Admiral Von Hipper Tobias R. Philbin,1982 This work aims to constitute an objective analysis of a German World War I naval combat commander within his proper context by closely defining both the military technical and military political milieux in which Franz Hipper operated The description of Hipper s actions in the battles of Dogger Bank and Jutland and his handling of communications airships and the new technologies of war demonstrate the importance of the military environment The volume also provides a glimpse into the decision making process involved in the construction of German battle cruisers and the impact these decisions had in combat **Military Sea Transportation**

Service Magazine ,1968 **Firepower** Paul Lockhart,2021-10-19 The fascinating Wall Street Journal story of how military technology has transformed the world The history of warfare cannot be fully understood without considering the technology of killing In Firepower acclaimed historian Paul Lockhart tells the story of the evolution of weaponry and how it transformed not only the conduct of warfare but also the very structure of power in the West from the Renaissance to the dawn of the atomic era Across this period improvements in firepower shaped the evolving art of war For centuries weaponry had remained simple enough that any state could equip a respectable army That all changed around 1870 when the cost of investing in increasingly complicated technology soon meant that only a handful of great powers could afford to manufacture advanced weaponry while other countries fell behind Going beyond the battlefield Firepower ultimately reveals how changes in weapons technology reshaped human history *MotorBoating* ,1971-01 **Jane's Fighting Ships** ,1969 *Air University Library Index to Military Periodicals* ,1970 **Weapons & Warfare** Salem Press,2010 This work features 140 chronologically arranged overviews of the history of weaponry and military tactics from ancient times to the present global

Originally published in 2002 *Weapons and Warfare* is designed to meet the needs of students seeking information about weaponry tactics and models of warfare from ancient times to the present worldwide. Written with the needs of students and general readers in mind, the articles contained in this set present clear discussions of the topics, explaining any terms or references that may be unclear. The focus is on the technical and strategic development of weapons and tactics more than on a narrative chronological history of events. This allows students of history, political science, science, and technology alike to gain a broad understanding of the technological and strategic advances made over time and geography. The new third volume adds the essential dimension of placing these topics in broad social, cultural, and ethical contexts. Approximately 140 topics are arranged chronologically and thematically with volume 1 *Ancient and Medieval* covering weapons and strategies from ancient times to 1500, volume 2 *The Modern Era* covering weapons and strategies from approximately 1500 to the present, and volume 3 *Warfare: Cultural and Concepts* providing valuable overviews of the way warfare, weapons, and military history have been expressed socially, politically, and in the arts. Each essay ranges from 1,500 words to 7,000 words. The first two volumes open with overviews of major weapons groups; for example, in volume 1, Clubs, Maces, and Slings; Sieges and Siegecraft in volume 2; Swords, Daggers, and Bayonets; Rockets, Missiles, and Nuclear Weapons, followed by chronologically arranged sections covering major historical periods and regions of the world and their contributions to military weapons, technologies, and strategies. Volume three touches on all sociocultural and political aspects of culture, society, science, ethics, and basic battlefield theories, strategies, and policies. The essays in this set are organized into three essay types: Weapons overview articles are organized with sections on Nature and Use and Development of each weapons type; The geographically arranged warfare articles feature sections on Political Considerations where relevant and on Military Achievement; Weapons, Uniforms, and Armor; Military Organization; Doctrine, Strategy, and Tactics. Warfare articles also feature a section on the primary sources from which historians base their observations and evaluate the best sources for understanding the warfare of the period. Culture concept overviews new approach warfare and weaponry from several different perspectives: sociological, geographical, cultural, ritual, political, ethical, religious, tactical, and strategic.

Macintyre, Basil W. Bathe, 1968 **Complex Rivalry** Surinder Mohan, 2022-10-06 While a substantial body of research explains how the conflict between India and Pakistan originated and developed over time, a systematic and multivariate inquiry cutting across different IR paradigms to understand this rivalry is rare or limited. Surinder Mohan contributes to the understanding of India and Pakistan's rivalry by presenting a new type of framework also known as the complex rivalry model. This comprehensive model, by not limiting its theoretical tool kit to any single paradigm, is unique in its approach and better positioned to debate and answer baffling questions that the single paradigm-based studies address rather inadequately and in isolation. This book, through an examination of fifty-seven militarized disputes between 1947 and 2021, explains the life

cycle of India Pakistan rivalry in four phases initiation development maintenance and a possible transformation termination Mohan delineates five specific conditions that evolved the subcontinental conflict into a complex rivalry first its survival in spite of the Bangladesh War and the end of the Cold War second its linkage with other rivalries third the inclusion of nuclear factor fourth the dyadic stability in the militarized disputes and hostility level despite changes in the regime type and fifth the dyad s involvement in a multilayered conflict pattern To break this deadlock and mitigate their longstanding differences Mohan proposes that India and Pakistan must reframe their national priorities and political goals so that the new situation or combinations of conditions would assist their peace strategists to downgrade the dyadic hostility and implement risky policies to make headway to a promising transformation
