uphold this standard and make violators accountable While he acknowledges that steps are being taken in the right direction he maintains that there is still much to be done He presents a bold proposal one that requires substantial changes in the international system in the politics of major governments and in the relations between states He proposes a three phase strategy aimed at monitoring conditions worldwide to detect impending crises alert the international community to make a timely intervention and where preventive measures fail to mobilize collective international action to remedy or at least alleviate the situation

Protecting the Displaced Sara Ellen Davies, Luke Glanville, 2010 This edited collection has sought contributions from some of the foremost scholars of refugee and Internally Displaced Persons IDP studies to engage with the conceptual and practical difficulties entailed in realising how the Responsibility to Protect R2P can be fulfilled by states and the international community to protect vulnerable persons Contributors to this book were given one theme to consider based on their experience and knowledge how R2P may be aligned with the protection of the displaced Contributions explore the history and progress so far in aligning R2P with refugee and IDP protection as well as examining the conceptual and practical issues that arise when attempting to expand R2P from words into deeds

The Responsibility to Protect Gareth Evans, 2009-08-01 Never again the world has vowed time and again since the Holocaust Yet genocide ethnic cleansing and other mass atrocity crimes continue to shock our consciences from the killing fields of Cambodia to the machetes of Rwanda to the agony of Darfur Gareth Evans has grappled with these issues firsthand As Australian foreign minister he was a key broker of the United Nations peace plan for Cambodia As president of the International Crisis Group he now works on the prevention and resolution of scores of conflicts and crises worldwide The primary architect of and leading authority on the Responsibility to Protect R2P he shows here how this new international norm can once and for all prevent a return to the killing fields The Responsibility to Protect captures a simple and powerful idea The primary responsibility for protecting its own people from mass atrocity crimes lies with the state itself State sovereignty implies responsibility not a license to kill But when a state is unwilling or unable to halt or avert such crimes the wider international community then has a collective responsibility to take whatever action is necessary R2P emphasizes preventive action above all That includes assistance for states struggling to contain potential crises and for effective rebuilding after a crisis or conflict to tackle its underlying causes R2P's primary tools are persuasion and support not military or other coercion But sometimes it is right to fight faced with another Rwanda the world cannot just stand by R2P was unanimously adopted by the UN General Assembly at the 2005 World Summit But many misunderstandings persist about its scope and limits And much remains to be done to solidify political support and to build institutional capacity Evans shows compellingly how big a break R2P represents from the past and how with its acceptance in principle and effective application in practice the promise of Never

The Oxford Handbook of the Responsibility to Protect Alex Bellamy, Tim Dunne, 2016-06-23 The Responsibility to Protect R2P is intended to provide an effective framework for responding to crimes of genocide ethnic cleansing war crimes and crimes against humanity It is a

response to the many conscious shocking cases where atrocities on the worst scale have occurred even during the post 1945 period when the United Nations was built to save us all from the scourge of genocide The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk or experiencing the worst atrocities R2P maintains that collective action should be taken by members of the United Nations to prevent or halt such gross violations of basic human rights This Handbook containing contributions from leading theorists and practitioners including former foreign ministers and special advisors examines the progress that has been made in the last 10 years it also looks forward to likely developments in the next decade

The Routledge Handbook of the Responsibility to Protect W. Andy Knight, Frazer Egerton, 2012 This Handbook offers a comprehensive examination of the Responsibility to Protect norm in world politics which aims to end mass atrocities against civilians The Responsibility to Protect R2P is amongst the most significant norms in global politics As the authoritative guide to R2P this edited volume gathers together the most respected and insightful voices to address key issues related to this emerging norm The contributing authors do this over the course of three parts Part I The Concept of R2P Part II Developing and Operationalising R2P Part III The view from Over Here This book will be of much interest to students of R2P humanitarian intervention genocide human rights international law peace studies international organisations security studies and IR

The Responsibility to Protect (R2P) Peter Hilpold, 2014-11-06 After having been introduced by the Report of the International Commission on Intervention and State Sovereignty ICISS in 2001 and after its affirmation by the UN World Summit in 2005 the concept of R2P has found broad approval both by international law doctrine and practice It is fair to say that international law thinking has been profoundly influenced by this new approach Nonetheless many questions in this regard are still open In this volume international lawyers discuss a series of fundamental aspects of R2P the historical dimension the relationship between R2P and general international law and the dynamics surrounding this concept In particular it will be examined in which direction this concept will probably evolve Contributors are Alex Bellamy Enzo Cannizzaro Martina Caroni Thomas Cottier Hans Georg Dederer Fernand de Varennes Oliver Diggelmann Caro Focarelli Andrea Gattini Hans Joachim Heintze Peter Hilpold Karolina Januszewski Stefan Kadelbach Federico Lenzerini Manfred Nowak Karin Oellers Frahm Nadakavukren Scheffer Peter Tobias Stoll and Lotta Viikari

Human Rights in the Emerging Global Order K. Mills, 1998-09-14 Mills focuses on one of the most significant parts of the sovereignty debate on human rights and humanitarian issues and raises three interrelated questions First how are empirical processes and practices undermining traditional notions of sovereignty These include actions by the United Nations and other organizations on behalf of human rights such as humanitarian intervention the movements of refugees and others across the borders and increasing calls for

communal self determination Second taking into account the above question and examining these issues from a normative political theory perspective what should be the relationship between individuals groups states and the international community with respect to the twin aspects of power and authority inherent in sovereignty Third what new or modified international institutions may be needed in the future to deal with these humanitarian issues **Military-Civilian**

Weiss,2005 Updated to include discussion of Afghanistan Iraq this text explores the recent history of military civilian interaction in the context of international military intervention develops a framework for assessing military costs against civilian benefits **Sovereignty as Responsibility** Francis M. Deng,Sadikiel Kimaro,Terrence

Lyons,2010-12-01 The authors assert that sovereignty can no longer be seen as a protection against interference but as a charge of responsibility where the state is accountable to both domestic and external constituencies In internal conflicts in Africa sovereign states have often failed to take responsibility for their own citizens welfare and for the humanitarian consequences of conflict leaving the victims with no assistance This book shows how that responsibility can be exercised by states over their own population and by other states in assistance to their fellow sovereigns Sovereignty as Responsibility presents a framework that should guide both national governments and the international community in discharging their respective responsibilities Broad principles are developed by examining identity as a potential source of conflict governance as a matter of managing conflict and economics as a policy field for deterring conflict Considering conflict management political stability economic development and social welfare as functions of governance the authors develop strategies guidelines and roles for its responsible exercise Some African governments such as South Africa in the 1990s and Ghana since 1980 have demonstrated impressive gains against these standards while others such as Rwanda Somalia Liberia Nigeria and Sudan have failed Opportunities for making sovereignty more responsible and improving the management of conflicts are examined at the regional and international levels The lessons from the mixed successes of regional conflict management actions such as the West African intervention in Liberia the East African mediation in Sudan and international efforts to urge talks to end the conflict in Angola indicate friends and neighbors outside the state in conflict have important roles to play in increasing sovereign responsibility Approaching conflict management from the perspective of the responsibilities of sovereign **Protecting Civilians** Siobhán Wills,2009-02-26 This book examines the obligations of

troops to prevent serious abuses of human rights towards civilians under international humanitarian law and international human rights law It analyses the duty to intervene to stop the commission of serious abuses of human rights by analysing the meaning and practical consequences for troops in terms of civilian protection of the Article 1 duty to respect and ensure respect for the Geneva Conventions of the duty to secure human rights found in most international human rights treaties and of the duty to restore law and order in an occupation The book also analyzes the extent of troops obligations to provide protection in light of various different operational and legal contexts in and discusses grey areas and lacuna of coverage A

discussion of whether new approaches are needed for example where operations are undertaken explicitly to protect people from serious violations of their human rights follows and the book concludes by offering some guidelines for troops faced with such violations

The Migration-Displacement Nexus Khalid Koser, Susan Martin, 2011-09-01 The migration displacement nexus is a new concept intended to capture the complex and dynamic interactions between voluntary and forced migration both internally and internationally Besides elaborating a new concept this volume has three main purposes the first is to focus empirical attention on previously understudied topics such as internal trafficking and the displacement of foreign nationals using case studies including Afghanistan and Iraq the second is to highlight new challenges including urban displacement and the effects of climate change and the third is to explore gaps in current policy responses and elaborate alternatives for the future

Developing a Normative Framework for the Protection of Internally Displaced Persons Simon Bagshaw, 2021-10-01 The author presents a systematic review of the role of treaties in international law and seeks to demonstrate that their importance is today somewhat overstated given the extent to which States and other organizations tend to resort to more flexible means of standard setting in order to promote respect for human rights As this text demonstrates the collaboration of various governmental intergovernmental and non governmental representatives can result in an instrument which may be broader in scope and more progressive in content If reinforced by suitable implementation measures it can be even more effective than a treaty in regulating States activities Published under the Transnational Publishers imprint
