physician's capacity to understand and then treat a patient's condition To highlight the issue Sacks wrote the stories of 24 patients and their neurological clinical conditions In the process he rebelled against traditional methodology by focusing on his patients' subjective experiences Sacks did not only write about his patients in original ways he attempted to come up with creative ways of treating them as well At root his method was to try to help each person individually with the core aim of finding meaning and a sense of identity despite or even thanks to the patient's condition Sacks thus redefined the issue of neurological work in a new way and his ideas were so influential that they heralded the arrival of a broader movement narrative medicine that placed stronger emphasis on listening to and incorporating patients' experiences and insights into their care

**Metagnosis** Danielle Spencer, 2020-10-27 Bridging memoir with key concepts in narratology philosophy and history of medicine and disability studies this book identifies and names the phenomenon of metagnosis the experience of learning in adulthood of a longstanding condition It can occur when the condition has remained undetected e.g. colorblindness and/or when the diagnostic categories themselves have shifted e.g. ADHD More broadly it can occur with unexpected revelations bearing upon selfhood such as surprising genetic test results Though this phenomenon has received relatively scant attention learning of an unknown condition is often a significant and bewildering revelation one that subverts narrative expectations and customary categories How do we understand these revelations In addressing this topic Danielle Spencer approaches narrative medicine as a robust research methodology comprising interdisciplinarity narrative attentiveness and the creation of writerly texts Beginning with Spencer's own experience the book explores the issues raised by metagnosis from communicability to narrative intelligibility to different ways of seeing Next it traces the distinctive

metagnostic narrative arc through the stages of recognition subversion and renegotiation discussing this trajectory in light of a range of metagnostic experiences from Blade Runner to real world mid life diagnoses Finally it situates metagnosis in relation to genetic revelations and the broader discourses concerning identity Spencer proposes that better understanding metagnosis will not simply aid those directly affected but will serve as a bellwether for how we will all navigate advancing biomedical and genomic knowledge and how we may fruitfully interrogate the very notion of identity **The Art of**

Nancy Levene examines the elemental character of religion and modernity Deep in their operating systems she argues are dualisms of opposition and identity that cannot be reconciled with the forms of life they ostensibly support These dualisms are dead ends but they conceal a richer position another kind of dualism constitutive of mutual relation This dualism is difficult to distinguish and its concept of relation difficult to commit to It risks contention and even violence But it is also the indispensable support for modernity s most innovative ideals democracy criticism and interpretation In readings from Abraham to the present Levene recovers this richer dualism in its difference from the alternatives other dualisms nondualism multiplication From Abraham we get the biblical call to give up tribal belonging for a promised land of covenantal relation Yet modernity inclusive of this call is also the principle that critiques the promise when it divides self from other us from them Drawing on a long tradition of thinkers and scholars even as she breaks new ground Levene offers here nothing less than a new way of understanding modernity as an ethical claim about our world a philosophy of the powers of distinction to include rather than to divide **Enhancing the Quality of Life in Advanced Dementia** Ladislav Volicer,Lisa

The Oxford Handbook of Ethics and Art James Harold, 2023 Art has not always had the same salience in philosophical discussions of ethics that many other elements of our lives have There are well defined areas of applied ethics corresponding to nature business health care war punishment animals and more but there is no recognized research program in applied ethics of the arts or art ethics Art often seems to belong to its own sphere of value separate from morality The first questions we ask about art are usually not about its moral rightness or virtue but about its beauty or originality However it is impossible to do any serious thinking about the arts without engaging in ethical questions
