**Perspectives on Political Communication in Africa** Bruce Mutsaers, Beschara Karam, 2018-02-27 This edited collection is a cutting edge volume that reframes political communication from an African perspective Focusing on sub-Saharan Africa and occasionally drawing comparisons with other regions of the world this book critically addresses the development of the field focusing on the current opportunities and challenges within the African context By using a wide variety of case studies that include Mozambique Zambia Rwanda Zimbabwe Ghana Kenya Uganda South Africa Ivory Coast

and Nigeria the collection gives space to previously understudied regions of sub Saharan Africa and challenges the over reliance of western scholarship on political communication on the continent      *Democratization* Dirk

Berg-Schlosser,2007-08-22 Problems of democratization its successes failures and future prospects belong to the most pressing concerns of our times Empirical democratic theory has received many new impulses since the last wave of democratization in Latin America Eastern Europe Africa and Southeast and East Asia In this volume the state of the art in this respect is discussed by leading international experts in this field including Laurence Whitehead Gerardo Munck Axel Hadenius and Juan Linz From the contents Some significant recent developments in the field of Democratization Concepts measurements and sub types in Democratization Research Agendas findings challenges Successes and failures of the new democracies Some thoughts on the victory and future of democracy      *Politics* Virginie Mamadouh,2017-05-15 Depending

on the breadth or narrowness of the understanding of politics and the political politics in human geography is defined as either the operation of power in all social relations or the workings of power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale social movements and electoral participation and identities and citizenship      *Conflict Sociology* Randall Collins,Stephen K. Sanderson,2015-12-03 This new

edition is a substantial abridgment and update of Randall Collins s 1975 classic Conflict Sociology The first edition represented the most powerful and comprehensive statement of conflict theory in its time Here Sanderson has retained the core chapters and added discussions on Collins s and others work in recent years An afterword summarizes Collins s latest forays into microsociological theorizing and attempts to demonstrate how his newer microsociology and older macrosociology are connected      *Political Mobilizations and Democratization in Sub-Saharan Africa* Wolfgang Stuppert,2019-06-14 This

book explores why democratization processes in Sub Saharan Africa have made so little progress despite more than two decades of multi party politics on the subcontinent By applying multiple linear regression analyses to a new data set on multi party elections in Sub Saharan Africa the study investigates the relationship between political mobilizations and electoral competitiveness It finds that the more societal groups engage in political mobilizations such as protests and strikes the more competitive elections become Based on these results the author argues for a change in the policies of international democracy assistance programs The study s findings suggest that efforts to promote democracy would likely be more successful if international donors focused their support on organizations that have active constituencies and are willing to use their mobilization capacity to address ruling elites with political or socio economic grievances      **Social Security in**

**Together?** Bertelsmann Stiftung, 2017-12-11 Social cohesion has become an important public goal in many countries across the globe not only in the Western hemisphere but also in Asia Despite the growing political and academic interest in the concept there is no generally accepted definition of social cohesion As a result empirical insights are lacking Against this backdrop the Bertelsmann Stiftung has initiated the Social Cohesion Radar which now for the first time presents empirical findings on South Southeast and East Asia The study provides an analysis and review of social cohesion in 22 Asian countries in a comparative perspective It presents a valid and reliable measurement of current and past levels of social cohesion and explores its most important determinants and outcomes As an extension of the Social Cohesion Radar series the study will be of interest and value to policy makers academics think tanks and civil society organizations **Cosmopolitan**

**Communications** Pippa Norris, Ronald Inglehart, 2009-08-31 Societies around the world have experienced a flood of information from diverse channels originating beyond local communities and even national borders transmitted through the rapid expansion of cosmopolitan communications For more than half a century conventional interpretations Norris and Inglehart argue have commonly exaggerated the potential threats arising from this process A series of firewalls protect national cultures This book develops a new theoretical framework for understanding cosmopolitan communications and uses it to identify the conditions under which global communications are most likely to endanger cultural diversity The authors analyze empirical evidence from both the societal level and the individual level examining the outlook and beliefs of people in a wide range of societies The study draws on evidence from the World Values Survey covering 90 societies in all major regions worldwide from 1981 to 2007 The conclusion considers the implications of their findings for cultural policies

**Democratization** Laurence Whitehead, 2002-07-04 Democratization has swept the globe over the past generation and analysts and policy makers have been struggling to keep up Bookshelves have been filled with case studies and assessments of this kaleidoscope of experiences and a related scholarly community has developed seeking to systematize all this material in accordance with well defined schemas and causal models But experience keeps wrong footing the country analysts so in this fresh interpretation the author goes back to foundational issues He argues that democratization is best understood as a complex long term dynamic and open ended process extending over generations Standard models of causal explanation need to be supplemented by more interpretative approaches Basic questions of citizen security the nature of public accountability and the role of money as a source of political power need reconsideration The delicate balance between monetary authority

and democratic consent is also examined in the light of the financial crises that have afflicted so many new democracies This book proposes a range of new perspectives on the complex linkages between democratization and state formation on the logic of paired comparisons and comparisons between large regions of the world and on the relationship between democratic ideals and really existing democratic outcomes It aims to equip those caught up in democratization and democracy promotion with a more realistic understanding of the tensions and turbulence involved

*Political Turbulence* Helen Margetts, Peter John, Scott Hale, Taha Yasserli, 2017-09-05 How social media is giving rise to a chaotic new form of politics As people spend increasing proportions of their daily lives using social media such as Twitter and Facebook they are being invited to support myriad political causes by sharing liking endorsing or downloading Chain reactions caused by these tiny acts of participation form a growing part of collective action today from neighborhood campaigns to global political movements Political Turbulence reveals that in fact most attempts at collective action online do not succeed but some give rise to huge mobilizations even revolutions Drawing on large scale data generated from the Internet and real world events this book shows how mobilizations that succeed are unpredictable unstable and often unsustainable To better understand this unruly new force in the political world the authors use experiments that test how social media influence citizens deciding whether or not to participate They show how different personality types react to social influences and identify which types of people are willing to participate at an early stage in a mobilization when there are few supporters or signals of viability The authors argue that pluralism is the model of democracy that is emerging in the social media age not the ordered organized vision of early pluralists but a chaotic turbulent form of politics This book demonstrates how data science and experimentation with social data can provide a methodological toolkit for understanding shaping and perhaps even predicting the outcomes of this democratic turbulence

*Migration, Security, and Citizenship in the Middle East* P. Seeberg, Z. Eyadat, 2013-08-13 This volume addresses new tendencies related to migration from a Middle Eastern and Mediterranean perspective and with an emphasis on security and citizenship Contributors aim not only to intervene in scholarly debates surrounding citizenship and migration but also to contribute to policy oriented discussions related to migration
