The Dispositional Architecture of Epistemic Reasons Hamid Vahid,2020-09-06 This book is concerned with the conditions under which epistemic reasons provide justification for beliefs The author draws on metaethical theories of reasons and normativity and then applies his theory to various contemporary debates in epistemology In the first part of the book the author outlines what he calls the dispositional architecture of epistemic reasons The author offers and defends a dispositional account of how propositional and doxastic justification are related to one another He then argues that the dispositional view has the resources to provide an acceptable account of the notion of the basing relation In the second part of the book the author examines how his theory of epistemic reasons bears on the issues involving perceptual reasons He defends dogmatism about perceptual justification against conservatism and shows how his dispositional framework illuminates certain claims of dogmatism and its adherence to justification internalism Finally the author applies his dispositional framework to epistemological topics including the structure of defeat self knowledge reasoning emotions and motivational internalism The Dispositional Architecture of Epistemic Reasons demonstrates the value of employing metaethical considerations for the

justification of beliefs and propositions It will be of interest to scholars and advanced students working in epistemology and metaethics *On the Borders of Being and Knowing* John P. Moran, 2018-09-27 A collection of essays on the foundational themes of freedom and spontaneity in Immanuel Kant's philosophy *Brains, Buddhas, and Believing* Dan Arnold, 2014-04-08 Premodern Buddhists are sometimes characterized as veritable mind scientists whose insights anticipate modern research on the brain and mind Aiming to complicate this story Dan Arnold confronts a significant obstacle to popular attempts at harmonizing classical Buddhist and modern scientific thought since most Indian Buddhists held that the mental continuum is uninterrupted by death its continuity is what Buddhists mean by rebirth they would have no truck with the idea that everything about the mental can be explained in terms of brain events Nevertheless a predominant stream of Indian Buddhist thought associated with the seventh century thinker Dharmakirti turns out to be vulnerable to arguments modern philosophers have leveled against physicalism By characterizing the philosophical problems commonly faced by Dharmakirti and contemporary philosophers such as Jerry Fodor and Daniel Dennett Arnold seeks to advance an understanding of both first millennium Indian arguments and contemporary debates on the philosophy of mind The issues center on what modern philosophers have called intentionality the fact that the mind can be about or represent or mean other things Tracing an account of intentionality through Kant Wilfrid Sellars and John McDowell Arnold argues that

intentionality cannot in principle be explained in causal terms Elaborating some of Dharmakirti's central commitments chiefly his apoha theory of meaning and his account of self awareness Arnold shows that despite his concern to refute physicalism Dharmakirti's causal explanations of the mental mean that modern arguments from intentionality cut as much against his project as they do against physicalist philosophies of mind This is evident in the arguments of some of Dharmakirti's contemporaneous Indian critics proponents of the orthodox Brahmanical Mimamsa school as well as fellow Buddhists from the Madhyamaka school of thought whose critiques exemplify the same logic as modern arguments from intentionality Elaborating these various strands of thought Arnold shows that seemingly arcane arguments among first millennium Indian thinkers can illuminate matters still very much at the heart of contemporary philosophy
