Organizations and Industry 4.0 Vojko Potočan,Kornélia Lazányi,Zlatko Nedelko,2024-08-01 Known models for assessing the readiness and level of Industry 4 0 implementation are helpful in revealing key technological and non

technological aspects relevant in the frame of Industry 4.0 implementation in organizations. At the forefront are technological aspects of Industry 4.0 implementation in organizations while non technological aspects play a marginal role. Building upon ample evidence about the role of non technological aspects of Industry 4.0 implementation in organizations this book addresses these ever important non technological aspects. The authors address the role of management solutions in the framework of Industry 4.0 implementation through the utilization of various management tools which support organizations working in all organizational areas. The importance of humans for Industry 4.0 is currently severely neglected despite the many changes in the workplace. Thus new challenges for human resource management (HRM) have emerged such as technostress, human robot interaction (HRI) and new tasks for employees. Non technological aspects of Industry 4.0 are broadly influencing entire organizations as the management tools support the working of organizations in all areas. Focusing on non technological aspects of Industry 4.0 implementation this book considers the utilization of traditional management tools as a key vehicle for supporting implementation in organizations. In terms of the importance of humans for implementation at the forefront are changes in the workplace due to Industry 4.0 HRIs and changing HRM practices. This book will be of value to researchers, academics and advanced students in the fields of organizational studies, HRM and change management.
