Pheby, 2021-09-14 Alex Pheby's *Mordew* launches an astonishingly inventive epic fantasy trilogy God is dead his corpse
hidden in the catacombs beneath Mordew In the slums of the sea battered city a young boy called Nathan Treeves lives with
his parents eking out a meagre existence by picking treasures from the Living Mud and the half formed short lived creatures
it spawns Until one day his desperate mother sells him to the mysterious Master of Mordew The Master derives his magical
power from feeding on the corpse of God But Nathan despite his fear and lowly station has his own strength and it is greater
than the Master has ever known Great enough to destroy everything the Master has built If only Nathan can discover how to
use it So it is that the Master begins to scheme against him and Nathan has to fight his way through the betrayals secrets
and vendettas of the city where God was murdered and darkness reigns At the Publisher's request this title is being sold

Volume 1 Ross Thompson, 2022-12-20 The idea of an ideological war between science and religion Thompson argues is
founded on a mistake But this does not mean that there is nothing at stake For behind the ill conceived conflict lie complex
issues about the nature of mind consciousness experience subjectivity quality value and the like all of which need to be
disentangled and assessed in their own right Outgrowing Materialism leads the reader through a sequence of five Worlds
each of which offers a distinct way of understanding or failing to understand these issues and where God might belong or not
Writing accessibly but with a sharp eye for detail Thompson sheds new light on the familiar territory of materialism dualism
and structural realism and evaluates the growing attraction of the multiverse He argues that dualism mechanized the
material world then materialism exorcised the mental ghost from the machine and finally this machine is evaporating into
pure mathematics Outgrowing Materialism is half of Ten Ways to Weave the World Matter Mind and God The sequel
Embodying Mind discusses five Worlds that precede and follow those discussed here However Outgrowing Materialism
stands in its own right as a critique of the modern science v religion dilemma **The Esoteric** Hiram Erastus Butler, 1888
The Whole Person Mark H. Bickhard, 2024-11-27 *The Whole Person* explores the realms of theory and philosophy

concerning minds and persons This book presents models of the emergent realization of multiple mental processes and of the constitution of social realities and social persons Each chapter explores prevalent theoretical and philosophical assumptions that obstruct the acceptance of models depicting emergent realization offering analyses of these barriers and demonstrating ways to overcome them Rooted in the framework of process metaphysics this book models metaphysically genuine emergence paving the way for a comprehensive model of multifarious normative emergences These normative emergences include phenomena such as function dysfunction representational truth and falsity rational irrational ethical unethical and others that shape our mental and social landscapes The discussion extends to the macro evolutionary culmination of mental processes in a model of reflective consciousness The book then extends its exploration to the foundational role of mental processes in the emergence of social realities and persons with language acting as a core element in these emergences Addressing evolutionary aspects brain processes developmental processes moral normativities and self consistency considerations The Whole Person presents a holistic integration of decades of constructive work Endorsements This ambitious yet unpretentious carefully constructed and argued book is a must read for anyone with serious interest in the nature of persons and the psychology of personhood Mark Bickhard s The Whole Person is a sustained and convincing narrative about our individual and collective evolution and emergence as the unique beings that we are Of particular interest is his account of the emergence of persons as homo socius Here Professor Bickhard captures key but often overlooked historical sociocultural and socio developmental dynamics and processes that make us who we are a species constantly interacting with each other and the world in a never ending process of mutual co constitution By theorizing a process metaphysics replete with emergent normativity that does not clash with a naturalistic ontological psychology Bickhard takes a giant step toward seeing ourselves as we are and as we might become Jack Martin Professor Emeritus Simon Fraser University A typical psychological theory offers narrow generalizations about data sets obtained by semi proprietary empirical methods The basic empirical research on which such theories have depended is in crisis tremendous effort has gone into ill motivated studies applying statistics inappropriately to inadequate samples too often generating irreproducible results The kind of theory that psychology needs is broad and deep pays no respect to boundaries between specialties makes falsifiable predictions and answers to arguments in principle The Whole Person presents just such a theory psychologists whether their aim is to extend it and support it or to challenge it and refute it will benefit from studying it closely Robert L Campbell Professor Emeritus Psychology Clemson University **The Fortnightly** ,1887
