Fiadeiro,1999-07-28 The European conference situationin the general area of software science has longbeen considered unsatisfactory A fairlylarge number of small and medi sized conferences and workshops take place on an irregular basis competing for high quality contributions and for enough attendees to make them nancially viable Discussions aiming at a consolidation have been underway since at least 1992 with concrete planning beginning in summer 1994 and culminating in a public meeting at TAPSOFT 95 in Aarhus On the basis of a broad consensus it was decided to establish a single annual federated spring conference in the slot that was then occupied by TAPSOFT and CAAP ESOP CC comprising a number of existing and new conferences and covering a spectrum from theory to practice ETAPS 98 the rst instance of the European Joint Conferences on Theory and Practice of Software is taking place this year in Lisbon It comprises ve conferences FoSSaCS FASE ESOP CC TACAS four workshops ACoS VISUAL WADT CMCS seven invited lectures and nine tutorials   **Recent Trends in Algebraic Development Techniques** Martin Wirsing,Dirk Pattinson,Rolf Hennicker,2003-11-24 This book constitutes the thoroughly refereed post proceedings of the 16th International Workshop on Algebraic Development Techniques WADT 2002 held at Frauenchiemsee Germany in September 2002 The 20 revised full papers presented together with 6 invited papers were carefully improved and selected from 44 workshop presentations during two rounds of reviewing The papers are devoted to topics like formal methods for system development specification languages and methods systems and techniques for reasoning about specifications specification development systems methods and techniques for concurrent distributed and mobile systems and algebraic and co algebraic methods   **Foundations of Algebraic Specification and Formal Software Development** Donald Sannella,Andrzej Tarlecki,2012-01-05 This book provides foundations for software specification and formal software development from the perspective of work on algebraic specification concentrating on developing basic concepts and studying their fundamental properties These foundations are built on a solid mathematical basis using elements of universal algebra category theory and logic and this mathematical toolbox provides a convenient language for precisely formulating the concepts involved in software specification and development Once formally defined

these notions become subject to mathematical investigation and this interplay between mathematics and software engineering yields results that are mathematically interesting conceptually revealing and practically useful The theory presented by the authors has its origins in work on algebraic specifications that started in the early 1970s and their treatment is comprehensive This book contains five kinds of material the requisite mathematical foundations traditional algebraic specifications elements of the theory of institutions formal specification and development and proof methods While the book is self contained mathematical maturity and familiarity with the problems of software engineering is required and in the examples that directly relate to programming the authors assume acquaintance with the concepts of functional programming The book will be of value to researchers and advanced graduate students in the areas of programming and theoretical computer science **Recent Trends in Algebraic Development Techniques** José Luiz Fiadeiro,Peter Mosses,Fernando Orejas,2005-02-26 This volume contains selected papers from WADT 2004 the 17th International Workshop on Algebraic Development Techniques **Foundations of Software Science and Computation Structures** Mogens Nielsen,Uffe Engberg,2003-08-01 ETAPS 2002 is the fth instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998by combining a number of existing and new conferences This year it comprises ve conferences FOSSACS FASE ESOP CC TACAS thirteen satellite workshops ACL2 AGT CMCS COCV DCC INT LDTA SC SFEDL SLAP SPIN TPTS and VISS eight invited lectures not including those that are speci c to the satellite events and several tutorials The events that comprise ETAPS address various aspects of the system velopment process including speci cation design implementation analysis and improvement The languages methodologies and tools which support these tivities are all well within its scope Di erent blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive **Recent Trends in Algebraic Development Techniques** Mihai Codescu,Răzvan Diaconescu,Ionuț Țuțu,2015-12-29 This book constitutes the thoroughly refereed post conference proceedings of the 22nd International Workshop on Algebraic Development Techniques WADT 2014 held in September 2014 in Sinaia Romania The 8 revised papers presented were carefully reviewed and selected from 13 presentations and focus together with one invited paper on foundations of algebraic specification approaches to formal specification including process calculi and models of concurrent distributed and mobile computing specification languages methods and environments semantics of conceptual modeling methods and techniques model driven development graph transformations term rewriting and proof systems integration of formal specification techniques formal testing and quality assurance validation and verification FM'99 - Formal Methods Jeannette M.
