Rearming the French Marcel Vigneras,1957 Rearming the French in World War II. Monro MacCloskey,1972

Rearming the French Marcel Vigneras,1957 The reemergence of French national forces in the war against the Axis Powers and the role of large scale American aid Rearming the French Marcel Vigneras,2003-04-01 In rearming the French the War Department and the U S Army became agents of an Allied policy which not only enabled the United States to further a friendship for France that dated from the Revolution but in addition served the military interests of both nations It equipped Frenchmen with the means to fight and by so doing increased at minimum cost the forces available to the United Nations The Army can take pride in the success with which it administered a policy involving both political and military matters The policy of mutual aid has since been extended throughout the world with the Army again designated as the agency principally responsible for its administration The present thorough and objective study of an early large scale American experiment with mutual aid should therefore be highly instructive to all concerned Rearming the French Marcel Vigneras,1957 The reemergence of French national forces in the war against the Axis Powers and the role of large scale American aid **United States Army in World War II** United States. World War II will be the first place students turn for the who, what, when, where and more importantly the why behind this historic conflict. [Rearming the RAF for the Second World War](#) Adrian Phillips, 2022-07-28. When the RAF rearmed to meet the growing threat from Nazi Germany's remorseless expansion in the late 1930s, it faced immense challenges. It had to manage a huge increase in size as well as mastering rapid advances in aviation technology. To protect Britain from attack, the RAF's commanders had to choose the right strategy and the right balance in its forces. The choices had to be made in peacetime with no guidance from combat experience. These visions then had to be translated into practical reality. A shifting cast of government ministers, civil servants and industrialists with their own financial, political and military agendas brought further dynamics into play. The RAF's readiness for war was crucial to Britain's ability to respond to Nazi aggression before war broke out, and when it did, the RAF's rearmament was put to the acid test of battle. Adrian Phillips uses the penetrating grasp of how top-level decisions are made that he honed in his inside accounts of the abdication crisis and appeasement to dissect the process which shaped the RAF of 1940. He looks beyond the familiar legends of the Battle of Britain and explores in depth the successes and failures of a vital element in British preparations for war. *The Fall and Rise of French Sea Power* Hugues Canuel, 2021-04-15. The Fall and Rise of French Sea Power explores the renewal of French naval power from the fall of France in 1940 through the first two decades of the Cold War. The Marine nationale continued fighting after the Armistice, a service divided against itself. The destruction of French sea power at the hands of the Allies, the Axis and fratricidal confrontations in the colonies continued unabated until the scuttling of the Vichy fleet in 1942. And yet just over twenty years after this dark day, Charles de Gaulle announced a plan to complement the country's nuclear deterrent with a force of nuclear-powered ballistic missile-carrying submarines. Completing the rebuilding effort that followed the nadir in Toulon, this force provided the means to make the Marine nationale a fully fledged blue-water navy again ready to face the complex circumstances of the Cold War. An important continuum of cooperation and bitter tensions shaped naval relations between France and the Anglo-Americans from World War II to the Cold War. The rejuvenation of a fleet nearly wiped out during the hostilities was underpinned by a succession of forced compromises, often the least bad possible, reluctantly accepted by French politicians and admirals but effectively leveraged in their pursuit of an independent naval policy within a strategy of alliance. Hugues Canuel demonstrates that the renaissance of French sea power was shaped by a naval policy formulated within a strategy of alliance closely adapted to the needs of a continental state with worldwide interests. This work fills a distinct void in the literature concerned with the evolution of naval affairs from World War II to the 1960s. The author, drawing upon extensive research through French, British, American and NATO archives, including those made public only recently regarding the sensitive circumstances surrounding the French nuclear deterrent, maps out for readers the unique path adopted in France to rebuild a blue-water fleet during unprecedented circumstances. **American Grand Strategy in the Mediterranean during**

World War II Andrew Buchanan, 2016-08-04 This book offers a thorough reinterpretation of US engagement with the Mediterranean during World War II Andrew Buchanan argues that the United States was far from being a reluctant participant in a peripheral theater and that Washington had a major grand strategic interest in the region By the end of the war the Mediterranean was essentially an American lake and the United States had substantial political and economic interests extending from North Africa via Italy and the Balkans to the Middle East This book examines the military diplomatic and economic processes by which this hegemonic position was assembled and consolidated It discusses the changing character of the Anglo American alliance the establishment of post war spheres of influence the nature of presidential leadership and the common interest of all the leaders of the Grand Alliance in blocking the development of potentially revolutionary movements emerging from the chaos of war occupation and economic breakdown *United States Army in World War II* United States Department of the Army. Office of Military History, 1955

The Crash of Ruin Peter Schrijvers, 2001-02 In the ruined Europe of World War II American soldiers on the frontline had no eye for breathtaking vistas or romantic settings The brutality of battle profoundly darkened the soldiers perceptions of the Old World Drawing on soldiers diaries letters poems and songs Peter Schrijvers offers a compelling account of the experiences of U S combat ground forces their struggles with the European terrain and seasons their confrontations with soldiers and their often startling encounters with civilians Schrijvers relays how the GIs became so desensitized and dehumanized that the sight of dead animals often evoked more compassion in them than enemy dead The Crash of Ruin concludes with a dramatic and moving account of the final Allied offensive into German held territory and the soldiers bearing witness to the ultimate symbol of Europe s descent into ruin the death camps of the Holocaust *The Sinews of War* James A. Huston, 1966
