Reasonableness and Effectiveness in Argumentative Discourse Frans H. van Eemeren, 2015-08-27 This volume presents 50 contributions on the themes of reasonableness and effectiveness and their connections which are central issues in argumentation theory It discusses van Eemeren's views on the study of argumentation the approach to argumentation adopted in pragma dialectics pragma dialectical perspectives on the dialectical and pragmatic dimensions of argumentative discourse the notion of strategic maneuvering the pragma dialectical method of analyzing argumentative discourse the treatment of fallacies as violations of rules for critical discussion pragma dialectical views on context the role of logic verbal indicators of argumentative moves and argument schemes and the process of writing and rewriting argumentative texts The pragma dialectical quantitative approach to empirical research on argumentative discourse is illustrated by reporting on selected illustrative experimental studies as well as qualitative studies of historical cases **Real Writing** Walter H.

Beale, 1986 *Real Writing* Walter H. Beale, Karen Meyers, Laurie L. White, 1982-01-01 **Learning from Language** Walter H. Beale, 2010-06-15 In *Learning from Language* Walter H. Beale seeks to bring together the disciplines of linguistics rhetoric and literary studies through the concept of symmetry how words mirror thought society and our vision of the world Citing thinkers from antiquity to the present Beale provides an in depth study of linguistic theory development and practice He views the historic division between the schools of symmetry and asymmetry a belief that language developed as a structure independent of human experience as built into the character of language itself and as an impediment to literary humanism the combined study of language rhetoric and literature to improve the competence and character of the individual In his analysis Beale outlines and critiques traditional claims of symmetry then offers new avenues of approach to the subject In doing so he examines how important issues of human culture and consciousness have parallels in processes of language how linguistic patterns relate to pervasive human problems how language is an active participant in the expression performance and construction of reality the concepts of designating versus naming figurative language as a process of reenvisioning reality and the linking of style to virtue by the ancients Beale concludes that both asymmetrical and symmetrical elements exist in language each with their own relevance and that they are complementary rather than opposing philosophies The basic intuitions of symmetry that relate language to life are powerful and important to all of English studies Combined with a love for the workings sounds and structures of language Beale says an understanding of symmetry can help guide the pursuit of literary humanism WPA, Writing Program Administration, 1985 **The Writing Instructor**, 1985

gets it The Humble Argument has students covered on these important topics Understanding argument as an idea Grasping the stages of the writing process Organizing an argument around rhetorical principles Thinking for yourself as a college student Crafting a careful and clear thesis Gathering and synthesizing evidence to support a thesis Guiding readers through a thoughtful persuasive essay *Engaging Boys in Active Literacy* William G.
