Dark Nights, Bright Lights Susanne Bach, Folkert Degenring, 2015-10-16 Light and darkness shape our perception of the world This is true in a literal sense but also metaphorically in theology philosophy literature and the arts the light of day signifies life safety knowledge and all that is good while the darkness of the night suggests death danger ignorance and evil A closer inspection however reveals that things are not quite so clear cut and that light and darkness cannot be understood as simple binary opposites On a biological level for example daylight and darkness are inseparable factors in the calibration of our circadian rhythms and a lack of periodical darkness appears to be as contrary to health as a lack of exposure to sunlight On a cultural level too night and darkness are far from being universally condemnable in fiction drama and poetry the darkness of the night allows not only nightmares but also dreams it allows criminals to ply their trade and allows lovers to meet it allows the pursuit of pleasure as well as deep thought it allows

metamorphoses transformations and transgressions unthinkable in the light of day But night is not merely darkness The night gains significance as an alternative space as an other of the day only when it is at least partially illuminated The volume examines the interconnection of night darkness and nocturnal illumination across a broad range of literary texts The individual essays examine historically specific light conditions in literature tracing the symbolic and metaphoric content of darkness and illumination and the attitudes towards them
