## **Protect The Earth:**

Is It Our Job to Protect the Environment? David Anthony, 2018-07-15 Many people believe humans have a responsibility to take care of the planet. However, other people believe it isn't their job to protect the environment. Readers discover the facts behind these two opposing points of view and how those points of view determine people's actions. Along the way, they examine their own opinion on this topic, which aligns with common science curricula, and learn to use facts to back up their opinion. Fact boxes, graphic organizers, and vibrant photographs come together to create an eye-catching design that enhances this exploration of critical thinking skills.

Protecting the Planet Louise Spilsbury, 2020-07-21 We need to look after our planet because our planet looks after us. If we all make small changes to protect the planet, we will see big results. Protecting the Planet offers straightforward information on plastic waste, pollution, and global warming and shares the small changes we can make to care for the earth. Climate change caused by global warming is a common topic in the news, and this book helps kids address their environmental anxiety. Protecting the Planet explores the causes and effects of air pollution and littering and explains what global warming is. It also shares ways that kids and the adults in their lives can look after the planet, such as recycling, reusing items instead of throwing them away, and using less fuel and electricity. When our planet is clean and healthy, the people, plants, and animals on it are clean and healthy, too. A glossary and additional resources can be found at the back of the book.

**Protect Earth Today Starts With You** Nam H. Nguyen, 2021-04-23 The goal is to fill your mind with a head start to knowing the birth of a planet. Earth. The Earth grew from a cloud of dust and rocks surrounding the young Sun, and the Moon probably formed soon after when a planet-sized chunk of rock smashed into the Earth and threw up a huge cloud of debris. Then the first human ancestors appeared on Earth through the present day. We are facing several problems, and many of these seem to be worsening with time, bringing us into a time of a true environmental crisis. There is much evidence and facts that support our climate change. We humans are causing life on Earth to vanish. As a result, humans have directly altered at least 75% of Earth's land, mainly for growing plants and keeping animals. The History of the Earth: The history of life on Earth. Timeline. Earth. Protecting Earth's Land Valerie Rapp, 2015-08-01 Nearly all living things depend on Earth's land and its resources to survive. But did you know that people do many things that hurt the land? The damage sometimes destroys forests, which are home to diverse ecosystems and are important in producing oxygen and water. And in many parts of the world, damaged land produces less food, less wood, and less of many things that people need. We must join together in the quest to find better ways to use and take care of Earth's land. With engaging text and eye-catching images, plus a special Going Green section, this book tells you all about Earth's land.
