Man Who Wasnt There:

The Man Who Wasn't There Richard Bradford,2020-09-03 A ground breaking and intensely revealing examination of the life of the 20th century s most iconic writer Ernest Hemingway was an involuntary chameleon who would shift seamlessly from a self cultivated image of hero aesthetic radical and existential non conformist to a figure made up at various points of selfishness hypocrisy self delusion narcissism and arbitrary vindictiveness Richard Bradford shows that Hemingway s work is by parts erratic and unique because it was tied into these unpredictable bizarre features of his personality Impressionism and subjectivity always play some part in the making of literary works Some authors try to subdue them while others treat them as the essentials of creativity but they endure as a ubiquitous element of all literature They are the writer s private signature their authorial fingerprint In this new biography which includes previously unpublished letters from the Hemingway archives Richard Bradford reveals how Hemingway all but erased his own existence through a lifetime of invention and delusion and provides the reader with a completely new understanding of the Hemingway oeuvre

The Man Who Wasn't There Anil Ananthaswamy,2016-08-02 In the tradition of Oliver Sacks science journalist Anil Ananthaswamy skillfully inspects the bewildering connections among brain body mind self and society by examining a range of neuropsychological ailments from autism and Alzheimer s to out of body experiences and body integrity identity disorder Award winning science writer Anil Ananthaswamy smartly explores the concept of self by way of several mental conditions that eat away at patients identities showing we learn a lot about being human from people with a fragmented or altered sense of self Ananthaswamy travelled the world to meet those who suffer from maladies of the self interviewing patients psychiatrists philosophers and neuroscientists along the way He charts how the self is affected by Asperger s autism Alzheimer s epilepsy schizophrenia among many other mental conditions revealing how the brain constructs our sense of self Each chapter is anchored with stories of people who experience themselves differently from the norm Readers meet individuals in various stages of Alzheimer s disease where the loss of memory and cognition results in the loss of some aspects of the self We meet a woman who recalls the feeling of her first major encounter with schizophrenia which she describes as an outside force controlling her Ananthaswamy also looks at several less familiar conditions such as Cotard s syndrome in which patients believe they are dead and those with body integrity identity disorder where the patient seeks to have a body part amputated because it doesn t belong to them Moving nimbly back and forth from the individual stories to scientific analysis The Man Who Wasn't There is a wholly original exploration of the human self which raises fascinating questions about the mind body connection
