portray an ongoing human effort to make sense of complex mental phenomena using an imperfect set of tools with sometimes tragic results **Psychiatry** Sidney Bloch, Stephen A. Double, 2006-07-12 Psychiatry is increasingly dominated by the reductionist claim that mental illness is caused by neurobiological abnormalities Critical psychiatry disagrees with this and proposes a more ethical foundation for practice This book describes an original framework for renewing mental health services in alliance with people with mental health problems *Psychosis as a Personal Crisis* Marius Romme, Sandra Escher, 2013-03 Psychosis as a Personal Crisis seeks to challenge the way people who hear voices are both viewed and treated This book emphasises the individual variation between people who suffer from psychosis and puts forward the idea that hearing voices is not in itself a sign of mental illness In this book the editors bring together an international range of expert contributors who in their daily work their research or their personal acquaintance focus on the personal experience of psychosis Further topics of discussion include accepting and making sense of hearing voices the relation between trauma and paranoia the limitations of contemporary psychiatry the process of recovery This book will be essential reading for all mental health professionals in particular those wanting to learn more about the development of the hearing voices movement and applying these ideas to better understanding those in the voice hearing community Emergency Psychiatry at the Crossroads Frank R.
