Psychiatry For The Boards:

The American Psychiatric Publishing Board Review Guide for Psychiatry Philip R. Muskin, Anna L.

Dickerman, 2016-04-13 Psychiatrists and residents are faced with the important but what may feel overwhelming task of refreshing their knowledge of the whole of psychiatric practice typically while remaining engaged in full time clinical activity. Psychiatrists will find the logical structure, substantive questions and thorough explanations provided by the Study Guide for the Psychiatry Board Examination to be as reassuring as they are educational. Although readers are advised to consult a range of resources in preparation for the examination, this guide is indispensable. It is the first and only guide to reflect the revisions contained in DSM 5 and it will ably assume a primary role in the study and review process. The guide is designed for maximum usefulness with specific features and attributes to support knowledge recall and successful examination performance. The authors are from a cross section of accomplished students, fellows and junior and senior faculty, all of whom have faced or will face the board examination and who understand its importance to the profession. Topics were determined by the American Board of Psychiatry and Neurology Certification Examination in Psychiatry 2015 Content Blueprint. The approximately 400 questions were formulated from information extracted from widely available American Psychiatric Publishing textbooks and accurately reflect the accepted psychiatric knowledge base. Each multiple choice question is followed by an explanation of why the correct answer is correct and the others are incorrect and every question and explanation is referenced, directing the reader to the primary material for more in depth learning and study. The volume was designed as a study guide for both the initial psychiatry board examination and the recertification examination. The process of working through the study guide will allow the reader to identify areas of strength and weakness, initiate further study and test and retest knowledge, ultimately preparing for the examination's rigors. Only the Study Guide for the Psychiatry Board Examination offers support for the new DSM 5 compatible examination and that alone renders it essential. **Psychiatry for the Boards** William W. Wang, Wen-Hui Cai, 2007-06-01 Psychiatry for the Boards Second Edition is the most effective test preparation tool for standard clinical psychiatry exams including the PRITE, the American Board of Psychiatry and Neurology written exam, recertification exams and psychiatry questions on the USMLE Steps 2 and 3. The book presents high yield information and mnemonics in an easy to read question and answer format. Appendices contain 100 sample Board type questions and practical exam preparation tips. Completely updated with nearly half the chapters rewritten, this edition is DSM IV TR compatible and includes new developments in psychopharmacology, neuroscience and technology. Six new chapters cover human development, ECT, VNS and DBS, seizure disorders, localized impairment, strokes, brain injuries and brain tumors, peripheral nerve and muscle disorders and cranial nerve symptoms and disorders. Psychiatry Board Review Dr. Rajesh Tampi, Dr. Kristina Zdanys, Dr. Mark Oldham, 2017-03-29 The field of psychiatry is evolving rapidly, specifically in the areas of classification of many psychiatric disorders, psychopharmacology and psychotherapeutics. The new Diagnostic and Statistical

Manual of Mental Disorders DSM 5 which was introduced in 2013 forms the basis of the new classification system in psychiatry The American Board of Psychiatry and Neurology is also in the process of phasing in DSM 5 criteria to the board examination such that by 2017 the examination material will exclusively reflect the new manual As psychiatric trainees and psychiatrists prepare for their certification and recertification examinations using the new classification system a new board review textbook is imperative to address these changes in order to prepare them for the certification examinations as well as for their clinical practice To help with this process we have compiled a list of 1000 questions and answers in psychiatry and neurology using the most current information available in the field and using the DSM 5 classification system This book has been specifically written for the busy professional who does not have the time to access numerous resources necessary to prepare for professional examinations

Psychiatry Board Review Rebecca A. Schmidt, 2006 Designed as a results oriented study guide that delivers

everything needed to improve knowledge confidence and recall Over 3000 rapid fire questions cover all topics on the psychiatry boards Clinical Study Guide for the Oral Boards in Psychiatry Nathan R. Strahl, 2004 The 4 years since publication of the first edition of the Clinical Study Guide for the Oral Boards in Psychiatry have witnessed a tremendous influx of fresh information relevant to the practice of psychiatry The sheer scope of this new material places an even greater burden on today's examinees who are expected to be familiar with both older and newer treatments This unique and proven reference provides exactly what every candidate needs to achieve success on the rigorous American Board of Psychiatry and Neurology ABPN oral examination Incorporating the updated diagnoses reflected in DSM IV TR and presenting pertinent clinical information on the assessment and treatment of the kinds of patients most likely to be encountered during the oral boards in psychiatry this new edition retains its predecessor's easy to use 10 chapter format and breakthrough perspective In both editions the author emphasizes that candidates are being tested not on their proficiency in making a single accurate diagnosis but rather on their ability to formulate a differential diagnosis that is on their reasoning skills and their ability to recognize during even a short patient interview that many diagnoses are possible And knowledge alone is not enough the examinee also must demonstrate insight by showing empathy for the patient and by developing a collegial relationship with the examiners As of 2004 the ABPN requires psychiatrists to pass a recertification examination every 10 years In addition to its utility in preparation for the oral boards this second edition of the Clinical Study Guide for the Oral Boards in Psychiatry represents an excellent review text for clinicians facing the recertification examination This indispensable study guide offers a distinct advantage to the busy professional by bringing together in one compact volume both the knowledge and the insights so essential to success on these crucial examinations *Core Competencies for Psychiatric Practice* Stephen C. Scheiber, Thomas A. Kramer, ABPN, 2008-08-13 The practice of medicine has changed radically during the past few decades Patients better informed than ever now demand more of their physicians viewing them as partners rather than revering them as sole decision makers In this environment nonnegotiable core competencies ever evolving and measured by certification recertification and more recently maintenance of certification are more important than ever Written from the perspective of those responsible for educating and certifying the next generations of psychiatrists this groundbreaking compendium by distinguished contributors offers for the first time a concise look at the final product of the June 2001 Invitational Core Competencies Conference sponsored by the American Board of Psychiatry and Neurology ABPN as regards psychiatry with a future comparable publication focusing on neurology Divided into four parts Part I sets the stage for the current concept of physician competence by presenting a brief history of medical competence explaining the logic behind the development of the current competence outline Part II provides two different views of how to look at core competencies how competence is defined by the Royal College of Physicians and Surgeons of Canada and based on some of their work what is currently being done in the United States Part III discusses the organizing principles identified in 1999 by the Accreditation Council for

Graduate Medical Education ACGME and the American Board of Medical Specialties ABMS that frame all of our conversations about competence as currently delineated for psychiatrists across the six core competency categories Patient Care Medical Knowledge Interpersonal and Communications Skills Practice Based Learning and Improvement Professionalism and Systems Based Practice Also presented are discussions of when in a physician's career these competencies should be assessed and what methodologies would be appropriate for that assessment Part IV discusses how the psychiatry core competencies are changing board certification and recertification Also presented are informed predictions about the changes that medical school faculty and residency training directors will have to make and how practitioners will have to change behaviors to maintain their board certification Concluding with an appendix outlining the six core competencies for psychiatry this invaluable resource will both help psychiatric residents and their faculty and training directors understand the core competencies important to the ABPN and provide practitioners with a view of what will be contained in their upcoming maintenance of certification programs now being designed
