Real World Of City Politics:

The Real World of Texas Politics Robert Locander, Richard Shaw, Kevin Bailey, 2022-09-20 You may think you know Texas but which one Texas is a land shrouded in myths and so is its politics The Real World of Texas Politics pulls back the veil on those myths and reveals the secrets the elites don't want you to know It lays bare the dual worlds of the Lone Star State the one for the elites and the one for the masses Inspired by the works of political scientist James Lamare the authors argue that the privileged few have used their superior resources to dominate all aspects of the Texas political system from voting and elections to government institutions and policymaking This dominance by the elites has resulted in a subsistence life and limited future for millions of people living in twenty first century Texas The authors are insiders Locander a political scientist Shaw a union leader and Bailey a state representative with a combined ten decade involvement in Texas politics and government But they're also outsiders holding views that don't align with the people in power Rather than placate they seek to scrutinize with a skeptical eye the most pressing issues facing one of America's most important and most populous states They lay bare the crass influence of money and power and provide a roadmap for what Texas can do to get state government working for average Texans The Real World of Texas Politics challenges the economic and political status quo It peels back the myths to expose how the state's leaders both Democrats and Republicans have forsaken the masses to cater to the rich and powerful Reversing this trend takes knowledge and this book offers a hefty dose by taking a hard look at how politics and power really work in the Lone Star State

Political Engagement in Canadian City Elections R. Michael McGregor,Laura B. Stephenson,2024-03-12 Municipal elections in Canada don't look much like those held at the federal and provincial levels A key difference is a significant discrepancy in voter turnout but relatively little is known about why far fewer people vote in city elections Voters show less interest in local government seeing it as less influential than other levels yet they believe their views matter more to local politicians Political Engagement in Canadian City Elections explores this apparent contradiction by asking who participates in politics how they go about it and why Drawing from the Canadian Municipal Election Study a novel survey of electors in eight large cities across the country in 2017 and 2018 contributors consider factors ranging from the universal such as the demographic profile of voters or how economic conditions affect them to the specific for example participation in school board and council elections There are more municipal elections than any other kind in Canada The discoveries in Political Engagement in Canadian City Elections collectively represent a major leap forward in our understanding of voter activity at the community and municipal level *Politics, Planning and Homes in a World City* Duncan Bowie,2010-02-25 This is an insightful study of spatial planning and housing strategy in London focusing on the period 2000-2008 and the Mayoralty of Ken Livingstone Duncan Bowie presents a detailed analysis of the development of Livingstone's policies and their consequences Examining the theory and practice of spatial planning at a metropolitan level Bowie examines the relationships between planning the residential development market and affordable housing environmental economic and equity objectives national regional and local planning agencies and their policies It places Livingstone's Mayoralty within its historical context and looks forward to the different challenges faced by Livingstone's successors in a radically changed political and economic climate Clear and engaging this critical analysis provides a valuable resource for academics and their students as well as planning housing and development professionals It is essential reading for anyone interested in politics and social change in a leading world city and provides a base for parallel studies of other major metropolitan regions *Reinventing Cities*

The Routledge Handbook on Spaces of Urban Politics Kevin Ward, Andrew E. G. Jonas, Byron Miller, David

Wilson, 2018-04-17 The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics. The scope of this handbook's coverage and contributions engages with and reflects upon the most important innovative and recent critical developments to the interdisciplinary field of urban politics drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections with an introductory chapter setting out the rationale, aims and structure of the Handbook and short introductory commentaries at the beginning of each part. It questions the eliding of urban politics into the politics of the city, reconsidering the usefulness of the distinction between old and new urban politics, considering issues of class, gender, race and the ways in which they intersect, appear and reappear in matters of urban politics, how best to theorize the roles of capital, the state and other actors such as social movements in the production of the city and finally issues of doing urban political research. The various chapters explore the issues of urban politics of economic development, environment and nature in the city, governance and planning, the politics of labour as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly global and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. It is a key reference to all researchers and policy makers with an interest in urban politics. *Shaping the Canadian City* John C. Weaver, 1977 **Cities, Politics & Power** Simon

Parker, 2010-11-02 Traditionally the study of power in the city was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies. Increasingly, however, attention has turned to the function of the city not only as a centre of urban governance but as a major economic, social, cultural and strategic force in its own right. *Cities, Politics and Power* combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power. This book is divided into five sections with a short introduction outlining the argument and organisation of the text. Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate, oppress and annihilate urban populations. Part three critically examines the key collective actors and processes that compete for and organise political power within cities and how urban governance operates and interacts with lesser and greater scales of government and networks of power. Part four then explores the ways in which the political is constituted by urban inhabitants and how social identity, information and communication networks and the natural and built environment all comprise intersecting fields of urban power. The conclusion calls for a broader theoretical and thematic approach to the study of urban
