## **Realistic Evaluation:**

*Realistic Evaluation* Ray Pawson, Nicholas Tilley, 1997-04-23 Realistic Evaluation shows how program evaluation needs to be and can be bettered It presents a profound yet highly readable critique of current evaluation practice and goes on to introduce a manifesto and handbook for a fresh approach The main body of this book is devoted to the articulation of a new evaluation paradigm which promises greater validity and utility from the findings of evaluation studies The authors call this new approach realistic evaluation The name reflects the paradigm's foundation in scientific realist philosophy its commitment to the idea that programmes deal with real problems rather than mere social constructions and its primary intention which is to inform realistic developments in policy making that benefit programme participants and the public Ray Pawson and Nicholas Tilley argue with passion that scientific evaluation requires a careful blend of theory and method quality and quantity ambition and realism The book offers a complete blueprint for evaluation activities running from design to data collection and analysis to the cumulation of findings across programmes and onto the realization of research into policy The argument is developed using practical examples throughout and is grounded in the major fields of programme evaluation This book will be essential reading for all those involved in the evaluation process especially those researchers students and practitioners in the core disciplines of sociology social policy criminology health and education This book is a must for those engaged in the field providing a fully illustrated text on evaluation with numerous examples from the criminal justice system Unusually it offers something for the academic practitioner and student alike I found Pawson and Tilley's latest work on evaluation an enjoyable and informative read For myself their realistic evaluation clarified and formalised a jumbled set of ideas I had already been developing Although not everyone will agree with the methodology proposed by the authors this book is a valuable read as it will cause most of us at least to review our methodological stance International Journal of Police Science and Management This is an engaging book with a strong sense of voice and communicative task The voice is sometimes strident but always clear Its communicative qualities are evident equally in its structure lots of signposting for the reader within and across chapters Language Teaching Research This provocative elegant and highly insightful book focuses on the effective incorporation of actual practice into the formulation of evaluation methodology What a pleasure to read sentences like The research act involves learning a stakeholder's theories formalizing them and teaching them back to that informant who is then in a position to comment upon clarify and further refine the key ideas Pawson and Tilley have given us a wise witty and persuasive account of how real practitioner experience might be encouraged to intrude on and modify researchers concepts about program processes and outcomes This holds important promise for achieving something that is devoutly to be wished closer interaction among at least some researchers and some policy makers Eleanor Chelimsky Past President of the American Evaluation Association This is a sustained methodological argument by two wordly wise social scientists Unashamedly intellectual theoretically ambitious yet with a clear but bounded conception of evaluation

It is articulate occasionally eloquent and always iconoclastic whilst eschewing paradigm wars The Pawson and Tilley realist call to arms threatens to take no prisoners among experimentalists constructivists or pluralists It is the kind of book that clarifies your thoughts even when you disagree with everything they say Elliot Stern The Tavistock Institute      **Realistic Evaluation** Ray Pawson,Nick Tilley,1997-06-23 Table of Contents      **The Science of Evaluation** Ray Pawson,2013-02-01

Evaluation researchers are tasked with providing the evidence to guide programme building and to assess its outcomes As such they labour under the highest expectations bringing independence and objectivity to policy making They face huge challenges given the complexity of modern interventions and the politicised backdrop to all of their investigations They have responded with a huge portfolio of research techniques and through their professional associations have set up schemes to establish standards for evaluative inquiry and to accredit evaluation practitioners A big question remains Has this monumental effort produced a progressive cumulative and authoritative body of knowledge that we might think of as evaluation science This is the question addressed by Ray Pawson in this sequel to Realistic Evaluation and Evidence based Policy In answer he provides a detailed blueprint for an evaluation science based on realist principles      *Realist Evaluation* Ana Manzano,Emma Williams,2024-11-29
