## **Recession Crime And Punishment:**

**Recession, Crime and Punishment** Steven Box, 1987-08-21 We are often told that unemployment is no excuse for committing crimes. It certainly does not follow as many in government would have us believe that crime is unrelated to social conditions. Examining a mass of evidence from Great Britain, the United States, Canada, and other industrialised countries, Steven Box shows how criminal activity increased with unemployment, poverty, and sharpened competition between firms. He demonstrates that corporate as well as individual crime is affected by the experience of recession and that changing pressures and opportunities alter the character and distribution of deviance as well as increasing its incidence. Although deterioration in material circumstances does lead to more crime, however, it does not alone account for the massive increase in prison populations or increasingly repressive systems of social control. These developments, the author argues, flow more from government attempts to restructure the labour force and the natural reaction of minor state officials like judges, police, and probation officers to the changing logic of their situations.

*Cheap on Crime* Hadar Aviram, 2015-02-06 After forty years of increasing prison construction and incarceration rates, winds of change are blowing through the American correctional system. The 2008 financial crisis demonstrated the unsustainability of the incarceration project, thereby empowering policy makers to reform punishment through fiscal prudence and austerity. In *Cheap on Crime*, Hadar Aviram draws on years of archival and journalistic research and builds on social history and economics literature to show the powerful impact of recession-era discourse on the death penalty, the war on drugs, incarceration practices, prison health care, and other aspects of the American correctional landscape.
