Looking At Senses:

The Senses Fiona Macpherson, 2011-06-09 A Collection of Classic and Contemporary Articles on the Philosophy of the Senses
Ritual, Performance and the Senses Jon P. Mitchell, Michael Bull, 2015-02-26 Ritual has long been a central concept in anthropological theories of religious transmission Ritual Performance and the Senses offers a new understanding of how ritual enables religious representations ideas beliefs values to be shared among participants Focusing on the body and the experiential nature of ritual the book brings together insights from three distinct areas of study cognitive neuroanthropology performance studies and the anthropology of the senses Eight chapters by scholars from each of these sub disciplines investigate different aspects of embodied religious practice ranging from philosophical discussions of belief to explorations of the biological processes taking place in the brain itself Case studies range from miracles and visionary activity in Catholic Malta to meditative practices in theatrical performance and include three pilgrimage sites the Church of the Holy Sepulchre in Jerusalem the festival of Ramlila in Ramnagar India and the mountain shrine of the Lord of the Shiny Snow in Andean Peru Understanding ritual allows us to understand processes at the very centre of human social life and humanity itself making this an invaluable text for students and scholars in anthropology cognitive science performance studies and religious studies

Synaesthesia and the Ancient Senses Shane Butler, Alex Purves, 2014-09-03 Like us the ancient Greeks and Romans came to know and understand the world through their senses Yet sensory experience has rarely been considered in the study of antiquity and when the senses are examined sight is regularly privileged Synaesthesia and the Ancient Senses presents a radical reappraisal of antiquity's textures flavours and aromas sounds and sights It offers both a fresh look at society in the ancient world and an opportunity to deepen the reading of classical literature The book will appeal to readers in classical society and literature philosophy and cultural history All Greek and Latin is translated and technical matters are explained for the non specialist The introduction sets the ancient senses within the history of aesthetics and the subsequent essays explore the senses throughout the classical period and on to the modern reception of classical literature

On the Epistemology of the Senses in Early Chinese Thought Jane Geaney, 2002-01-01 By departing from traditional sinological approaches this method uncovers a detailed picture of certain shared underlying views of sense perception in the Lun Yu the Mozi including the Neo Mohist Canons the Xunzi the Mencius the Laozi and the Zhuangzi

BOOK JACKET **Looking After Your Autistic Self** Niamh Garvey, 2023-03-21 I no longer try to mask my autism I now work to support my autism It is a myth that autistic children grow into less autistic adults In fact many autistic adults feel more overwhelmed as they age as the stresses of social demands such as relationships parenting or the work environment increase Niamh Garvey offers tips and tricks designed to reduce sensory and emotional stress and look after your autistic self From understanding what's happening when the stress response kicks in to using the detective habit to spot your individual strengths and triggers What's more every element of this book can be personalised to you Featuring strategies including

quick calm plans for managing triggers and lived experience advice on understanding emotional regulation coping with sensory overload and how to look after your senses during intimacy this guide is here to ensure that you don't just survive adulthood you thrive in it *The Five Senses of Man* Julius Bernstein, 1876 [Looking Through Images](#) Emmanuel Alloa, 2021-10-05 Images have always stirred ambivalent reactions Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders they have hardly ever been seen as true sources of knowledge They were long viewed as mere appearances placeholders for the things themselves or deceptive illusions Today the traditional critique of the spectacle has given way to an unconditional embrace of the visual However we still lack a persuasive theoretical account of how images work Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloa reconstructs the earliest Western media theory Aristotle's concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices **Literacy through Creativity** Prue Goodwin, 2012-09-10 This is a fresh and practical approach to examining the way in which creative arts can be used in the classroom to enhance the learning of literacy in the primary school It includes case studies and activities that clarify the role of creativity in the literacy teaching and advises how to help develop teaching skills This is a must have text for teachers who seek to make literacy learning interesting and fun **Sibley: approach to Aesthetics C , Agency, Freedom, and Moral Responsibility** Andrei Buckareff, Carlos Moya, Sergi Rosell, 2016-04-29 In recent years there has been a resurgence of interest in problems related to human agency and responsibility by philosophers and researchers in cognate disciplines The present volume brings together original contributions by leading specialists working in this vital field of philosophical inquiry The contents represent the state of the art of philosophical research on intentional agency free will and moral responsibility The volume begins with chapters on the metaphysics of agency and moves to chapters examining various problems of luck The final two sections have a normative focus with the first of the two containing chapters examining issues related to responsible agency and blame and the chapters in the final section examine responsibility and relationships This book will be of interest to researchers and students interested in both metaphysical and normative issues related to human agency **Atheist Mind, Humanist Heart** Lex Bayer, John Figdor, 2014-09-26 Atheist Mind Humanist Heart asks an essential question for the 45 million Americans who self identify as nonreligious So you don't believe in God now what This question is increasingly important as one third of young adults under the age of thirty consider themselves nonreligious With a scientific

eye and an empathetic heart the authors turn conventional perceptions about atheism on their head They show that atheism need not be reactionary against religion and God but rather that it can offer a clear set of constructive principles to live by which establish atheism as a positive worldview Following a philosophical approach grounded in logic and evidence Bayer and Figdor take readers on an inspiring journey to discover how to live a reasonable ethical and happy life without God The readers are engaged at every step encouraged to self reflect and ultimately uncover their own set of personal beliefs **A**

argues for a reversal of the most fundamental tenet of phenomenology namely that all consciousness is intentional that is directed toward an object Mitscherling suggests as a new Copernican hypothesis that intentionality i e directionality gives rise to consciousness This book describes not only the origin or genesis of human cognition in sensation but also the genesis of sensation from intentional structures belonging to nature itself A phenomenological examination of our experience leads to the conclusion that the two sorts of being generally recognized by contemporary science and philosophy that is material being and ideal being prove ontologically inadequate to account for this experience Mitscherling rehabilitates the pre modern concepts of intentional being and formal causality and employs them in the construction of a comprehensive phenomenological analysis of embodiment aesthetic experience the interpretation of texts moral behavior and cognition in general **Change and Continuity in the English Language** Martti Juhani Rudanko,1998 While earlier treatments of English

verb syntax from a diachronic perspective exist this book breaks entirely fresh ground with its focus on the detailed study of English predicate complementation over the past three centuries It draws data from an unprecedented combination of authoritative sources including computer corpora and H Poutsma s unpublished dictionary and offers novel systematizations of predicates and discussions of alternation By giving ample evidence of both change and continuity in the language over the past three hundred years the book opens up a new research field in the study of the English language **The Pragmatics of Governmental Discourse** Ayan-Yue Gupta,2024-08-02 This book presents a novel methodological framework for analysing governmental discourse It involves combining pragmatist perspectives on language with computational sociolinguistics and

large language models LLMs The first half discusses traditional critical approaches to investigating discursive practices principally those employing Critical Discourse Analysis CDA and those based on methods developed by Michel Foucault These are critiqued in terms of pragmatist views on meaning which are rarely taken up in this area It is argued that to understand the grounding of social structures and power relations in discourse we must begin with a systematic account of how meaning is contextually fixed It is proposed that a pragmatist reading of Foucault's arguments about governmentality offers a productive framework for discourse analysis To illustrate the advantages of this framework the book presents a case study of the British government's adoption of resilience sustainability and wellbeing discourses in the period 2000-2020 A dataset of 179 million tokens sampled from approximately 170 000 government documents is used to illustrate how this framework can be combined with natural language processing NLP to make robust inferences This study will be of interest to both sociologists interested in language and in the methodological potential of recent developments in NLP Importantly the book demonstrates how LLMs can be harnessed to bring new perspectives to long standing sociological questions

Theory and practice of corpus-based semantics Nikola Dobric, 2013-11-29 *Sensations, Thoughts, Language* Arthur Sullivan, 2019-09-30 Brian Loar 1939-2014 was an eminent and highly respected philosopher of mind and language He was at the forefront of several different field defining debates between the 1970s and the 2000s from his earliest work on reducing semantics to psychology through debates about reference functionalism externalism and the nature of intentionality to his most enduringly influential work on the explanatory gap between consciousness and neurons Loar is widely credited with having developed the most comprehensive functionalist account of certain aspects of the mind and his phenomenal content strategy is arguably one of the most significant developments on the ancient mind/body problem This volume of essays honours the entirety of Loar's wide ranging philosophical career It features sixteen original essays

from influential figures in the fields of philosophy of language and philosophy of mind including those who worked with and were taught by Loar The essays are divided into three thematic sections covering Loar s work in philosophy of language especially the relations between semantics and psychology 1970s 80s on content in the philosophy of mind 1980s 90s and on the metaphysics of intentionality and consciousness 1990s and beyond Taken together this book is a fitting tribute to one of the leading minds of the latter 20th century and a timely reflection on Loar s enduring influence on the philosophy of mind and language
