Reginald Archambault, 2010-02-25 When originally published in 1965 this book reflected some of the new thinking among philosophers regarding the role of the discipline in its investigation of central issues in education The essays are grouped into four major sections The Nature and Function of Educational Theory The Context of Educational Discussion Conceptions of Teaching and The Essence of Education The concepts dealt with are of the first importance to any practical or theoretical discussion in education and the editor provides a generous introduction to the essays to aid the reader in his analysis of the issues **Educational Judgments (International Library of the Philosophy of Education Volume 9)**

F. Doyle James, 2010-02-25 The topics covered in this volume originally published in 1973 include the need for a more adequate concept or definition of education the issue of whether indoctrination is compatible with education particularly with moral education and the processes of judging the merits of different approaches to aesthetic education Two contributors present complementary analyses of the relations between freedom as a characteristic of institutions and the process of learning to be

a free man There is discussion of the neglected subject of rights and duties in education with special emphasis on the question of a universal right to education The volume concludes with papers on the relevance of philosophy to the practical judgments of educators and to education as a field of study

**Concepts of Indoctrination (International Library of the Philosophy of Education Volume 20)** Ivan A. Nyberg, 2010-02-25 Open informal and humanistic are words used to describe new styles of education which depart from ordinary or traditional education Too often however these adjectives are used in a strongly polemical or self justifying rather than analytical way Often too the grounds for accepting or rejecting open education are political or moral instead of being based on a consideration of the nature of open education and its strength and weaknesses This collection of essays is central to the debate on open education analyzing the important concepts in the field The contributions all written by authorities on the philosophy of education deal with problems of definition knowledge socialization freedom cultural perspective and unique meanings and metaphors

**Education and the Education of Teachers (International Library of the Philosophy of Education Volume 18)** R.S. Peters, 2010-02-25 This collection of important and significant papers examines a wide range of issues with R S Peter's customary incisiveness and clarity One of the author's main concerns is to clarify the meaning of education and quality in education a phrase often used in public debate but seldom scrutinized Long standing ambiguities latent in the concept of liberal education are also exposed and Herbert Spencer's question What knowledge is of most worth vital in the light of the recent vast development of knowledge is

considered **Experience and the Growth of Understanding (International Library of the Philosophy of Education Volume 11)** D.W.
