Rebuilding Urban Japan After 1945:

Rebuilding Urban Japan After 1945 Jeffrey Diefendorf, Carola Hein, Yorifusa Ishida, 2003-10-10 This is the first book in English to examine the reconstruction of Japan's bombed cities after World War II. Five case studies of Tokyo, Hiroshima, Osaka, Okinawa, and Nagasaki are framed by broader essays on the evolution of Japanese planning and architecture, Japan's urban policies in Manchuria, and comparisons between Japanese and European reconstruction. The "Katrina Effect" William M. Taylor, Michael P. Levine, Oenone Rooksby, Joely-Kym Sobott, 2015-08-27 On August 29th 2005 the headwaters of Hurricane Katrina's storm surge arrived at New Orleans; the levees broke and the city was inundated. Perhaps no other disaster of the 21st century has so captured the global media's attention and featured in the imagination of disaster like Katrina. The Katrina Effect charts the important ethical territory that underscores thinking about disaster and the built environment globally. Given the unfolding of recent events, disasters are acquiring original and complex meanings. This is partly because of the global expansion and technological interaction of urban societies in which the multiple and varied impacts of disasters are recognized. These meanings pose significant new problems for civil society: what becomes of public accountability, egalitarianism, and other democratic ideals in the face of catastrophe? This collection of critical essays assesses the storm's global impact on overlapping urban, social, and political imaginaries. Given the coincidence and perfect storm of environmental, geo-political, and economic challenges facing liberal democratic societies, communities will come under increasing strain to preserve and restore social fabric while affording all citizens equal opportunity in determining the forms that future cities and communities will take. Today, 21st-century economic neo-liberalism, global warming, or recent theories of urban vulnerability and resilience provide key new contexts for understanding the meaning and legacy of Katrina. War and the Environment Charles E. Closmann, 2009 Eleven scholars explore among other topics the environmental ravages of trench warfare in World War I; the exploitation of Philippine forests for military purposes from the Spanish colonial period through 1945; William Tecumseh Sherman's scorched earth tactics during his 1864-65 March to the Sea; and the effects of wartime policy upon U.S. and German conservation practices during World War II. Post-Fascist Japan Laura Hein, 2018-02-22 In late 1945 local Japanese turned their energies toward creating new behaviors and institutions that would give young people better skills to combat repression at home and coercion abroad. They rapidly transformed their political culture, policies, institutions, and public opinion to create a more equitable, democratic, and peaceful society. Post-Fascist Japan explores this phenomenon focusing on a group of highly educated Japanese based in the city of Kamakura where the new political culture was particularly visible. The book argues that these leftist elites, many of whom had been seen as the enemy during the war, saw the problem as one of fascism, an ideology that had succeeded because it had addressed real problems. They turned their efforts to overtly political legal systems but also to ostensibly non-political and community institutions such as universities, art museums, local tourism, and environmental policies aiming not only for reconciliation over the past but also

to reduce the anxieties that had drawn so many towards fascism By focusing on people who had an outsized influence on Japan's political culture Hein's study is local national and transnational She grounds her discussion using specific personalities showing their ideas about post fascism how they implemented them and how they interacted with the American occupiers

Cities, Autonomy, and Decentralization in Japan Carola Hein, Philippe Pelletier, 2006-09-27 Adding a new perspective to the current literature on decentralization in Japan *Cities Autonomy and Decentralization in Japan* approaches the subject from an urban studies and planning approach The essays in the collection present a cogent compilation of case studies focusing on the past present and future of decentralization in Japan These include small scale development in the fields such as citizen participation machizukuri urban form and architecture disaster prevention and conservation of monuments The contributors suggest that new trends are emerging after the bursting of Japan's economic bubble and assess them in the context of the country's larger socio political system This in depth analysis of the development outside of Japan provides a valuable addition to students of Urban Asian and Japanese Studies

The Resilient City Lawrence J. Vale, Thomas J. Campanella, 2005-01-20 In 1871 the city of Chicago was almost entirely destroyed by what became known as The Great Fire Thirty five years later San Francisco lay in smoldering ruins after the catastrophic earthquake of 1906 Or consider the case of the Jerusalem the greatest site of physical destruction and renewal in history which over three millennia has suffered wars earthquakes fires twenty sieges eighteen reconstructions and at least eleven transitions from one religious faith to another Yet this ancient city has regenerated itself time and again and still endures Throughout history cities have been sacked burned torched bombed flooded besieged and leveled And yet they almost always rise from the ashes to rebuild Viewing a wide array of urban disasters in global historical perspective *The Resilient City* traces the aftermath of such cataclysms as the British invasion of Washington in 1814 the devastation wrought on Berlin Warsaw and Tokyo during World War II the late 20th century earthquakes that shattered Mexico City and the Chinese city of Tangshan Los Angeles after the 1992 riots the Oklahoma City bombing the destruction of the World Trade Center Revealing how traumatized city dwellers consistently develop narratives of resilience and how the pragmatic process of urban recovery is always fueled by highly symbolic actions *The Resilient City* offers a deeply informative and unsentimental tribute to the dogged persistence of the city and indeed of the human spirit

Constructing Japan Beate Loeffler, 2025-09-25 The influence of Japanese art and culture on art in late 19th century Europe and America through collections of objects and knowledge transfer is already recognised However the research in this field often neglects architecture This study takes a new approach placing architecture at the centre Through in depth analysis of contemporary textual and visual sources Beate Loeffler shows how western actors from different backgrounds interpreted Japanese architecture as they experienced it either face to face or via texts and images It unveils a complex process of appropriation and rejection of claim to interpretive sovereignty and fascination with the foreign that led to both new knowledge and cultural clichés

The SAGE Handbook of Modern Japanese

Studies James D Babb, 2014-12-15 A welcome addition to any reading list for those interested in contemporary Japanese society Roger Goodman Nissan Professor of Modern Japanese Society University of Oxford I know no better book for an accessible and up to date introduction to this complex subject than *The SAGE Handbook of Modern Japan* Studies Hiroko Takeda Associate Professor Organization for Global Japanese Studies University of Tokyo Pioneering and nuanced in analysis yet highly accessible and engaging in style Yoshio Sugimoto Emeritus Professor La Trobe University *The SAGE Handbook of Modern Japanese Studies* includes outstanding contributions from a diverse group of leading academics from across the globe This volume is designed to serve as a major interdisciplinary reference work and a seminal text both rigorous and accessible to assist students and scholars in understanding one of the major nations of the world James D Babb is a Senior Lecturer in the School of Geography Politics and Sociology at Newcastle University **The Oxford Handbook of Urban Economics and Planning** Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2011-02-01 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap this book highlights the best scholarship in planning and economics that addresses the most pressing urban problems of our day and will stimulate further dialog between scholars in urban planning and urban economics **Beyond the Metropolis** Louise Young, 2013-04-15 In *Beyond the Metropolis* Louise Young looks at the emergence of urbanism in the interwar period a global moment when the material and ideological structures that constitute the city took their characteristic modern shape In Japan as elsewhere cities became the staging ground for wide ranging social cultural economic and political transformations The rise of social problems the formation of a consumer marketplace the proliferation of streetcars and streetcar suburbs and the cascade of investments in urban development reinvented the city as both socio spatial form and set of ideas Young tells this story through the optic of the provincial city examining four second tier cities Sapporo Kanazawa Niigata and Okayama As prefectural capitals these cities constituted centers of their respective regions All four grew at an enormous rate in the interwar decades much as the metropolitan

giants did In spite of their commonalities local conditions meant that policies of national development and the vagaries of the business cycle affected individual cities in diverse ways As their differences reveal there is no single master narrative of twentieth century modernization By engaging urban culture beyond the metropolis this study shows that Japanese modernity was not made in Tokyo and exported to the provinces but rather co constituted through the circulation and exchange of people and ideas throughout the country and beyond

Historical Dictionary of World War II Anne Sharp Wells,2023-12-15 World War II was the largest and most costly conflict in history the first true global war Fought on land on sea and in the air it involved numerous countries and killed maimed or displaced millions of people both civilian and military around the world In spite of the alliances that bound many of the same participants the war was essentially two separate but simultaneous conflicts one involved Japan as the major antagonist and took place mostly in Asia and the Pacific and the other initiated by Germany and Italy was contested mainly in Europe North Africa the Mediterranean and the Atlantic This book focuses on the lesser known war the war with Japan It begins with Japan s seizure of Manchuria from China in 1931 and covers Japan s ambitious attacks on Pearl Harbor and other territories ten years later the use of atomic bombs on Japan s cities and the end of the Allied occupation of Japan in 1952 Although Japan renounced war in its 1947 constitution conflict continued across Asia as former colonies fought for independence and civil war engulfed other areas Historical Dictionary of World War II The War Against Japan Second Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on the military diplomatic political social economic and scientific aspects of the war in addition to the lives of the people who participated in and directed the war This book is an excellent resource for students researchers and anyone wanting to know more about the war against Japan during World War II

The Rise of Modern Business Mansel G. Blackford,2012-07-01 The Rise of Modern Business compares and analyzes the development of business and business institutions in several countries from the preindustrial era to the present Paying close attention to connections between business development and political social and cultural changes Blackford addresses both manufacturing and nonmanufacturing firms small firms as well as big businesses For this third edition he updates his study in light of new scholarship with special attention paid to the structural diversity of business firms and with a timely discussion about the reciprocal relationship between business and the environment The business history of Germany is extensively updated and there is entirely new coverage of the business history of China a country whose growing political and economic prowess on the world stage demands the historical and contextual understanding of business scholars today

The Oxford Handbook of Cities in World History Peter Clark,2013-02-14 In 2008 for the first time the majority of the planet s inhabitants lived in cities and towns Becoming globally urban has been one of mankind s greatest collective achievements over time Written by leading scholar this is the first detailed survey of the world s cities and towns from ancient times to the present day

From Ruins to Reconstruction Karl D. Qualls,2018-07-05 Sevastopol located in present day Ukraine but still home to

the Russian Black Sea Fleet and revered by Russians for its role in the Crimean War was utterly destroyed by German forces during World War II In *From Ruins to Reconstruction* Karl D Qualls tells the complex story of the city s rebuilding Based on extensive research in archives in both Moscow and Sevastopol architectural plans and drawings interviews and his own extensive experience in Sevastopol Qualls tells a unique story in which the periphery bests the Stalinist center the city s experience shows that local officials had considerable room to maneuver even during the peak years of Stalinist control Qualls first paints a vivid portrait of the ruined city and the sufferings of its surviving inhabitants He then turns to Moscow s plans to remake the ancient city on the heroic socialist model prized by Stalin and visited upon most other postwar Soviet cities and towns In Sevastopol however the architects and city planners sent out from the center went native deviating from Moscow s blueprints to collaborate with local officials and residents who seized control of the planning process and rebuilt the city in a manner that celebrated its distinctive historical identity When completed postwar Sevastopol resembled a nineteenth century Russian city with tree lined boulevards wide walkways and buildings street names and memorials to its heroism in wars both long past and recent Though visually Russian and still containing a majority Russian speaking population Sevastopol was in 1954 joined to Ukraine which in 1991 became an independent state In his concluding chapter Qualls explores how the Russianness of the city and the presence of the Russian fleet affect relations between Ukraine Russia and the West

Routledge Handbook of Asian Cities Richard Hu,2023-05-31 This handbook provides the most comprehensive examination of Asian cities developed and developing large and small and their urban development Investigating the urban challenges and opportunities of cities from every nation in Asia the handbook engages not only the global cities like Shanghai Tokyo Singapore Seoul and Mumbai but also less studied cities like Dili Mal Bandar Seri Begawan Kabul and Pyongyang The handbook discusses Asian cities in alignment to the United Nations New Urban Agenda and Sustainable Development Goals in order to contribute to global policy debates In doing so it critically reflects on the development trajectories of Asian cities and imagines an urban future in Asia and the world in the post sustainable post global and post pandemic era Presenting 43 chapters of original insightful research this book will be of interest to scholars practitioners students and general readers in the fields of urban development urban policy and planning urban studies and Asian studies

The Blitz and its Legacy Peter J. Larkham,2016-12-05 Triggered in part by contemporary experiences in the Balkans the Middle East and elsewhere there has been a rise in interest in the blitz and the subsequent reconstruction of cities especially as many of the buildings and areas rebuilt after the Second World War are now facing demolition and reconstruction in their turn Drawing together leading scholars and new researchers from across the fields of planning history architecture and geography this volume presents an historical and cultural commentary on the immediate and longer term impacts of wartime destruction The book s contents in 14 chapters cover the spread of themes from experiencing the war to reconstruction and its experiences and although many chapters draw upon the UK experience there is deliberate inclusion of

some material from mainland Europe and Japan to emphasise that the experiences processes and products are not London specific A comparative book tracing destruction to reconstruction is a relative rarity and yet of the utmost importance in possessing wider relevance to post disaster reconstructions The Blitz and Its Legacy is a fascinating volume which includes war experiences of destruction architecture urban design the political process of planning and reconstruction and also popular perceptions of rebuilding Its findings provide very timely lessons which highlight the value of learning from historical precedent

Akira Kurosawa and Modern Japan David A. Conrad, 2022-04-26 The samurai films of legendary Japanese director Akira Kurosawa are set in the past but they tell us much about the present as do his crime stories romances military films medical dramas and art films His movies are beloved for their timeless protagonists and haunting vistas of old Japan but we haven't yet fully grasped everything they can teach us about modern Japan Kurosawa's films evolved as Japan redefined and reinvented itself from movies made for the wartime regime to those made amid the trials of American occupation From the lavish epics of the economic miracle years to searching masterpieces made with international assistance in a globalizing world Kurosawa's movies responded to changing times This detailed study of all 30 of Kurosawa's films analyzes the links between the thrilling narratives onscreen and the equally remarkable events that occurred in Japan over his long productive career This book explores how Kurosawa's classics depict the political economic cultural sexual and environmental upheavals of a nation at the center of a turbulent century both directly and through period piece mythmaking

Housing and Social Transition in Japan Yosuke Hirayama, Richard Ronald, 2006-11-24 Bringing together a number of perspectives on the Japanese housing system Housing and Social Transition in Japan provides a comprehensive challenging and theoretically developed account of the dynamic role of the housing system during a period of unprecedented social and economic change in one of the most enigmatic social political and economic systems of the modern world While Japan demonstrates many of the characteristics of some western housing and social systems including mass homeownership and consumption based lifestyles extensive economic growth and rapid urban modernization has been achieved in balance with traditional social values and the maintenance of the family system Helpfully divided into three sections Housing and Social Transition in Japan explores the dynamics of the development of the housing system in post war Japan deals with social issues related to housing in terms of social aging family relations gender and inequality addresses the Japanese housing system and social change in relation to comparative and theoretical frameworks As well as providing challenges and insights for the academic community at large this book also provides a good introduction to the study of Japan and its housing economic social and welfare system generally

Transnationalism and the German City J. Diefendorf, J. Ward, 2014-04-24 Too often scholars treat transnationalism as a conflict in which the local regional and national give way to globalized identity As these varied studies of German cities show though the urban environment is actually a site of trans localism that is not merely oppositional but that adapts itself dialectically to the forces of globalization

Oil Spaces Carola Hein, 2021-08-23 Oil Spaces traces

petroleum's impact through a range of territories from across the world showing how industrially drilled petroleum and its refined products have played a major role in transforming the built environment in ways that are often not visible or recognized. Over the past century and a half, industrially drilled petroleum has powered factories, built cities, and sustained nation states. It has fueled ways of life and visions of progress, modernity, and disaster. In detailed international case studies, the contributors consider petroleum's role in the built environment and the imagination. They study how petroleum and its infrastructure have served as a source of military conflict and political and economic power, inspiring efforts to create territories and reshape geographies and national boundaries. The authors trace ruptures and continuities between colonial and postcolonial frameworks in locations as diverse as Sumatra, northeast China, Brazil, Nigeria, Tanzania, and Kuwait, as well as heritage sites including former power stations in Italy and the port of Dunkirk, once a prime gateway through which petroleum entered Europe. By revealing petroleum's role in organizing and imagining space globally, this book takes up a key task in imagining the possibilities of a post-oil future. It will be invaluable reading to scholars and students of architectural and urban history, planning, and geography of sustainable urban environments.
