## **Protean Self:**

The Protean Self Robert Jay Lifton, 1999-11 We are becoming fluid and many sided Without quite realizing it we have been evolving a sense of self appropriate to the restlessness and flux of our time This mode of being differs radically from that of the past and enables us to engage in continuous exploration and personal experiment I have named it the protean self after Proteus the Greek sea god of many forms from The Protean Self Robert J. Lifton, 1995-01-04

Proteanism or the protean self describes a psychological phenomenon integral to our times We live in a world marked by breathtaking historical change and instantaneous global communication Our lives seem utterly unpredictable there are few absolutes Rather than collapsing under these threats and pulls Robert Jay Lifton tells us the self turns out to be remarkably resilient Like the Greek god Proteus who was able to change shape in response to crisis we create new psychological combinations immersing ourselves in fresh and surprising endeavors over our lifetimes **The Other Self** Dēmētrēs

Tziovas, 2003-01-01 The Other Self is the first English language book length literary analysis of some of the most celebrated Greek novels of the nineteenth and twentieth centuries A must read for anyone interested in Greek literature and culture it offers both a solid introduction to modern Greek literature and close reading of individual texts Author Dimitris Tziovas focuses on the issues of identity autobiography and social determinism raised in these texts providing a fresh perspective and suggesting new ways of exploring forms of engagement between self and society Greek narratives of self Tziovas suggests are not naked and transparent presentations of existence but articulations of the relationship between the individual and the social world they are negotiations of the past through the otherness of the present A compelling demonstration of the richness and complexity of modern Greek fiction The Other Self provides exciting and challenging interpretations of Greek literature and Greek society **The Construction of the Self, Second Edition** Susan Harter, 2015-05-26 An important

work from a leading scholar this book explores self development from early childhood to adulthood Susan Harter traces the normative stages that define the emergence of many self processes including self esteem She also addresses individual differences and societal influences on self development Presenting pioneering empirical research Harter shows that increasingly mature features of the self have both benefits and liabilities for psychological adjustment The book highlights the causes and consequences of different types of self representations including those that are unrealistically negative or positive New to This Edition Reflects more than a decade of conceptual empirical and methodological advances Provides a broader sociocultural framework for understanding self development Chapters on emerging adulthood self esteem and physical appearance self processes in the classroom motivation cross cultural issues and the quest for authenticity Expanded chapters on childhood adolescence and the self conscious emotions Increased attention to the liabilities of our contemporary preoccupation with the self Trauma and Self Charles B. Strozier, Michael Flynn, 1996 This remarkable collection of original essays written by prominent scholars recognized for their achievements in a wide range of disciplines defines trauma

as a disruption in the fragile process of symbolization or the human capacity to imbue life with meaning by representing the self's immortality. The contributors analyze the multiple meanings and deeper significance of trauma whether of shell shocked war veterans or victims of sexual abuse and they discuss its manifestations both subtle and obvious in human behavior and memory. Organized as an honorary volume to Robert Jay Lifton who identified trauma as the core psychological issue of the postmodern world, this book demonstrates how trauma and other fundamental breaks in human continuity inform psychiatric, historical, religious, literary, political, cultural, and scientific interpretations of the self.

**Culture, Self, and Meaning** Victor de Munck, 2000-07-14 In this highly informative and interdisciplinary exploration of the relationship between culture and psyche, de Munck provides a substantive introduction to pertinent issues, theory, and empirical studies that lie at the junction of psychology, sociology, and anthropology. This engagingly written text reviews various approaches to such questions as: Where is culture located, inside or outside the head? What is the self, is there a single unified self or do many selves inhabit the body? Do institutional structures form to meet our needs, or are our everyday lives simply a result of institutional structures? What is meaning and how do we study it? de Munck's examination of these different approaches illuminates the importance of the topic, expands readers' understanding of human life, and points to psychology's relevance in affecting public policies.

**Self and Identity : Fundamental Issues** Richard D. Ashmore, Professor of Psychology, Rutgers University; Lee Jussim, Associate Professor of Psychology, Rutgers University, 1997-04-17 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline. Recently, psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self. This volume presents a critical analysis of fundamental issues in the scientific study of self and identity. These chapters go much farther than merely taking stock of recent scientific progress. World-class social scientists from psychology, sociology, and anthropology present new and contrasting perspectives on these fundamental issues. Topics include the personal versus social nature of self and identity, multiplicity of selves versus unity of identity, and the societal, cultural, and historical formation and expression of selves. These creative contributions provide new insights into the major issues involved in understanding self and identity. As the first volume in the Rutgers Series on Self and Social Identity, the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity. Scholars and advanced students in the social sciences will find this highly informative and provocative reading. Dr. Richard D. Ashmore is a professor and Dr. Lee Jussim is an associate professor in the Department of Psychology at Rutgers University, New Brunswick, New Jersey.

**Living With(in) Your Ends** Kevin Michael Stevenson, 2023-09-15 Did you ever wonder why you see the world around you the way that you do? Ever wondered why you might see everything in your world as a means to an end? Why should you bother following the dictum to live within your means when you haven't even considered living with or within your ends? You might ask yourself what is implied here by ends and by means, and why does the latter always seem to come before

the former After all how do we end anything without a means for doing so Living With in Your Ends provides a crutch for you to lean on while you ponder the means and ends within your life and the world around you It guides you on how to maintain your true identity without getting sucked into world of means where superficiality prospers Investigating human existence through a lens that values the present moment and which provides for practical consequences Kevin M Stevenson PhD provides an exploration into the deeper realms of perception and their relationships with time and identity Living With in Your Ends not only provides a conceptual map to follow for leading an authentic life it also considers some of the historical and philosophical notions that have blessed and plagued human existence Living With in Your Ends will provide you with a framework for healthy reflection and increased awareness of the intersections between yourself and the world

Halliwell,2019-07-23 First published in 1999 this volume follows the work of five influential figures in twentieth century transatlantic intellectual history The work forms the basis for this engaging interdisciplinary study of romantic science In this book Martin Halliwell constructs a tradition of romantic science by indicating points of theoretical intersection in the thought of William James American philosopher Otto Rank Austrian psychoanalyst Erik Erikson Danish German psychologist and Oliver Sacks British neurologist Beginning with the ferment of intellectual activity in late eighteenth century German Romanticism Halliwell argues that only with William James theory of pragmatism early in the twentieth century did romantic science become a viable counter tradition to strictly empirical science Stimulated by recent debates over rival models of consciousness and renewed interest in theories of the self Halliwell reveals that in their challenge to Freud s adoption of ideas from nineteenth century natural science these thinkers have enlarged the possibilities of romantic science for bridging

the perceived gulf between the arts and sciences      **50 Self-Help Classics** Tom Butler-Bowdon,2010-12-07 Discover the proven classics of personal transformation and the books that have served as catalysts of change for millions      *Self and Identity* Richard D. Peter Gronn provides a model of the process by which leaders characters are shaped for leadership in different educational contexts He focuses on the attributes of the individual and the formative circumstances which have shaped their perceptions and understandings      **The Making of Anthropology** Jacob Pandian, Susan Parman, 2004 This book offers an interpretation of anthropology as a discourse that contrasts the western self and the non western other and shows that the organizing principle of this discourse was the Judeo Christian episteme of the Other in Us that the Christian Church Fathers developed to define why the pagan others were endowed with negative ungodly attributes of humanity It is pointed out that the anthropological application of this episteme to represent and explain the colonized non western others resulted in the emergence of eurocentric hierarchical models of humanity and that although these models of humanity were largely replaced by pluralistic models in the late 20 century anthropology has continued to be linked with the episteme of the other in us Dust jacket      **Contemporary Introduction to Sociology** Jeffrey C. Alexander, Kenneth Thompson, Laura Desfor

idioms and interests of contemporary American life and global social issues The second edition continues to invite students to reflect upon their lives within the context of the combustible leap from modern to postmodern life The authors show how culture is central to understanding many world problems as they challenge readers to confront the risks and potentialities of a postmodern era in which the futures of both the physical and social environment seem uncertain As culture rapidly changes in the 21st century the authors have broadened their analysis to cover developments in social media and new data on gender and transgender issues
