Beyond the Noise of Solemn Assemblies Richard Allen, 2019-01-15 Since the 1970s Richard Allen s scholarship on the social gospel has broken new ground in the field of Canadian social and religious history by recovering key aspects of the tradition and its contribution to reform movements and politics *Beyond the Noise of Solemn Assemblies* collects and extends many of his classic works to present a comprehensive overview of a major thread in the fabric of the country Observing the mutual foundations of political and religious traditions in myth and arguing that the sacred and the secular belong together in discussions of public affairs Allen contests the view that religion is personal and isolated from the public square He discusses

a range of topics the transition from providential to progressive thought in nineteenth century Canada the new spirituality of social solidarity articulated by Winnipeg college students in the 1890s the role of the social gospel in pioneering urban reform farmers and workers finding in radical Christianity legitimation for political revolt Christian intellectuals in the 1930s framing a revolutionary prospectus for Depression era Canada the significance of Norman Bethune's religious upbringing for his life and work strategically focused post war ecumenical coalitions like Project North and the Latin American Working Group and the prospects for democratic socialism at the end of the Cold War Opening with a chapter relating the author's upbringing in a ministerial household dedicated to the Protestant ethic as the spirit of socialism Beyond the Noise of Solemn Assemblies represents a significant contribution to understanding the social Christian movement in Canada **Permanent Crisis** Paul Reitter, Chad Wellmon, 2023-04-05 Any reader of the Chronicle of Higher Education can tell you that the humanities are in crisis Seen as irrelevant for modern careers and hopelessly devoid of funding humanistic disciplines seem at the mercy of modernizing forces driving the university towards academic pursuits that pull in grant money and direct students to lucrative careers But as Paul Reitter and Chad Wellmon show this crisis isn't new in fact it's as old as the humanities themselves Today's humanities scholars experience and react to basic pressures in ways that are strikingly similar to the response of their nineteenth century German counterparts In German universities of the 1800s as in those in the United States today humanities scholars felt threatened by the very processes that allowed the modern humanities to flourish such as institutional rationalization and the commodification of knowledge But Reitter and Wellmon also emphasize the constructive side of crisis discourse They claim that the self understanding of the modern humanities didn't merely take shape in response to a perceived crisis it also made crisis a core part of its project The humanities came into their own by framing themselves as a unique resource for resolving crises of meaning and value that threatened other cultural or social goods With this critical historical perspective Permanent Crisis can take humanists beyond the usual scolding exhorting and handwringing into clearer more effective thinking about the fate of the humanities Furthering ideas from Max Weber and Friedrich Nietzsche to Andrew Delbanco and William Deresiewicz Reitter and Wellmon dig into the notion of the humanities as a way to find meaning and coherence in the world The Christian Century, 1928 *Education and Responsibility* Tunis Romein, 2021-03-17 This book reveals the sources of the disquiet prevailing among educators over the apparent failure of the public school system to develop moral responsibility in America's youth The doctrine of separation of church and state has made sectarian religious training illegal in public schools and Tunis Romein shows that the task of providing moral guidance suddenly thrust upon educators has disclosed their deep schisms in educational philosophy basic contradictions which have split American education from top to bottom Romein explains the basic conflicts in education by examining three educational philosophies progressivism educational reconstructionism and classical humanism and comparing all of them with the traditional Christian view He holds that all educational philosophies whether secular or not are based on faith and that all

can be tested with regard to their beliefs about the nature of man and about the kind of moral responsibility education should develop in man With sincerity and frankness Romein analyzes the moral and intellectual poverty of much of the thinking dominant in education today and he shows the necessity as well as the difficulty of making faith in God once more the underlying influence in American education

Czechs Won't Get Lost in the World, Let Alone in America Miloslav Rechcigl Jr., 2018-05-02 This book features a panorama of the lives of selected personalities whose roots had origin in the Czech lands and who in the US reached extraordinary success and who with their activities substantially influenced the growth and development of their new homeland It is a saga of plain as well as powerful people whose influence and importance often exceeded the borders of the US A great portion of included individuals may be unknown to readers since it concerns persons whose Czech origin was usually not known The book covers the total period from the times of the discovery of New World to the end of the twentieth century During the selection little concern was given to nationalistic or ethnographic criteria the only prerequisite was that the respected individuals were either born on the territory of the Czech lands or were descendants of emigrants from the Czech lands The image on the front cover is a portrait of Augustine Herman Lord of Bohemia Manor the first documented Czech immigrant in the United States The portrait comes from his famous Map of Maryland and Virginia dated 1670 The colorful story of his life would be unbelievable if made into a movie Pioneer merchant explorer surveyor map maker patriot rebel diplomat and finally Lord Read more about him in the book

Ralph Ellison Michael Germana, 2018 Ralph Ellison Temporal Technologist elucidates the theory of temporality that binds Ellison's oeuvre together and explains why race is a matter of time Germana offers a wholesale reinterpretation of Ellison's corpus as well as an extension of Ellison's ideas about the dynamism of becoming and the open endedness of the future

The Jews Among the Nations Erich Kahler, This is an augmented edition of a superb volume by one of the foremost analysts of European institutions and ideas Here the late Erich Kahler turns his attention to the special character of the Jewish people formed uniquely through the interaction of internal and external circumstances in which past and present merge The chapters in this book deal with persistent problems of Jewish identity Kahler claims these can be fully understood only by awareness of the close interconnection between the singular ethnic nature and the unique social structure of the Jewish people He discusses the Jews in Europe specifically the historical implications of a strict tribal ritual that yet permitted the widest spiritual scope The second half of the book concerns anti-Semitism in relation to Jews and Germans How did the German people seemingly so congenial to the Jews develop a murderous revulsion against them ending a long and fruitful symbiosis Kahler sees this as a parallel to the parricidal rejection of the Jews by the Christian church His argument is deepened in an added chapter new to this volume on the major forms and features of anti-Judaism in which the earlier theme of the universal and the specific are seen as central not only to the inner history of Judaism but also to the specific interaction of Jews and Gentiles throughout social history
