflection on the concept of membership in itself In a context in which EU enlargement appears likely the provided analysis reflects on the need to expand and introduce several kinds of membership to the EU in the future **European Union** Vasileios

Vlachos,Aristidis Bitzenis,2019-06-14 This book discusses the unprecedented impact of the financial and economic crisis on government finances and economic performance across Europe which has raised skepticism on the ability of the current course of integration to promote prosperity Correspondingly the European Union is about to contract for the first time in its history This timely book covers the economic issues that challenge the future of integration in Europe The chapters are authored by international experts and examine current and emerging challenges and trends for the European Union economic convergence monetary policy competition law transport policy the informal sector employment recovery and enlargement Four chapters focus on Greece which has been the greatest challenge faced by European institutions in the context of the sovereign debt crisis and one chapter discusses the possible costs of Brexit The reader will benefit from understanding the key economic challenges which if effectively addressed will lead to deepening the union or in contrast to a multi speed Europe
