Psychiatry In Transition The British And Italian Experiences:

Psychiatry in Transition Maria Grazia Giannichedda,1991 The Italian Psychiatric Experience Alessandro De Risio,2019-09-17 The 1978 Italian Psychiatric Reform was welcomed as a significant advancement in the care of the mentally ill as it involved for the first time ever the complete shutdown of psychiatric hospitals in a major Western country Today Italian psychiatry is totally different from that of the rest of the world due to its complete commitment to community care The transition towards the community model was appraised by many relevant international organisations such as the World Health Organisation as a fundamental step towards a better quality of life well being and social functioning of persons with mental diseases This passage wasn't easy however and the closure of Italian psychiatric hospitals was accompanied by notable setbacks in the treatment of the most severely affected persons who often faced the inadequacy of a crisis management system of care rejecting interventions in the long term In past decades pro reform authors also tended to refuse criticism of such obstacles due to their extreme commitment towards the principles that inspired their practice This book provides a much needed appraisal of the 1970s Italian Psychiatric Reform With an independent viewpoint it highlights the often overlooked shortcomings of the reform while also presenting a multi faceted view in contrast with the single vision attitude often adopted in existing studies on this topic *Psychiatry in Transition* Shulamit Ramon,1991-01-01 Dissatisfaction with traditional Western psychiatry with its emphasis on hospitalization and chemical treatment has led to a gradual shift towards community care in Western Europe and a reassessment of our attitudes towards mental distress Italy has been the trailblazer in the radical reforms *World Mental Health Casebook* Alex Cohen,Arthur Kleinman,Benedetto Saraceno,2002-04-30 In 1974 the World Health Organization began research on the effectiveness of mental health services in the developing world Through their efforts they found that treatment methods were extremely limited in their usefulness and in some cases even inappropriate and harmful Little has changed in the last quarter century but the research in these countries has shown that psychological need often stems from poor physical conditions Elements including social and economical inequalities gender discrimination political violence and malnutrition and poor physical health all contribute to the social and psychological decay of both individuals and communities Currently the goal of the WHO is to document previous studies on communities of developing countries and to build on this information in order to move forward in research Using real cases based in the South Pacific Asia South and Latin America and Europe this volume sets out examples of community based interventions that have succeeded by implementing outreach to the families and community to identify those in need reliable and adequate drug supplies treatment interventions healthy psychosocial environments This book will interest mental health professionals international public health workers global program administrators and clinicians and healthcare workers all working with low income areas **Psychiatric and Mental Health Nursing** Phil Barker,2017-07-20 The concept of the craft of caring dictates that the basis of good nursing practice is a combination of both art and science

encouraging nurses to take a holistic approach to the practice of psychiatric and mental health nursing Supported by relevant theory research policy and philosophy this volume reflects current developments in nursing practice and the understanding of mental health disorders The book includes case studies of patients with anxiety schizophrenia and bipolar disorder as well as victims of sexual abuse those with an eating disorder homeless patients and those with dementia and autism

Basaglia's International Legacy Tom Burns, John Foot, 2020 Basaglia's International Legacy From Asylum to Community provides an overview of current thinking and the international influence of Franco Basaglia Examining his influence in Italy and beyond this book finds lessons in Basaglia's work which can be applied to contemporary international mental health services

Ethical Issues in Mental Illness Caroline Dunn, 2016-12-05 This book is an attempt to address the ethical issues raised by mental illness and its treatment by focusing on the question of autonomy The mentally ill may be regarded as non autonomous by virtue of irrationality which may result in treatment models which deny them a voice As a counter to this some have moved to the other extreme and argued that the mentally ill must be regarded as fully autonomous in all circumstances and consequently that all their wishes regarding treatment must be respected This book examines the ethical consequences of such simplistic approaches towards autonomy and mental illness and considers the ethical issues raised by specific forms of treatment It is suggested in conclusion that improvement in the care and treatment of the mentally ill requires not only a fundamental change in social attitudes but also a less impoverished conception of autonomy than some of those currently employed

Internationalizing Social Work Education Gurid Aga Askeland, Malcolm Payne, 2017-07-05 Social work education has developed internationally over the past 50 years as part of wider processes of economic and cultural globalization Diverse political and social events across the world have shaped social work and its education leading to aims and methods that are shared and contested This book brings together through 13 interviews and biographies the lives experiences and contributions of leading social work educators from Comoros the Caribbean India Mexico Sweden Switzerland the United States and the United Kingdom Their receipt of IASSW's Katherine Kendall Award recognized that they were at the forefront of establishing and securing social work education during this period of internationalization Exploring the aims and priorities of these leading social work educators Askeland and Payne draw out a historical and contextual account of how social work education became widely adopted in different national and cultural environments The Awardees diverse lives and professional experiences reveal the issues they faced the paths they travelled and the prospects and threats confronting social work and its education more widely

Addiction and Recovery in the UK Jeffrey Roth, David Best, 2013-09-13 Addiction and Recovery in the UK captures the essence of the emerging addictions recovery movement and in particular the emerging evidence base that had been gathered around the umbrella of the Recovery Academy UK The Recovery Academy was established with the aim of creating a forum for people in recovery practitioners commissioners and

academics working together to describe and understand the principles of recovery as applied across the UK Following the first annual conference researchers who had been involved in academic research on recovery and innovative services and activities that had been evaluated were invited to outline UK initiatives This book the result of their contributions is a vibrant collection of diverse theories and models critiques and innovations ranging from two linked papers describing the growing recovery movement in Edinburgh to a recovery walking group in Wales and a model for peer activities in the North of England The projects are typically community up projects whose essence has been captured within this book and which together paint a picture of vitality and growth in the UK recovery movement This book was originally published as a special issue of the Journal of Groups in Addiction and Recovery *Rozelle Hospital* Edward H. Moxon, 2024-11-29 In the 1960s psychiatry was entering a new phase of its development However many people were uncomfortable with these changes and fought against what they saw as apostasy dangerous and unprofessional decisions by the bureaucracy The role of Nurses before 1960 was task oriented to control behaviour give somatic treatments when ordered and provide the daily personal needs of their patients a custodial model Since 1960 the nursing profession ancillary staff and Doctors have been forced to reassess their traditional involvement and develop new skills All previous somatic treatments were abandoned or rarely used in mainstream psychiatry The only tools left for nurses were consciously using self in a therapeutic relationship communicating sharing developing empathy and compassion and helping the patient gain insight self awareness and problem solving skills No longer were the staff seen as the boss demanding obedience Nurses had to learn how to work in alternative environments halfway houses day clinics community clinics night hospitals acute units work with mixed sexes and learn new skills through family therapy TA cognitive behaviour modification encounter groups gestalt therapy reality therapy and a therapeutic community and adapt to different age and cultural groups Management of wards and staff presented a challenge to administrators In patients attained much more freedom and self government with these developments The hierarchy was flatter industrial democracy was expected and workers had to cope with changing organisational structures Government decision making was a constant source of conflict A new approach to management emerged trust replaced control and self government replaced regimentation Where were all these developments leading What of the future Volume Two explores the sequel and exposes the intrigues promises hypocrisy lies neglect social engineering and the fate of long term residents and people with acute psychiatric episodes **Controversies in Psychotherapy and Counselling** Colin Feltham, 1999-08-28 My congratulations to Colin Feltham for assembling a set of contentious issues and lively authors which together made me forget my surroundings Person Centred Practice Editor Colin Feltham s choice of topics shows an astute on the ground awareness of the issues that dog the industry while still making lively reading New Therapist In this book leading practitioners critics and commentators take sides on many topical and core debates including Theoretical issues Does the unconscious really exist Is birth trauma a fiction Should one believe in false memories Clinical issues Is ther **Community**

Care, Ideology and Social Policy Harry Cowen, 2018-10-08 This book offers a comprehensive evaluation of community care strategies within the context of government social policy and assesses the recent shifts of political power from Conservative to Labour towards the end of the century Unlike the majority of texts in the field of community care it makes explicit the historical philosophical social and political inter connections and therefore provides an in depth understanding of changing policy issues for students practitioners and managers in health and social care

Mental Health Promotion Keith Tudor, 2013-10-23 Mental health promotion is an emerging field of interest to many health professionals This book traces its history defines it and distinguishes it from mental illness prevention Mental health is viewed as a positive concept and separate from mental illness and psychopathology Based on original research the conceptual analysis developed in the book offers policy makers and practitioners a coherent and comprehensive framework within which to design and implement practice Mental Health Promotion offers a new conceptual paradigm for mental health promotion applies it to policy assessment consultation education and training provides a comprehensive international literature review Suitable for a wide variety of courses at student and professional level in psychiatry nursing social work and community work Mental Health Promotion is a significant addition to the study of health promotion

Mental Health at the Crossroads Janet E. Williams, 2017-03-02 This book is a challenge to the enduring status and domination of bio medical approaches in mental health services Contributors from four continents argue that this domination along with modernization and multidisciplinary work will not improve people's lives unless social and psychological perspectives are appreciated and integrated This implies new forms of relationships and social arrangements Mental Health at the Crossroads the Promise of the Psychosocial Approach is a timely analysis of the psychosocial approach as it resonates across the discipline divide considering the past and future development It is written from the perspectives of service users and carers managers practitioners educators researchers and policy makers illustrated with case studies from Australia Brazil Italy UK and the USA This book presents an alternative approach to conventional thinking in mental health providing a fascinating and valuable resource for those seeking new perspectives grounded in theory with practice examples in order to influence the current agenda and change practice

Gender and Power in Families Ann C. Miller, Rosine Jozef Perelberg, 2018-06-04 The systems approach to the family is based on the assumptions that there is equality between men and women in the family and that women and men are treated equally in clinical practice The contributors to this book challenge these hidden assumptions discussing the issues from both a conceptual and clinical viewpoint They argue strongly that questions of gender and power should be central to family therapy training and practice

Teetering on the Edge Maizie Richards-Reid, 2021-08-12 There are several debates in reference to the definitions of mental health and its contributory factors on black people's life There is also conflicting views by several authors and their failure to recognise cultural differences and the need for inclusion of black people's experiences in research while a majority of people from different background ethnicity and gender differentiation appears to

be making more use of mental health provisions These concerns are examined through an approach that brought to the fore experiences of black women that have gone unnoticed it s like a nation without a history Yet there are factors that are of great significance in understanding major obstacles that are known to be an historical factor in the life and in understanding of black women s experiences The life history of black women in Britain the paucity of literature on black related issues and the negative impact of racism and social Darwinism of marginalism on black women s life comes with other social issues The fact that black women still occupy denigrated roles and responsibility in a country where there has been much debates on equality of opportunities Yet equal access to training housing and many other factors comes at a cost on black people s every day experience Women are especially at risks from poor mental health compounded by other multi layered factors Such is inclusive of the lack of prestigious occupation associated with unequal access toward promotion Certainly these multifaceted realities can affect their performance in compromised to their health and ability to withstand negative influences This title *Teetering on the Edge* attempts to improve upon the lack of resources on the experiences and historical account of black women of Caribbean descent in Britain and the direct results of their insurmountable experiences inclusive of the impact of injustices on related issues of health The uniqueness of this book seeks to make known these issues and to address the paucity of black women life experience from an historical perspective and the challenges of negatives that impacted their life and health in heightening public awareness of these issues **BMJ** ,1989 *Designs for Living* Steven Carnaby,2018-12-17 First published in 1999 this volume explores how the principle of normalisation informs British learning disability services by instructing them to help service users acquire behaviours and characteristics which are as culturally normative as possible While many studies have attempted to assess the efficacy of this approach their measurement criteria are usually based on levels of competence and participation values themselves derived from the principle of normalisation The case study in this volume compares services in London to services in Milan Northern Italy where the concept of deinstitutionalisation has been interpreted differently Recommendations are made for increasing good practice in certain aspects of British provision A key suggestion is that consistent legislated training for support staff in British learning disability services might contribute towards ameliorating current difficulties described by much of the contemporary research Modern Social Work Theory Malcolm Payne,1990-12-07 An examination of social work in both theory and practice The authors present several models relevant to different aspects of social work
