Congress. House. Committee on Armed Services. Special Oversight Panel on Terrorism, 2001 **Protecting the Homeland 2006/2007** Michael d'Arcy, Michael E. O'Hanlon, Peter R. Orszag, 2007-03-01 Immediately after September 11 the Brookings Institution began a comprehensive multidisciplinary project focused on the key policy challenge of these dangerous times assessing and improving homeland defense That intense effort produced *Protecting the American Homeland* and it continues in this important new book In *Protecting the Homeland 2006 2007* Brookings foreign policy experts analyze current homeland security concerns and the adequacy or inadequacy of current policies designed to address them The authors present both the big picture and the smaller components of homeland security policy that make up the whole They make specific recommendations on intelligence reform science and technology policy and the protection of critical infrastructure within the United States They also look ahead to consider what dangers we should anticipate and plan for recommending policies that will work to that end One of the strands running through *Protecting the Homeland 2006 2007* is the need to stitch the seams in our homeland security blanket through greater integration and coordination The authors emphasize that the U S federal government must work together with key partners who have been insufficiently integrated into American homeland security activities to date These actors include foreign governments state and local government and the private sector and the coordination must occur in several different areas e g border protection finance technology intelligence The U S government should not indeed it cannot do it alone By its very nature homeland security is a problem that defies the usual bureaucratic boundaries Effective homeland security policy demands intense collaboration on new issues and between organizations that have not traditionally needed each other This book is of interest and importance to journalists analysts policymakers scholars and citizens concerned with protecting their homeland against terrorism and r *Protecting the American Homeland* Michael E. O'Hanlon, Peter R. Orszag, Ivo H. Daalder, 2011-12-01 The September 11 attacks forcefully brought home the need to better protect the U S homeland But how can this be accomplished most effectively Here a team of Brookings scholars

offers a four tier plan to guide and bolster the efforts under way by the Bush administration and Congress There has been some progress in making our homeland more secure But the authors are concerned that the Bush administration may focus too narrowly on preventing attacks like those of the recent past and believe a broader and more structured approach to ensuring homeland security is needed Given the vulnerability of our open society the authors recommend four clear lines of direction The first and last have received a good deal of attention from the Bush administration though not yet enough for the other two a great deal remains to be done Perimeter defense at the border to prevent entry by potential perpetrators and the weapons and hazardous materials they may use Prevention by detecting possible terrorists within the United States and securing dangerous materials they might obtain here Identification and defense of key sites within the county population centers critical economic assets and infrastructure and locations of key political or symbolic importance Consequence management to give those directly involved in responding to an attack that may nevertheless occur the tools necessary to quickly identify and attack and limit its damage Included are specific recommendations on how much more to spend on homeland security how much of the cost should be borne by the private sector and how to structure the federal government to make the responsible agencies more efficient in addressing security concerns Specifically the authors believe that annual federal spending on homeland security may need to grow to about 45 billion relative to a 2001 level of less than 20 billion and a Bush administration proposed budget for 2003 of 38 billion They also Countering Radicalisation and Violent Extremism Among Youth to Prevent Terrorism M. Lombardi,E. Ragab,V. Chin,2014-12-09 Although violent extremism is not a new phenomenon it is increasingly recognized as a major challenge of our times The recruitment of foreign fighters by extremist organizations and its potential impact on public safety in the countries from which they come is also emerging as a complex issue at the forefront of international preoccupations This book presents the proceedings of the three day NATO Advanced Research Workshop Countering Violent Extremism Among Youth to Prevent Terrorism held in Milan Italy in June 2014 The best way to respond to violent extremism in general and the radicalization of disaffected youth in particular is far from clear but the stakes are so high and the potential threat to countries worldwide so great that inaction is not an option The goal of the workshop was to enhance the capacity of policymakers and practitioners to design strategies that will achieve verifiable human rights based outcomes to counter violent extremism Subjects covered in the 19 papers which go to make up this book include the causes or drivers of violent extremism the factors which facilitate the recruitment of youth by violent extremist groups the risk of growing Islamophobia in some Western and Central European countries and proactive measures to counter the radicalization of youth The book will be of interest to all those involved in policy development prevention programs de radicalization programs or research aimed at countering violent extremism and the radicalization of young people **Outsmarting the Terrorists** Ronald V. Clarke,2006-09-30 Given that the war on terror is currently being fought the way crime typically is after the fact this country cannot protect its citizens from future terrorist events solely in this way

Instead measures must be taken to actually stop terrorists before they can attack Here the authors argue that government anti terrorism policy must pay much more attention to reducing opportunities for terrorist attacks by protecting vulnerable targets controlling the tools and weapons used by terrorists and removing the conditions of everyday life that make these attacks possible While some of this work is being done on an ad hoc basis there are no recognized methods to guide the work there is limited experience on which to draw and the government has no trained professionals to oversee the work In this book the authors address these deficiencies and lay out a systematic approach for reducing opportunities for terrorism The current take them out mindset may be the main reason why reducing opportunities for terrorism has been so neglected by governments but another important reason is that the task seems so overwhelmingly difficult How can we possibly protect every vulnerable target or person How can we control all the everyday tools that terrorists must use in carrying out their attacks How can we control their weapons when we cannot even keep guns out the hands of ordinary criminals In this book the authors show that these tasks are indeed manageable They take readers through the methods for preventing terrorism and the policies that will assist in this important work They show that in order to protect the country from terrorists security forces must do what the terrorists do identify vulnerable targets analyze their specific weaknesses consider the tools and weapons needed to attack and assess access to the targets Once these steps are taken security agencies can then provide appropriate protection limit accessibility anticipate the forces needed to combat a potential attack and plan carefully for an attack if it does occur By outsmarting the terrorists security forces undertake the same analysis of vulnerabilities and opportunities that terrorists themselves undertake in planning their operations and can more effectively defeat them before they strike This books shows how this approach works and can succeed

International Law and the Use of Force against Terrorism Shadi Adnan Alshdaifat,2017-01-06

As shown in the case of Attila the Hun and his thirst for power property and personal prestige nation states throughout the world particularly in Asia and Europe have since ancient times been vulnerable to invasion by other nation states and bands of looters from outside their borders Terrorism s progress into the modern day has caused extreme concern among members of the international community who now accept that it is like a cancer that refuses to localize itself within any single organ of the body but seeks to spread its lethality throughout even if that means destroying itself along with the host The fight against terrorism is long and complex but the end is known in advance Terrorists are defending a lost cause and their defeat is inevitable and democracy freedom and diplomacy will triumph
