Modeling Communication Networks and Protocols Paweł Gburzyński, 2019-04-03 This book provides an introduction to the software system SMURPH comprising a programming language its compiler and an execution environment for specifying communication networks and protocols and executing those specifications in virtual worlds mimicking the behavior of real life implementations It particularly focuses on SMURPH's wireless modeling capabilities Written in a manual like fashion it includes a comprehensive description of SMURPH functionality as well as illustrations and case studies to aid understanding

Optical Packet Access Protocols for WDM Networks Kemal Bengi, 2012-12-06 The fast growing traffic demand in telecommunication networks by use of the Internet and an increasing number of broadband services for multimedia communications requires new high performance networking technologies As such optical WDM networks are playing a pivotal role Wavelength Division Multiplexing WDM with many hundreds of wavelength channels per fiber is extensively being exploited in wide area networks With respect to the ongoing trend towards a completely packet switched mode of operation for all services WDM networks must be prepared accordingly This work concentrates on optical packet switched networking in local and metro area networks for realizing high performance applications like virtual reality medical imaging and supercomputing It is well known that in those networks using a star bus or ring shared medium an access protocol is necessary to guarantee controlled and fair access for all attached nodes Similar access protocols are to be developed and analyzed for WDM local and metro area networks Already many media access protocols for these networks have been described in the literature However some aspects of Quality of Service QoS for different service classes are still an open issue and subject to intensive research activities In the introduction the author Dr Kemal Bengi gives a short classification of media access protocols and network architectures for WDM local and metro area networks The need for service classes is also emphasized
