Pierce Colfer, Jean-Laurent Pfund, 2012-07-26. In each country, the research was set within the framework of a major national policy thrust. The book improves our understanding of and ability to manage complex landscapes, mosaics of differing land uses, in a more adaptive and collaborative way that benefits both the environment and local communities. It includes both single-country and cross-site analyses and focuses on themes such as resettlement, land use planning, non-timber forest product use and management, the disconnect between customary and formal legal systems, and the role of larger-scale policies in local-level realities. Chapters also analyze experience with monitoring and a local governance assessment tool. The work also provides guidance for those interested in management and governance at lower and intermediate levels: village, district, scales likely to grow in importance in the global effort to mitigate and adapt to climate change. **Integral Urbanism** Nan Ellin, 2013-10-18.
