Smith, 2010-06-28 The techniques of psychotherapy are often given undue emphasis slighting the importance of the psychotherapist Research suggests that the same techniques are differently effective when used by equally trained and supervised therapists Not only are some therapists more effective irrespective of the type of therapy they practice but some because of their personal qualities may actually harm those with whom they work This research reflects the vast importance of the personality of the therapist evoking the question of how a therapist may develop personhood Aimed at training as well as practicing psychotherapists social workers counselors psychologists and psychiatrists this scholarly exploration of personhood includes various models for classifying the types of psychotherapy and the place of personhood in this context as well as a review of existing theory and research literature on specific personal therapist variables as they relate to therapy outcome The role of traditional spirituality in the development of personhood is given particular emphasis      *Training Methodology: Background theory and research* National Communicable Disease Center (U.S.), 1969      *The Anatomy of Preaching* David L. Christensen, 2020-07-16 How can we preach persuasively without huckstering manipulating or coercing people Sadly we are seeing the fall of many pastors not for reasons of sexual immorality but the pursuit of pride and power The skillful use of marketing methods creates celebrity pastors who become significant influencers in the evangelical church The lure of success is seductive turning pastors into hucksters and Christians into consumers We need to heed the warnings of the New Testament about the pride of rhetoric and the pursuit of power David Christensen carefully analyzes the biblical warnings of Paul about the temptations of rhetorical sophistry in the first century church and applies them to pastoral ministry today God calls preachers to be ethical and effective persuaders David develops an ethical grid for pastoral persuasion using principles drawn from the Bible and social science along with practical illustrations from his years of ministry He calls preachers to be ethical and effective persuaders by emphasizing the centrality of the word of God while

Klapp,1978-09-29 In this original application of information theory to social analysis Orrin Klapp examines how and why societies are producing more stress than they ever can handle He argues that the reduction of social noise the chaos from which we try to construct meaning is a major goal of individuals and groups alike Individuals groups even entire societies normally cycle rhythmically between two basic modes of adaptation to the constant communication flow opening or scanning for desired information and closing or defending against noise For example in a society functioning in the opening mode movements like ecumenicism and expansionism achieve momentum Extreme reactions in either mode lead to an opposite swing according to Professor Klapp s model His wide ranging conceptual scheme incorporates hypotheses about the variety and redundancy of information as well as about human channel capacities and the need for homeostatis His research reveals intriguing relationships among such phenomena as the concern about industrial population and the search for ethnic roots

Hidden Rewards of Making Amends Allen Berger,2013-05-28 Did you know there are hidden rewards to making amends Without a willingness to experience our painful feelings we can never grow and mature into the person we d like to be We can never reach our potential We can never become our true self To grow we must stay in close contact with our experience whatever it is We need to stay in close contact with how we behaved in our relationships in order to make a thorough list of those we have harmed We must face the wrongs we have done without running away from the truth If we were rigorously honest with ourselves while making the list of people we had harmed we probably felt one or more of the following feelings anxiety shame discomfort or guilt This is exactly what we were suppose to feel We were learning that we don t have to feel comfortable to be OK In fact another hidden reward is that the more willing we are to feel uncomfortable the more comfortable we become Yes another paradox One of the many hidden rewards in working Steps 8 9 and 10 is to stay in close contact with our experience so we can learn from it This self understanding is at the heart of self forgiveness and emotional recovery Excerpted from 12 Hidden Rewards of Making Amends      **Positive Psychology in Practice** P. Keith Miller,2010-01-01 this exciting book breaks new ground in identifying the major cause of relationship failure as the need to control in marriages and families with friends and within organizations

Compelled to Control reflects Miller's sweeping knowledge as a thinker, a speaker, and a writer. Going far beyond how to control a controller, Miller speaks from the perspective of experience and personal change. When a controller has the sense of life being out of control, he says, he or she reacts with an even stronger need to get things under control, usually with the negative result of alienating the people who matter the most. Miller tackles this deeply denied, seemingly universal phenomenon with compassion and offers a way out of the dilemma. He tells who to approach, broken relationships in new ways, leaving behind destructive patterns of perfectionism and self-justification. Keith Miller is one of those rare writers who can combine intellectual acuity with deeply felt insight born of his own struggle for authenticity. *Compelled to Control* is an impressive contribution to the literature of recovery and personal change. **Library Book Catalog** National Institute of Law Enforcement and Criminal Justice. **Lying Beyond Scruples** Lia Lola V. Kotnik, 2025-02-04 Lies and manipulations have long been part of social life, but the rise of Trump and Trumpism has made these practices excessively blatant and obscene, challenging our ability to respond effectively. This book explores this shift through sociological, anthropological, philosophical, and communicological perspectives, analysing the emergence of a new form of lying and manipulation: anti-non-post-truthful, anti-non-post-ethical, and anti-non-post-reflexive. Using the Slovenian case of Trump-inspired practices, Kotnik presents an analytical model of resistance as a means of self-empowerment against these disruptive and harmful tactics. She examines how open liars and transparent manipulators have become socially tolerable in our increasingly mentirocratic societies and argues that it is crucial to resist these practices both in principle and in action. Kotnik's work offers a stimulating investigation into why the open lie and transparent manipulation have become socially acceptable and why they must be actively opposed. **Re-evaluation Therapy** Bernard J.
