Blumin, 1989-09-29 This book traces the emergence of the recognizable middle class from the 1760 1900 **De-Industrialization** Bert Altena, Marcel van der Linden, 2002 De industrialization processes have accompanied industrialization from the start both regionally and globally Most historical studies of de industrialization focus on economic issues including structural causes and forms of unemployment Much less attention is usually paid to the social and cultural aspects What are the consequences of de industrialization for working class families and their communities How does de industrialization affect working class culture trade unions traditional labour parties and the regional social educational and cultural infrastructure Are gender relations changed by de industrialization The essays here propose a wide scope for the study of industrial devolution **John Donne, Coterie Poet** Arthur F. Marotti, 2008-08-01 Arthur F Marotti has produced the first systematic study of John Donne s poetry as coterie literature offering fresh interpretations of the poems in their biographical and sociohistorical contexts It will be of

interest and value to students and scholars of English Renaissance literature to critics interested in the application of revisionist history to literary study and to those concerned with the processes by which literature became institutionalized in the early modern period Donne treated poetry as an avocation restricting his verse to carefully chosen readers friends acquaintances patrons and the woman he later married This study employs socio historical and psychoanalytic methods to examine this poetry as work designed for readers to respond in knowledgeable ways to a complex interplay of literary text and social context Marotti argues that it is necessary to relate literary language to the languages of social economic and political transactions and to define the social and ideological affiliations of literary genres and modes After setting Donne s practice in the framework of the sixteenth century systems of manuscript literary transmission Marotti treats the verse chronologically and according to audience paying particular attention to the rhetorical enactment of the author s relationships to peers and superiors through the conflicting styles of egalitarian assertion social iconoclasm and deferential politeness Marotti relates the poetry to Donne s contemporary prose discussing the author s choice of various literary forms in the context of his sociopolitical life as well in terms of the shift from Elizabethan to Jacobean rule the latter change resulting in a realignment of genres within the culture s literary system He reads Donne s formal satires humanist verse letters erotic elegies and commentary epistles aware of the social coordinates of those particular genres and defines the markedly different circumstances to which Donne s libertine courtly satiric sentimental complimentary and religious lyrics individually belonged Marotti deals also with Donne s inventive mixing of genres in both shorter and longer poems Marotti s groundbreaking work offers new models of historical interpretation of Donne s poetry complementing previous formalist intellectual historical and literary historical readings It particularly highlights the importance of attending to the socioliterary conditions of literature designed for manuscript transmission rather than for publication work that includes for example much of the lyric poetry of Renaissance England

A Mexican Family Empire Charles H. Harris,2014-03-19 Perhaps no other institution has had a more significant impact on Latin American history than the large landed estate the hacienda In Mexico the latifundio an estate usually composed of two or more haciendas dominated the social and economic structure of the country for four hundred years A Mexican Family Empire is a careful examination of the largest latifundio ever to have existed not only in Mexico but also in all of Latin America the latifundio of the Sanchez Navarros Located in the northern state of Coahuila the Sanchez Navarro family's latifundio was composed of seventeen haciendas and covered more than 16.5 million acres the size of West Virginia Charles H Harris places the history of the latifundio in perspective by showing the interaction between the various activities of the Sanchez Navarros and the evolution of landholding itself In his discussion of the acquisition of land the technology of ranching labor problems and production on the Sanchez Navarro estate and of the family's involvement in commerce and politics Harris finds that the development of the latifundio was only one aspect in the Sanchez Navarros rise to power Although the Sanchez Navarros conformed in some respects to the stereotypes advanced about hacendados in terms of landownership and the use of debt peonage in many important areas a different picture emerges For example the family's

salient characteristic was a business mentality they built the latifundio to make money with status only a secondary consideration Moreover the family s extensive commercial activities belie the generalization that the objective of every hacendado was to make the estates self sufficient Harris emphasizes the great importance of the S nchez Navarros widespread network of family connections in their commercial and political activities A Mexican Family Empire is based on the S nchez Navarro papers 75 000 pages of personal letters business correspondence hacienda reports and inventories wills land titles and court records spanning the period from 1658 to 1895 Harris s thorough research of these documents has resulted in the first complete social economic and political history of a great estate The geographical and chronological boundaries of his study permit analysis of both continuity and change in Mexico s evolving socioeconomic structure during one of the most decisive periods in its history the era of transition from colony to nation

English Aristocratic Women, 1450-1550 Barbara Jean Harris,2002 This work based on archival research combines a collective portrait of aristocratic women with an analysis of the particular class specific form of patriarchy and gender relations that

flourished among the upper classes in Yorkist and early Tudor England **Citizen Machiavelli** Mark Hulliung, 2017-07-05 Machiavelli has been viewed as the forerunner of the humanists of our day liberals and socialists who have discovered that moral ends sometimes require immoral means Against this interpretation Mark Hulliung argues that Machiavelli's humanism was rooted in classical notions of grandeur and greatness and that his prime reason for admiring the ancient Roman republic was that it conquered the world In short Machiavelli was at his most Machiavellian precisely when he voiced his civic humanism Hulliung argues that Machiavelli's embrace of fraud and violence cannot be justified by patriotism or a professed concern with the common good He indicts Machiavelli's use and abuse of history in the service of his cynical agenda the quest for power Hulliung sees Machiavelli as a republican imperialist embracing the heroic pagan virtues and consciously subverting the humanistic tradition of Cicero and the religious morality of Christianity with an intentionally skewed interpretation of republican Rome By inverting the Stoical and Christian elements of the classics Machiavelli made the humanistic tradition give birth to Machiavellism its terrible child Hulliung's thesis is convincing and his book is a valuable contribution to the debate on Machiavellian thought

The Widening Gate David Harris Sacks, 2023-04-28 The history of capitalism is not to be explained in mere economic terms David Harris Sacks here demonstrates that the modern Western economy was ushered in by broad processes of social political and cultural change His study of Bristol as it opened its gate to national politics and the Atlantic economy reveals capitalism to be not just a species of economic order but a distinct form of life governed by its own ethical norms and cultural practices Availing himself of the methods of thick description socio economic analysis and political theory Sacks examines the dynamics by which early modern Bristol moved from a medieval commercial economy to an early capitalist one Throughout the period the life of the city depended heavily on the successes of its great overseas merchants But their quest for a monopoly of trade with the outside world from the Atlantic seaboard to the Levant came into conflict with the concerns of Bristol's artisans and retail shopkeepers The battles of the two factions conditioned social and cultural developments in Bristol for two centuries Locally the conflict set the terms for developing conceptions of justice and authority On a larger scale it drew the community firmly into the great affairs of the realm and the wider world of expanding markets beyond This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992 The history of capitalism is not to be explained in mere economic terms David Harris Sacks here demonstrates that the modern Western economy was ushered in by broad processes of social political and cultural change His study of Bristol as it opened its

Marriage Alliance in Late Medieval Florence Anthony Molho, 1994 How did propertied families in late medieval and early modern Florence maintain their power and affluence while clans elsewhere were fatally undermined by the growth of commerce and personal freedom and the

consequences of the Plague Molho suggests that the answer is found in the twin institutions of arranged marriage and the dowry

Sciences and Cultures E. Mendelsohn, Y. Elkana, 2012-12-06 Anthropological approaches to the sciences have developed as part of a broader tradition concerned about the place of the sciences in today's world and in some basic sense concerned with questions about the legitimacy of the sciences In the years since the second World War we have seen the emergence of a number of different attempts both to analyze and to cope with the successes of the sciences their broad penetration into social life and the sense of problem and crisis that they have projected Among the of movements concerned about the earlier responses were the development social responsibility of scientists and technological practitioners There is little doubt that this was a direct outgrowth of the role of science in the war epitomized by the successful construction and catastrophic use of the atomic bomb The recognition of the deep social utility of science and especially its role as an instrument of war fostered curiosity about the earlier development of scientific disciplines and institutional forms The history of science as an explicit discipline with full time practitioners can be seen as an attempt to locate science in temporal space first in its intellectual form and secondly in its institutional or social form The sociology of science while certainly having roots in the pre war work of Robert K

Drama and the Market in the Age of Shakespeare Douglas Bruster, 2005-01-27 Douglas Bruster's provocative study of English Renaissance drama explores its links with Elizabethan and Jacobean economy and society looking at the status of playwrights such as Shakespeare and the establishment of commercial theatres He identifies in the drama a materialist vision which has its origins in the climate of uncertainty engendered by the rapidly expanding economy of London His examples range from the economic importance of cuckoldry to the role of stage props as commodities and the commercial significance of the Troy story in Shakespeare's *Troilus and Cressida* and he offers new ways of reading English Renaissance drama by returning the theatre and the plays performed there to its basis in the material world
