Moral Education for a Secular Society Phyllis Stock-Morton, 1988-07-08 The current controversy over the teaching of values and the role of religion in our public schools is an important and much discussed topic Stock Morton s work represents not only a valuable historical investigation but a useful resource for the review and consideration of our present day dilemma France is the only country which has attempted to teach an official secular morality and Stock Morton s is the first study to describe and trace the development of that effort During the nineteenth century the impetus for a practical secular moral teaching arose primarily through the concern of those who sought the liberalization of French society and politics The educational dilemma faced at that time arose from the opposition of the Catholic Church to liberal government Gradually liberals and radical reached a consensus on the necessity of teaching ethics in the schools while eliminating the presence of the clergy Their solution and its philosophical basis were anchored in the Enlightenment and the Revolution but developed in the context of nineteenth century political and philosophical change In the 1880s when the republicans were

able to inaugurate universal free and secular education secular ethics became a required course for all The history of morale laique is significant at a time when our own country is rife with controversy over the role of religion and the teaching of values in the schools Stock Morton s thoughtful study represents an important contribution to the literature for those concerned with these significant issues *Routledge Library Editions: Philosophy of Education* Various Authors,2022-07-30 This set of 21 volumes originally published between 1955 and 1997 amalgamates several topics on the philosophy of education with a particular focus on religious education curriculum studies and critical thinking This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject and will be of particular interest to students of philosophy education and those undertaking teaching qualifications **Moral Education** Clive M. Glanzer,2022-02-20 American educators have consistently splintered our humanity into pieces throughout higher education s history Although key leaders of America s colonial colleges shared a common functional understanding of humans as made in God s image with a robust but vulnerable moral conscience latter moral philosophers did not build upon that foundation Instead they turned to shards of our identity to help students find their moral bearings They sought to create ladies and gentlemen honorable students and finally good professionals As a result fragmentation ensued as university leaders pitted these identity fragments against each other inciting a war of attrition As the war of identities raged its effects spilled out beyond the bounds of the curriculum into the co curricular dimension that struggled with moving beyond being en loco parentis The major identity they cultivated was that of being a political citizen Thus the major identity and story of students lives became the American political story of democracy what I call Meta Democracy In higher education guided by Meta Democracy students lose their autonomy to administrators who reduce the student identities they try to develop along with the range of virtues that comprise the good life The Dismantling of Moral Education How Higher Education Reduced the Human Identity explains why and how we arrived at diminishing ourselves
