**Contemporary Theories and Systems in Psychology** Benjamin B. Wolman,2012-12-06 Twenty years is a long time in the life of a science While the historical roots of psychology have not changed since the first edition of this book some of the offshoots of the various theories and systems discussed have been critically reexamined and have undergone far reaching modifications New and bold research has led to a broadening of perspectives and recent developments in several areas required a considerable amount of rewriting I have been fortunate in the last fifteen years to have worked with about 2 000 psychologists and other behavioral scientists who contributed to several collected volumes I have edited As the editor in chief of the *International Encyclopedia of Psychiatry Psychology Psychoanalysis and Neurology* I have had the privilege of

reading scrutinizing and editing the work of 1 500 experts in psychology and related disciplines In addition I have written several books and monographs and over one hundred scientific papers Armed with all that experience I have carefully examined the pages of the first edition Chapter 8 required substantial rewriting and several new sections have been added to other chapters Current Soviet Psychology Chapter 2 Section 7 New Ideas on Purposivism Chapter 5 Section 4 Recent Developments in the Sociological School of Psychoanalysis Chapter 9 Section 4 and Present Status of Gestalt Psychology Chapter 12 Section 4 Chapter 15 was omitted and two new chapters were added Chapter 14 Humanistic Psychology and Chapter 16 Selected Research Areas

**Psychological Science in the USSR.** Institut psikhologii (Akademii pedagogicheskikh nauk RSFSR), 1961 *Socialism, Social Welfare and the Soviet Union* Vic George, Nicholas Manning, 2021-12-24 First published in 1980 Socialism Social Welfare and the Soviet Union examines the views of Marx Engels and Lenin on what constitutes a socialist form of provision of social security income education health and housing The authors discuss the implementation of these ideas in the Soviet Union since the 1917 Revolution in the context of economic and political development and describe the social services in the Soviet Union assessing the extent to which the original ideas have been matched by reality They also briefly survey the views of several East European academic writers on social policy outlining some distinctive features of social policy in the Eastern bloc The authors general conclusion is that the Soviet Union has made great progress in social policy provision from their research and from their visits in the course of writing this book they show that the social services of the Soviet Union are as good as and in some ways more comprehensive than those of Western Europe Equally important is their conclusion that a society in which the means of production and distribution are nationalised and which makes a full provision of social services is not necessarily a socialist society This book will appeal to students of sociology political science and area studies

Child Psychiatry in the Soviet Union Nancy Rollins, 1972 In the first extensive American study of child psychiatry in the Soviet Union Dr Nancy Rollins explains that her aim is two fold to expand knowledge of the theory diagnosis and treatment of

psychiatric disorders of children and adolescents and to stimulate a professional dialogue Her attainment of this goal is clearly evidenced here by means of her astute assessment of the findings of her four month visit to Russia as an individual investigator on the Medical Cultural Exchange program The author s basic concern about the relationship between a society s child rearing practices character formation and psychiatric disorder propelled her to ponder such questions as Is there a describable difference between the Soviet conscience and the American conscience as it develops during the years of childhood and adolescence What about the problems of sexual identity in the two societies Identity crises Why have Soviet psychiatrists and educators remained so consistently anti Freudian In addressing herself to the various questions that intrigued her Dr Rollins first considers the history of Soviet psychiatric thought with the major influences shaping the direction of Soviet child psychiatry and the social perspective with personal impressions of Soviet culture and society Ensuing chapters based upon first hand observations and case material take a close look at such topics as the organization of psychiatric services diagnosis general treatment methods special psychotherapy research and psychiatric training programs The author s reactions to the people she encountered in children s psychoneurological hospitals polyclinics sanatoria and research institutions contributes a lively dimension to this impressive work The study points out some differences between Soviet and American treatment methods for example Soviet treatment aims at inducing peace and relaxation in the patient whereas American methods encourage exposure to and mastery of conflicts and tolerance of anxiety Dr Rollins also offers suggestions for further study and reflects on the relation of psychiatry and culture in the two countries

*Soviet Psychology* John McLeish, 2015-12-22 Originally published in 1975 this title sets out to show us the differences between Soviet and other ways of thinking about nature man and society The basic factor distinguishing Soviet psychology is that it views phenomena from the perspective of a highly articulated body of theoretical assumptions and rejects the inductive eclecticism of Western psychology The theoretical framework within which Soviet psychology functions is the product of a distinctive socio political and cultural development in Russia profoundly shaped by the institutions of autocracy and Orthodox religion and the economic system of serfdom and the radical revolt which grew up in opposition to this and advocated materialism secularism and atheism This radical philosophic tradition in Russia best represented by the writings of Chernishevski fused with the doctrines of Marxism and the new science of behaviour developed by Sechenov and Pavlov to create the theoretical framework of Soviet psychology The book also analyses the discussions controversies and decrees which are at the root of the contemporary science of behaviour in the Soviet Union and points to the impressive body of empirical knowledge which has arisen Soviet Psychology is unique in presenting Soviet psychology from an inside point of view and in making us appreciate the strongly theoretical stance of Soviet psychology which Professor McLeish claims is unlikely to be much influenced by the new atmosphere of détente
