Drucker, 2017-07-05 Peter F Drucker may be best known as a writer on business and management but these subjects were not his foremost intellectual concern Drucker's primary concerns were community in which the individual has status and society in which the individual has function Here he has assembled selections from his vast writings on these subjects This collection presents the full range of Drucker's thought on community society and political structure and constitutes an ideal introduction to his ideas The volume is divided into seven parts The selections in parts 1 and 2 were mostly written during World War Two and in the wake of the Great Depression Part 3 deals with the limits of governmental competence in the social and economic realm It contains some of Drucker's most influential writings concerned with the difference between big government and effective government The chapters in part 4 explore autonomous centers of power outside government and within society Part 5 contains chapters from Drucker's path breaking work on the corporation as a social organization rather than merely an economic one The rise of the so called knowledge industries forms the background for part 6 The concluding part 7 is devoted entirely to Drucker's long essay *The Next Society* Drucker examines the emergence of new institutions and new theories arising from the information revolution and the social changes they are helping to bring about In organizing these representative writings Drucker chose to be topical rather than chronological with each excerpt presenting a basic theme of his life's work As is characteristic of his efforts *A Functioning Society* appeals both the general reader as well as a cross disciplinary scholarly readership

Buffington, 2009-06-22 Management as we know it has been the driver of business growth in U S economies for a couple of centuries Yet the practice of management is no longer focused on creating real value Instead it is now all about using sophisticated financial techniques and practices like outsourcing and downsizing among others to improve profitability Such addition through subtraction results in higher profits in the short term but puts the corporation and its employees at risk in the long term not to mention the entire U S economy Innovation and productivity improvement corporate manager Jack Buffington argues are lost arts in American business So is getting back to basics the answer Buffington's provocative thesis Management as we know it probably can't be repaired It must be replaced Asian economies meanwhile are growing by leaps and bounds thanks in part to short term ill advised decisions made by U S managers Local companies and divisions of multinational organizations in emerging countries are on track to eventually overtake those of the West putting our job base and prosperity at peril If we want to bring manufacturing jobs back here to the U S corporate managers must seek productivity and innovation improvements in U S operations Jack Buffington knows all too well how quickly things can go downhill for U S businesses Turned into a relentless cost cutter by the forces of globalization and Wall Street's expectations for short term gains he like thousands of other U S executives has watched some of the companies he's worked for disappear for want of real value Whereas America once prized managers who displayed skill in optimizing the interplay of capital labor and technology to grow a company today's professional manager is rewarded more often for being a cost cutter than an innovator Fortunately this book not only outlines the problem it outlines the solution as well by establishing a 21st century definition of management that will succeed in today's global economy Rather than angling to produce a penny more of earnings per share to please the financiers corporate managers will see once again how to use their ingenuity to produce

products services and business processes that not only provide generous profits but sustain a business and its jobs for years to come By heeding Buffington s call the U S can rekindle its zeal for innovation leading to an era in which consumers workers investors and managers all prosper
