Natural Mind A New Way Of Looking At Drugs And The Higher Consciousness:

The Natural Mind Andrew Weil, 1998 Weil's first bestseller the classic work on the principles of consciousness offers a new model for solving the drug problem by acknowledging our intimate yearnings and offering an alternative *The Natural Mind* Andrew Weil, 1974 *The Criminal Personality* Samuel Yochelson, Stanton Samenow, 2000-04-01 The third in a series explicating the criminal mind this volume summarizes observations interpretations and conclusions derived from a study of 121 criminal men who used drugs and or alcohol to excess Originally set in writing by Yochelson before his death in 1976 the materials were edited and updated by Samenow for publication Systematic probing and repeated interviews were used as the vehicle for gathering information on common mental themes among men apprehended and sentenced for criminal acts Yochelson and Samenow attribute crime to a series of early irresponsible choices that predate drug use among drug using criminals Personality and personal choice variables are conceptualized as critical in initialing and maintaining use In what is called an indiscriminate search for excitement drug using criminals are characterized as expanding their criminal repertoire while excusing their actions by rationalizations sometimes invented by sociologists psychologists and psychiatrists Although these ideas are of considerable interest the real value of the text lies in its intriguing presentation of drug user thinking Specifically three chapters are well worth reading The description of mental activities associated with such constructs as the high the nod and the rush are probably on target for many drug users whether criminal or not The chapter explaining drugs as facilitators offers several notions worthy of systematic inquiry as does the one devoted to principles for encouragement of behavior change Of perhaps greatest benefit to most readers are caveats regarding management of drug users in what may be seen as a cognitive behavioral framework Yochelson and Samenow contend that drug using criminal men represent the architects of their criminal life styles and that it is they themselves who can correct irresponsible thoughts and behaviors through application of logic over emotion DContemporary Psychology A Jason Arosen Book *The Universe Next Door (Large Print 16pt)* James W. Sire, 2011-01-26 For more than thirty years *The Universe Next Door* has set the standard for a clear readable introduction to worldviews In this new fifth edition James Sire offers additional student friendly features to his concise easily understood introductions to theism deism naturalism Marxism nihilism existentialism Eastern monism New Age philosophy and postmodernism Included in this expanded format are a new chapter on Islam and informative sidebars throughout The book continues to build on Sire's refined definition of worldviews from the fourth edition and includes other updates as well keeping this standard text fresh and useful In a world of ever increasing diversity *The Universe Next Door* offers a unique resource for understanding the variety of worldviews that compete with Christianity for the allegiance of minds and hearts *The Universe Next Door* has been translated into over a dozen languages and has been used as a text at over one hundred colleges and universities in courses ranging from apologetics and world religions to history and English literature Sire's *Naming the Elephant* Worldview as a Concept provides a useful companion volume for

those desiring a more in depth discussion of the nature of a worldview **Determinants of Substance Abuse** Mark Galizio, Stephen A. Maisto, 2013-06-29 With the recent increase in the scope of drug and alcohol problems has come an awareness of the need for solutions In this context federal support for research on drug problems increased tremendously during the last 10 to 15 years with the establishment of the National Institute on Drug Abuse NIDA and the National Institute on Alcohol Abuse and Alcoholism NIAAA Funding from these and other sources has led to a substantial increase in the quantity and quality of published work related to substance abuse As data accumulate it is becoming more apparent that substance abuse problems are extremely complex and are influenced by a variety of biological psychological and environmental variables Unfortunately it has proved difficult to go beyond this conclusion to a description of how these multiple factors work together to influence the development of and recovery from drug and alcohol dependence The purpose of this book is to try to meet that objective by including in one volume literature reviews and theoretical analyses from a wide variety of drug researchers We chose the authors in an attempt to assure that each of the various levels of analysis appropriate to the substance abuse problems would be included In each case the author was asked to consider how the variables in his or her particular domain might contribute to the appearance of individual differences in both alcohol and drug problems Drugs in America Ansley Hamid, 1998 This basic analysis of the drug problem in America describes the historical and present use of mood altering drugs the economics of drug trafficking theories of addiction and the resulting crime violence and community deterioration In addition the author focuses on the effects of legalizing drugs and the role of law enforcement This is an ideal text for any course discussing drug use and abuse Marijuana decriminalization United States. Decriminalization of Marijuana United States. Congress. House. Select Committee on Narcotics Abuse and Control, 1977 *Addiction Treatment* Daniel Hood, 2017-09-08 *Addiction Treatment* is an ethnography that compares two types of residential drug free treatment programs religious faith based programs and science based secular programs Although these programs have originated from significantly different ideological bases in examining the day to day operations of each Daniel E Hood concludes that they are far more alike than they are different Drug free treatment today whether in secular or religious form is little more than a remnant of the temperance movement It is a warning to stop using drugs At its best treatment provides practical advice and support for complete abstinence At its worst it demeans users for a form of behavior that is not well understood and threatens death if they do not stop Hood argues that there is no universal agreement on what addiction is and that drug abuse is little more than a catch all term of no specific meaning used to condemn behavior that is socially unacceptable Through extensive participatory observations intimate life history interviews and informal conversations with residents and staff Hood shows how both programs use the same basic techniques of ideological persuasion mutual witnessing methods of social control discourse deprivation and the same proposed zero
