Ritchie,2015-07-01 Excerpt from *Natural Rights A Criticism of Some Political and Ethical Conceptions* When I began some three years ago to write a paper on Natural Rights which has grown by degrees into the present volume I had a certain fear that in criticising that famous theory I might be occupied in slaying the already slain Recent experience has however convinced me that the theory is still in a sense alive or at least capable of mischief Though disclaimed by almost all our more careful writers on politics and ethics it yet remains a commonplace of the newspaper and the platform not only in the United States of America where the theory may be said to form part of the national creed but in this country where it was assailed a century ago by both Burke and Bentham If it be suggested that an exposure of fallacies which have survived the attack of two critics so great and of such diverse genius is either futile or superfluous I should answer that I hope I have approached the theory in a spirit more appreciative and sympathetic than was possible to the eloquent passion of Burke or to the keen cold abstractly logical analysis of Bentham At least I have endeavoured to regard the theory in the light of its historical significance for it is never

sufficient to argue that a widely held opinion is erroneous without trying to show how and why it came to be widely held What I have attempted is simply a contribution to an historical and critical analysis of a set of conceptions which have had for good and evil an enormous influence in the region of practical politics and legislation The Study is but a fragment of political philosophy and even in itself it is inevitably incomplete Illustrations and applications might have been multiplied indefinitely and any selection must always seem arbitrary to some readers The subject of liberty of thought has been discussed at what may seem disproportionate length but it appeared to me one of the most suitable for the sake of illustration and the treatment accorded to it is after all not very lengthy Chapter VIII will serve its purpose best if it should help to provoke some competent historical student to undertake a history of the practice and of the idea of toleration on which I have only given a few jottings About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

### **The Limits of Ethics in International Relations**

David Boucher,2011-05-05 Ethical constraints on relations among individuals within and between societies have always reflected or invoked a higher authority than the caprices of human will For over two thousand years Natural Law and Natural Rights were the constellations of ideas and presuppositions that fulfilled this role in the west and exhibited far greater similarities than most commentators want to admit Such ideas were the lens through which Europeans evaluated the rest of the world In his major new book David Boucher rejects the view that Natural Rights constituted a secularisation of Natural Law ideas by showing that most of the significant thinkers in the field in their various ways believed that reason leads you to the discovery of your obligations while God provides the ground for discharging them Furthermore the book maintains that Natural Rights and Human Rights are far less closely related than is often asserted because Natural Rights never cast adrift the religious foundationalism whereas Human Rights for the most part have jettisoned the Christian metaphysics upon which

both Natural Law and Natural Rights depended Human Rights theories on the whole present us with foundationless universal constraints on the actions of individuals both domestically and internationally Finally one of the principal contentions of the book is that these purportedly universal rights and duties almost invariably turn out to be conditional and upon close scrutiny end up being special rights and privileges as the examples of multicultural encounters slavery and racism and women s rights demonstrate Natural Rights a Criticism of Some Political and Ethical Conceptions by David G. Ritchie, M.A. Fellow and Tutor of Jesus College Oxford; Author of "Darwin and Hegel," Etc. Part I The Theory of Natural Rights ,1894

Northwestern University Law Review ,1909 *What's Wrong with Rights?* Nigel Biggar,2020 iWhat s Wrong with Rights i argues that contemporary rights talk obscures the importance civic virtue military effectiveness and the democratic law legitimacy It draws upon legal and moral philosophy moral theology and court judgments It spans discussions from medieval Christendom to contemporary debates about justified killing Environment, Political Representation and the Challenge of Rights Mihnea Tanasescu,2016-01-26 Tanasescu examines the rights of nature in terms of its constituent parts Besides offering a thorough theoretical grounding the book gives a first detailed overview of the actual cases of rights for nature so far This is the first comprehensive treatment of the rights of nature to date both analytically and in terms of actual cases

**Thomistic Tradition and Human Rights** Carlos Isler Soto,2023-09-22 The present book verses on the current discussion between authors writing within the Thomistic tradition on the issue of human rights and pretends to adjudicate that discussion The positions of authors who are critical of the notion of human rights like Michel Villey and Alasdair MacIntyre as well as that of those who try to justify their existence and explain their nature like Jacques Maritain John Finnis and others are carefully explained and evaluated This book is the first to deal in detail with this contemporary discussion and therefore represents an important contribution to the bibliography on the philosophy of human rights as well as to the bibliography on the Thomistic tradition **The Politics of Human Rights** Andrew Vincent,2010-07-08 The Politics of Human Rights provides a systematic introductory overview of the nature and development of human rights At the same time it offers an engaging argument about human rights and their relationship with politics The author argues that human rights have only a slight relation to natural rights and they are historically novel In large part they are a post 1945 reaction to genocide which is in turn linked directly to the lethal potentialities of thenation state He suggests that an understanding of human rights should nonetheless focus primarily on politics and that there are no universally agreed moral or religious standards to uphold them they exist rather in the context of social recognition within a political association A consequence of this is that the1948 Universal Declaration is a political not a legal or moral document Vincent goes on to show that human rights are essentially reliant upon the self limitation capacity of the civil state With the development of this state certain standards of civil behaviour have become for a sector of humanity slowly and painfully more customary He shows that these standards of civility have extended to a broader society of states At their best human rights are an ideal civil state vocabulary

The author explains that we comprehend both our own humanity and human rights through our recognition relations with other humans principally via citizenship of a civil state Vincent concludes that the paradox of human rights is that they are upheld to a degree by the civil state but the point of such rights is to protect against another dimension of this same tradition the nation state Human rights are essentially part of a struggle at the core of the state tradition *The Open Shelf*, 1895
