Crocker,2019-12-01 Originally published in 1963 Perhaps the most generative ethical question of eighteenth century France was how to live a virtuous and happy life at the same time During the Age of Enlightenment Christianity fell out of vogue as the dominant and authoritative moral code In place of Christianity s emphasis on sin and redemption in light of a supposed afterlife present happiness became recognized as an appropriate end goal among French Enlightenment thinkers French intellectuals struggled to find equilibrium between nature a person s individual goals and needs and culture the political economic and social organization of humans for a collective good Enlightenment discourse generated a unique cultural moment in which thinkers addressed the problems of humans moral coexistence through the dichotomy of nature and culture Lester Crocker addresses these questions in an overview of ethical thought in eighteenth century France      Embodied Progress ,      *The Origin and Nature of Mind (HB)* Leonard Wilson, Jr. M. ED,2022-03-30 The Origin and Nature of Mind A Complex Understanding from Direct Observations HB By Leonard Wilson Jr M ED Psychologist General Scientist The Origin and Nature of Mind A Complex Understanding from Direct Observations explores the nature of the human mind from both a scientific and a biblical perspective Delving beyond the wrongful assumption that mind equals brain alone Leonard Wilson Jr M ED examines the mind s connection with the body s vestibule and nervous system Through a greater understanding of the human mind Wilson hopes to better the human condition easing the weight of mental illness on those afflicted and their loved ones      **A World in Two Minds** K W Jamieson,2020-04-07

Society is in a state of chaos yet almost all life stresses are human made Our species is literally making itself sick In A World in Two Minds Kenny Jamieson considers the two complex adaptive systems behind the chaos the individual mind and the global mind and how the latter emerges in the form of culture from the former We have a global cognitive imbalance due to the dominance of the mechanistic worldview of scientific materialism which is strongly rooted in the left mind and Western culture Over centuries this bias has gradually dissociated us from the right mind lowering consciousness denaturing the human condition and negatively impacting our health Today life offers the human race both opportunity and danger Our global mind could evolve to a higher cognitive plane where harmony health and happiness prevail but it could just as easily disintegrate leading to catastrophic conflict Our future is unknown but whatever we bring forth will be the output of the global mind we collectively create Critically everyone has a role to play Any one of us could be the final catalyst which tips our whole human system into a new era

**Romantic Intimacy** Nancy Yousef,2013-09-04 How much can we know about what other people are feeling and how much can we sympathize or empathize with them The term intimacy captures a tension between a confidence in the possibility of shared experience and a competing belief that thoughts and feelings are irreducibly private This book is an interdisciplinary study of shared feeling as imagined in eighteenth century ethics romantic literature and twentieth century psychoanalysis Original interpretations of Hume Rousseau Kant Wordsworth Coleridge and Austen show how mutual recognition gives way to the appreciation of varied nonreciprocal forms of intimacy The book concludes with accounts of empathy and unconscious communication in the psychoanalytic setting revealing the persistence of romantic preoccupations in modernity Yousef offers a compelling account of how philosophical confidence in sympathy is transformed by literary attention to uneven forms of emotional response including gratitude disappointment distraction and absorption In its wide ranging and eclectic engagement with current debates on the relationship between ethics affect and aesthetics the book will be crucial reading for students of eighteenth and nineteenth century culture as well as for literary theorists
