Elderly Care in Transition Helge Hvid,Annette Kamp,2012 In Scandinavia work in elderly care is a principal occupation and constitutes an important part of professional care work Over the last decade this sector has become a test piece for New Public Management NPM It is the area where NPM inspired rationales and methodologies have been applied to the greatest extent This book explores the challenges and future possibilities in elderly care from a working life perspective Researchers from three Scandinavian countries present new studies of the daily work in elderly care the change of tasks and services and the reconstruction of a semi profession The specific translation of NPM into the Scandinavian context is examined and how this affects the meaning and identity of work in elderly care and the possibilities to reconstruct meaning under standardized working conditions the new ideals of line management of elderly care and the ambiguities between bureaucracy and professionalism subjectivity and emotions as a decisive element of the work in elderly care the creation of new professionalism in pockets of the sector the shifts in valuation of experience based knowledge and care orientation The book draws attention to new trends in the sector that may make way for transforming the logic of NPM and thus points to possibilities that will enrich working life **Management of Gastrointestinal Diseases in the Elderly** Alberto

Pilotto,2007-01-01 The study and care of gastrointestinal disorders in the elderly have become priority topics for both clinicians and researchers as the aged constitute an ever increasing part of the overall population This publication presents the results of recent studies in geriatric gastroenterology reviewing both basic research and clinical aspects A significant part is devoted to the physician s clinical approach to the elderly suffering from specific gastroenterological problems Another focal point is diagnostic testing which becomes very important in old age because clinical features such as history and physical signs are often very difficult to interpret clinical manifestations and the response to therapy may seem to differ because the older patient has several concomitant disorders that may distort the classic features of the primary gastrointestinal disease Also discussed are the effects of aging on the physiology of the gastrointestinal tract and liver functions as well as the management of disorders of the small intestine colon and liver This publication will be useful for general physicians specialists in geriatrics and gastroenterology and all healthcare providers who are involved in planning care management of elderly people with gastrointestinal disorders **Foundations for Osteopathic Medicine** Robert C.
