**Nature and Technology in the World Religions** P. Koslowski, 2013-06-29 Technology and the control of nature have arisen from the endeavor to reduce the neediness of human life Since this reduction is also the goal of religions there is a necessary proximity between religion and technology The relationship of humans to nature and technology is an object of religious doctrine and ethics in all of the world's religions The interpretations and the norms of the treatment of nature in economy and technology but also the veneration of nature in nature mysticism and its elevation in cult and sacrament are forms of expression of the relationship to nature in religions The development of the modern control of nature through technology appears to be connected to the biblical commission to rule over nature Buddhism and Hinduism however also interpret technology and human control of nature Technological power raises the question of how the normativeness of the created order intended by religion's concept of creation relates to the human freedom to reshape creation What answers do religions give to the question of the humane form of technology and the limits to technological power and human control of nature Leading scholars of Judaism Christianity Islam Hinduism and Buddhism have created with this volume a first hand source of information which enables the reader to gain a better understanding of these five world religions and their teachings on nature and technology

technology and then to particular and specific practices Technofutures Nature and the Sacred seeks to arrive at a genuinely transdisciplinary perspective focusing attention on the intersection between technology religion and society and using insights from the environmental humanities It works from both theoretical and practical contexts by using newly emerging case studies including geo engineering and soil carbon technologies and breaks open new ground by engaging theological scientific philosophical and cultural aspects of the technology religion nature nexus Encouraging us to reflect on the significance and place of religious beliefs in dealing with new technologies and engaging critical theory common in sociological political and literary discourses the authors explore the implicit religious claims embedded in technology
