What is Protestant Art? Andrew T. Coates, 2018-06-12 What is Protestant Art presents an introduction to Protestant visual culture from the Reformation to the present Examining historical images as evidence of changing practices and attitudes Andrew T Coates explores three major themes in the history of Protestant visual culture 1 the religious work of images 2 the relationship between word and image 3 the power of the Bible and its visual representation The book analyses images such as prints paintings maps of the Holy Land and Bible illustrations to demonstrate the broad range of images that could be classified as Protestant art This work argues that the variety of images and visual practices throughout Protestant history might better be described by the term visual culture than art

Why Christ Can't Be Pictured J. Virgil Dunbar, 1994-08

Orphaned Landscapes Patricia Spyer, 2021-11-02 Less than a year after the end of authoritarian rule in 1998 huge images of Jesus Christ and other Christian scenes proliferated on walls and billboards around a provincial town in eastern Indonesia where conflict had arisen between Muslims and Christians A manifestation of the extreme perception that emerged amid uncertainty and the challenge to seeing brought on by urban warfare the street paintings erected by Protestant motorbike taxi drivers signaled a radical departure from the aniconic tradition of the old colonial church a desire to be seen and recognized by political authorities from Jakarta to the UN and European Union an aim to reinstate the Christian look of a city

in the face of the country's widespread Islamicization and an opening to a more intimate relationship to the divine through the bringing into vision of the Christian God. Stridently assertive these affectively charged mediations of religion, masculinity, Christian privilege and subjectivity are among the myriad ephemera of war from rumors, graffiti, incendiary pamphlets and Video CDs to Peace Provocateur text messages and children's reconciliation drawings. Orphaned Landscapes theorizes the production of monumental street art and other visual media as part of a wider work on appearance in which ordinary people wittingly or unwittingly refigure the aesthetic forms and sensory environment of their urban surroundings. The book offers a rich nuanced account of a place in crisis while also showing how the work on appearance far from epiphenomenal is inherent to sociopolitical change. Whether considering the emergence and disappearance of street art or the atmospherics and fog of war, Spyer demonstrates the importance of an attunement to elusive ephemeral phenomena for their palpable and varying effects in the world. Orphaned Landscapes: Violence, Visuality and Appearance in Indonesia is available from the publisher on an open access basis.

From Icons to Idols David J. Davis, 2016-02-24 The debate over religious images was fundamental to the development of the Reformation. Even before the Reformation, iconoclasm and the critique of image devotion were marks of religious radicalism. Protestant reformers embraced iconoclasm as a means of condemning Catholic corruption and illustrating their war against idolatry. From Icons to Idols provides an accessible, important edition of primary sources on this critical aspect of the Reformation in England. The documents in this collection track the image debate across the sixteenth and early seventeenth centuries, highlighting the complexities and diversity of arguments and positions held by both Protestants and Catholics. The documents also demonstrate the variety of individuals who engaged in the debate over images. Included here are bishops and theologians, printers and inquisitors, cardinals and artists, suggesting that the question of idolatry was no mere academic exercise.

Belief in Media Mary E. Hess, 2020-07-24 Most works on media developments and Christianity approach the subject from the perspective of the implications of new media technologies for traditional Christian practices or how churches can use new media to further their goals. The common framework of analysis is a given reality of traditional institutional Christianity and how it interacts with, affects and is affected by media. Media are treated as a separate cultural reality. This book presents in an accessible form the new directions that approach the interaction of media and religion from a cultural perspective and illustrates these new directions by a number of international and intercultural case studies and explorations. Looking at how global media are constructing cultural forms, structures and processes, the authors show how these have become the life out of which individual and social meaning is created and practised. Examining how individuals create religious meaning by interacting with media of various kinds, crossing boundaries of traditional religious cultures and contemporary media cultures, this book reveals how Christian institutions are also defined in the process of living culturally.
