Protocols for High-Risk Pregnancies John T. Queenan, Catherine Y. Spong, Charles J. Protocols for High-Risk Pregnancies John T. Queenan, John C. Hobbins, Catherine Y.

Spong, 2009-02-12 Pregnancies compromised by disease, trauma, substance abuse and other factors are not uncommon. They clearly demand special attention from the obstetrician, obstetric nurse, primary care physician and others. Through three successful editions, Queenan has provided these audiences with a concise yet complete guide to managing pregnant patients and fetuses at risk. For the fourth edition, Dr. Queenan has replaced up to a third of the 96 contributors to get some new blood into the book. He has invited more contributions from European authors in order to better cater to an international readership. The book does, however, retain the popular protocols theme in which very brief chapters on the spectrum of HRP topics provide quick summaries of a problem and diagnostic and therapeutic steps to manage it. Every chapter has been revised carefully to reflect the latest thinking on the best approach to pregnant patients with risks like tuberculosis, STDs, bleeding, pre-eclampsia, etc. The many quick reference tables and charts are updated, as are the brief bibliographies accompanying each chapter. This new edition provides increased coverage of IUGR, Pre-eclampsia, teratology and genetics. New chapters have been introduced on Doppler ultrasound, nuchal translucency and also on AIDS in pregnancy. Furthermore, this fourth edition is evidence based. The new editor, Catherine Spong, is a guru of evidence based medicine and, as well as one of the editors of the journal of the American College of Obstetricians and Gynecologists, Obstetrics and Gynaecology, directs the foetal medicine programme at the National Institute of Health in Washington. *Protocols for High-Risk Pregnancies* Queenan, 2005-12-01 **Core Review for Primary Care Pediatric Nurse Practitioners**
