Weiss,2018-10-26 This book traces the emergence and development of the relationship between management consultancies and the British state It seeks

ethics and labor have been transformed under financialization To date financialization has been examined using top down approaches that portray the rise of finance as a new logic of economic accumulation Best Practice by contrast focuses on the everyday practices and narratives through which companies become financialized Effective management consultants Chong finds incorporate local workplace norms and assert their expertise in the particular terms of China s national project of modernization while at the same time framing their work in terms of global best practices Providing insight into how global management consultancies refashion Chinese state owned enterprises in preparation for stock market flotation Chong demonstrates both the dynamic fragmented character of financialization and the ways in which Chinese state capitalism enables this process

The Organization of the Expert Society Andreas werr,Staffan Furusten,2016-12-01 It is often claimed that we live in an expert society a society where more and more individuals take expert roles in increasingly narrow fields In contrast to more traditional experts most of these new experts lack generally accepted mechanisms for the certification and legitimation of their expertise This book focuses on these new as well as established experts and the efforts undertaken to secure and legitimate their expertise We view these efforts as organizing attempts and study them on four different levels the society the market the organization and the individual Based on empirical studies on these four levels of analysis The Organization of the Expert Society makes the argument that current organizing initiatives in the expert society are based in an objectifying view of expertise that risks concealing and downplaying key aspects of expertise Well intended organizing initiatives in the expert society thus run the risk of promoting ignorance rather than securing expertise Focusing on a current general and global phenomenon the rise and organization of an expert society The Organization of the Expert Society will be key reading for scholars academics and policy makers in the management fields of Organizational Theory Management Consulting Organizations Society Critical Management Studies as well as the disciplines of Sociology Political Science and Social Anthropology

Squandered David Craig,2009-06-01 Over the last ten years New Labour has boosted public spending by around a trillion pounds that s 1 000 000 000 000 of our taxes over 50 000 for every household in Britain But what have we got for our money Effective and responsive public services that are the envy of the world Or the creation of a vast self serving bureaucracy that has presided over the greatest waste of money in British history With so much money a tsunami of extra cash being thrown at public services health education policing defence social services and public administration there have been some successes Nevertheless the results of the Government s tidal wave of extra spending have been worse than pitiful In department after department it is the same sorry story a triple whammy of incompetence cover up and cuts that have all but decimated public services while those responsible have lavished money and honours on themselves David Craig exposes the sometimes tragic sometimes comic story of how New Labour s years of mismanagement have led to a bureaucratization of Britain that has squandered almost unimaginable amounts of taxpayers money caused irreparable damage to all our lives and rewarded the man responsible with the keys to Number 10

Innovation and Entrepreneurial Networks in Europe Paloma Fernández Pérez, Mary Rose, 2009-08-19 The entrepreneur is involved in the dance of two questions what is needed and what is possible The

interplay of these two questions is an ongoing process and innovation varies internationally and regionally depending on differing legal and policy systems variations in the development of education and skill development in social processes and in knowledge transfer This book explores innovation and networks in entrepreneurship with an interdisciplinary approach focusing on how old and new knowledge can be combined to produce radical innovation These chapters combine themes of entrepreneurship innovation and networks with a specifically European focus highlighting the wide variations at the national regional and business level These variations suggest the need to break with traditional stereotypes about Southern and Northern Europe The book takes a Schumpeterian perspective emphasising the importance of looking at the history of entrepreneurship and innovation paying particular attention to the neglected area of innovation in services within firms

How Industry Analysts Shape the Digital Future Neil Pollock, Robin Williams, 2016-01-14 Industry analysts are in the business of shaping the technological and economic future They attempt to predict what will become the next big thing to spot new emerging trends and paradigms to decide which hi tech products will win out over others and to figure out which technology vendors can deliver on their promises In just a few short years they have developed a surprising degree of authority over technological innovation Yet we know very little if anything about them This book seeks to explain how this was achieved and on what this authority rests Who are the experts who increasingly command the attention of vendor and user communities What is the nature of this new form of technical and business knowledge How Industry Analysts Shape the Digital Future offers the first book length study into this rarely scrutinized form of business expertise Contributions to this volume show how from a small group of mainly North American players which arose in the 1970s Gartner Inc has emerged as clear leader of a 6 billion industry that involves several hundred firms worldwide Through interviews and observation of Gartner Inc and other industry analyst firms the book explores how these firms create their predictions market classifications and rankings as well as with how these outputs are assessed and consumed The book asks why many social scientists have ignored the proliferation of these new forms of management and technical expertise In some cases scholars have deflated this kind of business acumen portraying it as arbitrary knowledge whose methods and content do not deserve enquiry The valuable exception here has been the path breaking work on the performativity of economic financial or accounting knowledge Drawing upon recent performativity arguments the book argues the case for a Sociology of Business Knowledge
