Subcommittee on the City, 1977      The Politics of State and City Administration Glenn Abney, Thomas P. Lauth, 1986-06-30 In *The Politics of State and City Administration* Abney and Lauth take a penetrating look at the relationships of state and city administrators to the people with whom they work legislators councilors chief executives and numerous interest groups seeking to influence administrative decisions and upon whom administrators depend to achieve their objectives The analysis is based upon information obtained from national surveys of approximately 800 state and 600 city government department heads The reader of this book will learn for example that governors are perceived by their department heads to be more interested in management than in policy leadership interest groups are viewed as allies rather than enemies of state administrators and the emergence of professionalism in administration has reduced the ability of mayors to be chief administrators *The Politics of State and City Administration* will be of interest to scholars and students of public administration state and local government and public policy      International Encyclopedia of Housing and Home, 2012-10-09 Available online via SciVerse ScienceDirect or in print for a limited time only The International Encyclopedia of Housing and Home Seven Volume Set is the first international reference work for housing scholars and professionals that uses studies in economics and finance psychology social policy sociology anthropology geography architecture law and other disciplines to create an international portrait of housing in all its facets from meanings of home at the microscale to impacts on macro economy This comprehensive work is edited by distinguished housing expert Susan J Smith together with Marja

**Constructing Practical Reasons** Andreas Müller, 2020-12-01 Some things are reasons for us to perform certain actions That it will spare you great pain in the future for example is a reason for you to go to the dentist now and that you are already late for work is a reason for you not to read the next article in the morning paper Why are such considerations reasons for or against certain actions Constructivism offers an intriguing answer to this question Its basic idea is often encapsulated in the slogan that reasons are not discovered but made by us Andreas Müller elaborates this idea into a fully fledged account of practical reasons makes its theoretical commitments explicit and defends it against some well known objections Constructing Practical Reasons begins with an examination of the distinctive role that reason judgements play in the process of practical reasoning This provides the resources for an anti representationalist conception of the nature of those judgements according to which they are true if they are true not because they accurately represent certain normative facts but because of their role in sound reasoning On the resulting view a consideration owes its status as a reason to the truth of the corresponding reason judgement and thus ultimately to the soundness of a certain episode of reasoning Consequently our practical reasons exhibit a kind of mind dependence but this does not force us to deny their objectivity
