Joy of the Worm Drew Daniel, 2022-05-02 Consulting an extensive archive of early modern literature Joy of the Worm asserts that voluntary death in literature is not always a matter of tragedy In this study Drew Daniel identifies a surprisingly common aesthetic attitude that he calls joy of the worm after Cleopatra's embrace of the deadly asp in Shakespeare's play a pattern where voluntary death is imagined as an occasion for humor mirth ecstatic pleasure even joy and celebration Daniel draws both a historical and a conceptual distinction between self killing and suicide Standard intellectual histories of suicide in the early modern period have understandably emphasized attitudes of abhorrence scorn and severity toward voluntary death Daniel reads an archive of literary scenes and passages dating from 1534 to 1713 that complicate this picture In their own distinct responses to the surrounding attitude of censure writers including Shakespeare Donne Milton and Addison imagine death not as sin or sickness but instead as a heroic gift sexual release elemental return amorous fusion or political self rescue Joy of the worm emerges here as an aesthetic mode that shades into schadenfreude sadistic cruelty and deliberate trolling but can also underwrite powerful feelings of belonging devotion and love
