## **Protectors War:**

**The Protector's War** S. M. Stirling, 2005 Ten years after all of Earth's technology had been rendered useless by The Change two thriving communities in Oregon's Willamette Valley are confronted by a dangerous new challenge when the totalitarian Protectorate prepares to seek control over their priceless farmland By the author of *Dies the Fire* [The Protector's War](#) S. M. Stirling, 2006-09-05 It's been eight years since the Change rendered technology inoperable across the globe Rising from the ashes of the computer and industrial ages is a brave new world Survivors have banded together in tribal communities committed to rebuilding society In Oregon's Willamette Valley former pilot Michael Havel's Bearkillers are warriors of renown Their closest ally the mystical Clan Mackenzie is led by Wiccan folksinger Juniper Mackenzie Their leadership has saved countless lives But not every leader has altruistic aspirations Norman Arminger medieval scholar rules the Protectorate He has enslaved civilians built an army and spread his forces from Portland through most of western Washington State Now he wants the Willamette Valley farmland and he's willing to wage war to conquer it And unknown to both factions is the imminent arrival of a ship from Tasmania bearing British soldiers [The Lord-Protector's War](#) Sean C. Helms, 2017-11-15 No matter the cost in blood and sacrifice Freedom An ancient evil long forgotten has returned to stalk the world when the dreaded tome of Morgan le Fay is unearthed As malevolence grows and a dark plague spreads the fragile peace in Scotland is shattered by invasion With conquest and foul slavery at hand the only hope for humanity at the dawn of that new age rests upon the war weary shoulders of bloodied Highland clans the aid of bold Irish warriors and legendary riders of the Sidhe The unlikely allies must make a desperate stand or see a diabolical enemy vanquish all *The End of War* Paul Chappell, 2010-06-01 Builds on the powerful argument for peace laid in *Will War Ever End* *Women and Citizenship* St. Louis Marilyn Friedman Professor of Philosophy Washington University, 2005-09-16 The notion of citizenship is complex it can be at once an identity a set of rights privileges and responsibilities an elevated and exclusionary status a relationship between individual and state and more In recent decades citizenship has attracted interdisciplinary attention particularly with the transnational growth of Western capitalism Yet citizenship's relationship to gender has gone relatively unexplored despite the globally pervasive denial of citizenship to women historically and in many places ongoing today This highly interdisciplinary volume explores the political and cultural dimensions of citizenship and their relevance to women and gender Containing essays by a well known group of scholars including Iris Marion Young Alison Jaggar Martha Nussbaum and Sandra Bartky this book examines the conceptual issues and strategies at play in the feminist quest to give women full citizenship status The contributors take a fresh look at the issues going beyond conventional critiques and examine problems in the political and social arrangements practices and conditions that diminish women's citizenship in various parts of the world **3D Recording and Interpretation for Maritime Archaeology** John K. McCarthy, Jonathan Benjamin, Trevor Winton, Wendy van Duivenvoorde, 2019-03-06 This open access peer reviewed volume was inspired by the UNESCO UNITWIN

Network for Underwater Archaeology International Workshop held at Flinders University Adelaide Australia in November 2016 Content is based on but not limited to the work presented at the workshop which was dedicated to 3D recording and interpretation for maritime archaeology The volume consists of contributions from leading international experts as well as up and coming early career researchers from around the globe The content of the book includes recording and analysis of maritime archaeology through emerging technologies including both practical and theoretical contributions Topics include photogrammetric recording laser scanning marine geophysical 3D survey techniques virtual reality 3D modelling and reconstruction data integration and Geographic Information Systems The principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime archaeology within recent years and a marked increase in the use of 3D and digital approaches This convergence of digital technologies such as underwater photography and photogrammetry 3D sonar 3D virtual reality and 3D printing has highlighted a pressing need for these new methodologies to be considered together both in terms of defining the state of the art and for consideration of future directions As a scholarly publication the audience for the book includes students and researchers as well as professionals working in various aspects of archaeology heritage management education museums and public policy It will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3D recording and visualization **Advocate of**
