Natural Knowledge In Preclassical Antiquity:

Natural Knowledge in Preclassical Antiquity Mott T. Greene, 1992 In describing the origins of modern science historians often fail to appreciate or misread how the ancients understood and used significant expressions of natural knowledge Few read the story of the cyclops for example as useful advice about where to travel and settle and where not to Others search for lost Egyptian wisdom rather than see how the great pyramids of the Old Kingdom could be built with the simple tools and cumbersome mathematics of the time Mott T Greene reexamines the remnants of ancient life using conceptual tools seldom brought to bear on such material The result is a fresh appraisal of what the evidence will yield about natural phenomena and modes of thought in the distant past Greene builds on the work of modern scholars but contributes scientific precision and tenacity to debates in areas as diverse as archaeology early art history Egyptian fractions Indo Iranian religion classical Greek verse and Plato's problem of knowledge *The Oxford Handbook of Natural Theology* Russell Re

Manning, 2013-01-17 The Oxford Handbook of Natural Theology is the first collection to consider the full breadth of natural theology from both historical and contemporary perspectives and to bring together leading scholars to offer accessible high level accounts of the major themes The volume embodies and develops the recent revival of interest in natural theology as a topic of serious critical engagement Frequently misunderstood or polemicized natural theology is an under studied yet persistent and pervasive presence throughout the history of thought about ultimate reality from the classical Greek theology of the philosophers to twenty first century debates in science and religion Of interest to students and scholars from a wide range of disciplines this authoritative handbook draws on the very best of contemporary scholarship to present a critical overview of the subject area Thirty eight new essays trace the transformations of natural theology in different historical and religious contexts the place of natural theology in different philosophical traditions and diverse scientific disciplines and the various cultural and aesthetic approaches to natural theology to reveal a rich seam of multi faceted theological reflection rooted in human nature and the environments within which we find ourselves **Lost Knowledge** Benjamin B.

Olshin, 2019-02-19 Lost Knowledge The Concept of Vanished Technologies and Other Human Histories examines the idea of lost knowledge reaching back to a period between myth and history It investigates a peculiar idea found in a number of early texts that there were civilizations with knowledge of sophisticated technologies and that this knowledge was obscured or destroyed over time along with the civilization that had created it This book presents critical studies of a series of early Chinese South Asian and other texts that look at the idea of specific lost technologies such as mechanical flight and the transmission of images There is also an examination of why concepts of a vanished golden age were prevalent in so many cultures Offering an engaging and investigative look at the propagation of history and myth in technology and culture this book is sure to interest historians and readers from many backgrounds *When They Severed Earth from Sky* Elizabeth

Wayland Barber, Paul T. Barber, 2012-01-02 Why were Prometheus and Loki envisioned as chained to rocks What was the

Golden Calf Why are mirrors believed to carry bad luck How could anyone think that mortals like Perseus Beowulf and St George actually fought dragons since dragons don't exist Strange though they sound however these myths did not begin as fiction This absorbing book shows that myths originally transmitted real information about real events and observations preserving the information sometimes for millennia within nonliterate societies Geologists' interpretations of how a volcanic cataclysm long ago created Oregon's Crater Lake for example is echoed point for point in the local myth of its origin The Klamath tribe saw it happen and passed down the story for nearly 8 000 years We however have been literate so long that we've forgotten how myths encode reality Recent studies of how our brains work applied to a wide range of data from the Pacific Northwest to ancient Egypt to modern stories reported in newspapers have helped the Barbers deduce the characteristic principles by which such tales both develop and degrade through time Myth is in fact a quite reasonable way to convey important messages orally over many generations although reasoning back to the original events is possible only under rather specific conditions Our oldest written records date to 5 200 years ago but we have been speaking and mythmaking for perhaps 100 000 This groundbreaking book points the way to restoring some of that lost history and teaching us about human storytelling

Thales of Miletus Patricia F. O'Grady, 2017-03-02 What is the basic building block of the universe Thales of Miletus was the first to ask this fundamental yet to be answered question in the sixth century B.C. This book offers an in-depth account of the answers he gave and of his adventure into many areas of learning philosophy science mathematics and astronomy Thales proved that the events of nature were comprehensible to man and could be explained without the intervention of mythological beings Henceforth they became subject to investigation experiment questioning and discussion Presenting for the first time in the English language a comprehensive study of Thales of Miletus Patricia O'Grady brings Thales out of pre-Socratic shadows into historical illumination and explores why this historical figure has proved to be of lasting significance

Natural History Pliny the Elder, 2004-02-05 Pliny's Natural History is an astonishingly ambitious work that ranges from astronomy to art and from geography to zoology Mingling acute observation with often wild speculation it offers a fascinating view of the world as it was understood in the first century AD whether describing the danger of diving for sponges the first water clock or the use of asses' milk to remove wrinkles Pliny himself died while investigating the volcanic eruption that destroyed Pompeii in AD 79 and the natural curiosity that brought about his death is also very much evident in the Natural History a book that proved highly influential right up until the Renaissance and that his nephew Pliny the younger described as full of variety as nature itself

Future War Christopher Coker, 2015-11-12 Will tomorrow's wars be dominated by autonomous drones land robots and warriors wired into a cybernetic network which can read their thoughts Will war be fought with greater or lesser humanity Will it be played out in cyberspace and further afield in Low Earth Orbit Or will it be fought more intensely still in the sprawling cities of the developing world the grim black holes of social exclusion on our increasingly unequal planet Will the Great Powers reinvent conflict between themselves or is war destined to become

much smaller both in terms of its actors and the beliefs for which they will be willing to kill In this illuminating new book Christopher Coker takes us on an incredible journey into the future of warfare Focusing on contemporary trends that are changing the nature and dynamics of armed conflict he shows how conflict will continue to evolve in ways that are unlikely to render our century any less bloody than the last With insights from philosophy cutting edge scientific research and popular culture *Future War* is a compelling and thought provoking meditation on the shape of war to come ***Animal Ethics in the Age of Humans*** Bernice Bovenkerk, Jozef Keulartz, 2016-09-21 This book provides reflection on the increasingly blurry boundaries that characterize the human animal relationship In the Anthropocene humans and animals have come closer together and this asks for rethinking old divisions Firstly new scientific insights and technological advances lead to a blurring of the boundaries between animals and humans Secondly our increasing influence on nature leads to a rethinking of the old distinction between individual animal ethics and collectivist environmental ethics Thirdly ongoing urbanization and destruction of animal habitats leads to a blurring between the categories of wild and domesticated animals Finally globalization and global climate change have led to the fragmentation of natural habitats blurring the old distinction between in situ and ex situ conservation In this book researchers at the cutting edge of their fields systematically examine the broad field of human animal relations dealing with wild liminal and domestic animals with conservation and zoos and with technologies such as biomimicry This book is timely in that it explores the new directions in which our thinking about the human animal relationship are developing While the target audience primarily consists of animal studies scholars coming from a wide range of disciplines including philosophy sociology psychology ethology literature and film studies many of the topics that are discussed have relevance beyond a purely theoretical one as such the book also aims to inspire for example biologists conservationists and zoo keepers to reflect on their relationship with animals **The Texts of Early Greek Philosophy** Daniel W. Graham, 2010 This two part volume collects the complete fragments and most important testimonies for the leading presocratic philosophers The Greek and Latin texts are translated on facing pages and accompanied by a brief commentary for each philosopher **Why Philosophy?** Paolo Diego Bubbio, Jeff Malpas, 2019-06-04 Do we really need philosophy The present collection of jargon free essays aims at answering the question of why philosophy matters Each essay considers the central question Why Philosophy from different angles the unavoidability of doing philosophy the practical consequences of philosophy philosophy as a therapy for the whole person the benefits of philosophy for improving public policy etc ***Dutch Culture Overseas*** Frances Gouda, 2008 European colonial expansion led to Dutch notions of civilised society or the Dutch s community s flexible and relatively charitable attitudes toward others being scattered as in the Greek word diaspeirein to the four corners of the earth In some cases the exportation of Dutch cultural values to places overseas like North America endowed Dutchness with subtle new meanings But in colonial Indonesia Dutch political customs and traditions were transformed in the process of migrating to exotic locales In this book Frances Gouda examines the ways in

which the Netherlands portrayed its unique colonial style to the outside world Why were citizens of a small and politically insignificant European nation able to represent as natural and normal their dominance over ancient civilizations on islands such as Java and Bali How did Dutch colonial residents explain the cultural differences between themselves and the supposedly primitive peoples of the Indonesian archipelago In trying to understand the gendering practices of colonial governance in the Netherlands East Indies Gouda also explores the interactions of Dutch and Indonesian women with European men FRANCES GOUDA earned a Ph D in history from the University of Washington in Seattle in 1980 She is currently professor of history and gender studies in the Political Science Department of the University of Amsterdam

Herbs and Healers from the Ancient Mediterranean through the Medieval West Anne Van Arsdall, Timothy Graham, 2016-04-22 Herbs and Healers from the Ancient Mediterranean through the Medieval West brings together eleven papers by leading scholars in ancient and medieval medicine and pharmacy Fittingly the volume honors Professor John M Riddle one of today's most respected medieval historians whose career has been devoted to decoding the complexities of early medicine and pharmacy Herbs in the title generally connotes drugs in ancient and medieval times the essays here discuss interesting aspects of the challenges scholars face as they translate and interpret texts in several older languages Some of the healers in the volume are named such as Philotas of Amphissa Gariopontus and Constantine the African many are anonymous and known only from their treatises on drugs and or medicine The volume's scope demonstrates the breadth of current research being undertaken in the field examining both practical medical arts and medical theory from the ancient world into early modern times It also includes a paper about a cutting edge Internet based system for ongoing academic collaboration The essays in this volume reveal insightful research approaches and highlight new discoveries that will be of interest to the international academic community of classicists medievalists and early modernists because of the scarcity of publications objectively evaluating long lived traditions that have their origin in the world of the ancient Mediterranean

Myth Analyzed Robert A. Segal, 2020-10-13 Comparing and evaluating modern theories of myth this book offers an overview of explanations of myth from the social sciences and the humanities This ambitious collection of essays uses the viewpoints of a variety of disciplines psychology anthropology sociology politics philosophy religious studies and literature Each discipline advocates a generalization about the origin the function and the subject matter of myth The subject is always not what makes any myth distinct but what makes all myths myth The book is divided into five sections covering topics such as myth and psychoanalysis hero myths myth and science myth and politics and myth and the physical world Chapters engage with an array of theorists among them Freud Jung Campbell Rank Winnicott Tylor Frazer Malinowski Levy Bruhl Levi Strauss Harrison and Burkert The book considers whether myth still plays a role in our lives is one of the issues considered showing that myths arise anything but spontaneously They are the result of a specific need which varies from theory to theory This is a fascinating survey by a leading voice in the study of myth As such it will be of much interest to scholars of

myth and how it interacts with Sociology Anthropology Politics and Economics *Entheogens and the Development of Culture* John A. Rush, 2013-07-30 *Entheogens and the Development of Culture* makes the radical proposition that mind altering substances have played a major part not only in cultural development but also in human brain development Researchers suggest that we have purposely enhanced receptor sites in the brain especially those for dopamine and serotonin through the use of plants and fungi over a long period of time The trade off for lowered functioning and potential drug abuse has been more creative thinking or a leap in consciousness Experiments in entheogen use led to the development of primitive medicine in which certain mind altering plants and fungi were imbibed to still fatigue pain or depression while others were taken to promote hunger and libido Our ancestors selected for our neural hardware and our propensity for seeking altered forms of consciousness as a survival strategy may be intimately bound to our decision making processes going back to the dawn of time Fourteen essays by a wide range of contributors including founding president of the American Anthropological Association s Anthropology of Religion section Michael Winkelman PhD Carl A P Ruck PhD Boston University professor of classics and an authority on the ecstatic rituals of the god Dionysus and world renowned botanist Dr Gaston Guzman member of the Colombian National Academy of Sciences and expert on hallucinogenic mushrooms demonstrate that altering consciousness continues to be an important part of human experience today Anthropologists cultural historians and anyone interested in the effects of mind altering substances on the human mind and soul will find this book deeply informative and inspiring **Where the Gods Are** Mark S. Smith, 2016-06-28 The issue of how to represent God is a concern both ancient and contemporary In this wide ranging and authoritative study renowned biblical scholar Mark Smith investigates the symbols meanings and narratives in the Hebrew Bible Ugaritic texts and ancient iconography which attempt to describe deities in relation to humans Smith uses a novel approach to show how the Bible depicts God in human and animal forms and sometimes both together Mediating between the ancients theories and the work of modern thinkers Smith s boldly original work uncovers the foundational understandings of deities and space *Black Athena Writes Back* Martin Bernal, 2001-09-20 This book is Bernal s response to criticisms to his 1987 book *BLACK ATHENA* which argued for an Afro Asiatic origin for Greek civilization Ugarit-Forschungen 48 (2017) Manfred Dietrich, Wilfried Watson, Nicolas Wyatt, 2019-04-01 *Anaximander* Andrew Gregory, 2016-02-25 Anaximander the sixth century BCE philosopher of Miletus is often credited as being the instigator of both science and philosophy The first recorded philosopher to posit the idea of the boundless cosmos he was also the first to attempt to explain the origins of the world and humankind in rational terms Anaximander s philosophy encompasses theories of justice cosmogony geometry cosmology zoology and meteorology Anaximander A Re assessment draws together these wide ranging threads into a single coherent picture of the man his worldview and his legacy to the history of thought Arguing that Anaximander s statements are both apodeictic and based on observation of the world around him Andrew Gregory examines how Anaximander s theories can all be construed in such a

way that they are consistent with and supportive of each other This includes the tenet that the philosophical elements of Anaximander s thought his account of the apeiron the extant fragment can be harmonised to support his views on the natural world The work further explores how these theories relate to early Greek thought and in particular conceptions of theogony and meterology in Hesiod and Homer Acorns: Windows High-Tide Foghat Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around *Plants, Stars and the Origins of Religion* Mary Kilbourne Matossian ,2014 The source records for Plants Stars and the Origins of Religion cover the origins of religion in the Middle East and Europe from prehistoric times to the fall of the Roman Empire One of these records was the Phaistos Disk from Crete which may have been intended to serve as a solar calendar and a decipherment of the Phaistos Disk is included within this book Author Mary Kilbourne Matossian has given particular attention to evidence for the possible role of psychoactive plants by people in prehistoric and ancient times At the same time Plants Stars and the Origins of Religion explores some prehistoric and ancient beliefs about stars
