Protective Coatings for Metals ... Second Edition Robert Martin BURNS (and BRADLEY (William Whitney)), William Whitney BRADLEY, 1955 **Handbook of Smart Coatings for Materials Protection** Abdel Salam Hamdy

Makhlouf, 2014-02-22 A smart coating is defined as one that changes its properties in response to an environmental stimulus. The Handbook of Smart Coatings for Materials Protection reviews the new generation of smart coatings for corrosion and other types of material protection. Part one explores the fundamentals of smart coatings for materials protection including types, materials design and processing. Chapters review corrosion processes and strategies for prevention, smart coatings for corrosion protection, techniques for synthesizing and applying smart coatings, multi-functional self-healing coatings, and current and future trends of protective coatings for automotive, aerospace and military applications. Chapters in part two focus on smart coatings with self-healing properties for corrosion protection, including self-healing anticorrosion coatings for structural and petrochemical engineering applications, smart self-healing coatings for corrosion protection of aluminum alloys, magnesium alloys and steel, smart nanocoatings for corrosion detection and control, and recent advances in polyaniline-based organic coatings for corrosion protection. Chapters in part three move on to highlight other types of smart coatings, including smart self-cleaning coatings for corrosion protection, smart polymer nanocomposite water and oil repellent coatings for aluminum, UV curable organic polymer coatings for corrosion protection of steel, smart epoxy coatings for early detection of corrosion in steel and aluminum and structural ceramics with self-healing properties. The Handbook of Smart Coatings for Materials Protection is a valuable reference for those concerned with preventing corrosion, particularly of metals, professionals working within the surface coating industries, as well as all those with an academic research interest in the field. Reviews the new generation of smart coatings for corrosion and other types of material protection. Explores the fundamentals of smart coatings for materials protection, including types, materials design and processing. Includes a focus on smart coatings with self-healing properties for corrosion protection. Principles of Metal Surface Treatment and Protection D. R. Gabe, 2014-07-22 Principles of Metal Surface Treatment and Protection deals with the principles of metal surface treatment and protection. Topics covered range from electrodeposition and hot dip coating to diffusion and non-metallic coatings, as well as oxide and conversion coatings. The theory of corrosion protection is also discussed. Comprised of eight chapters, this volume begins with an overview of the corrosion of metals and the scope of protection against corrosion, followed by a detailed treatment of electrodeposition. The discussion then turns to the principles of hot dipping as a coating method, the formation of a diffusion coating, and the role of a non-metallic coating in corrosion protection. Subsequent chapters focus on the protection of oxide films against corrosion by means of anodizing, phosphatizing, and the use of tin-free steel testing and selection of a particular coating for corrosion resistance applications, and the theory of corrosion protection. This book is intended for metal finishing scientists and students of metallurgy and metal finishing. **Corrosion and Corrosion**
